SECTION 16

TOWNSHIP 14 SOUTH, RANGE 13 EAST, W.M.

This use may be regulated if analysis of data available discloses that the appropriation will measurably reduce the surface water flows necessary to maintain the free-flowing character of a scenic waterway in quantities necessary for recreation, fish and wildlife in effect as of the priority date of this right or as those quantities may be reduced.

The right to use water for the above purpose is restricted to beneficial use on the lands or place of use described.

The applicant proposes an additional point of appropriation located:

SE¼ SW¼, SECTION 16, T 14 S, R 13 E, W.M.; 1130 FEET NORTH AND 1360 FEET EAST FROM THE SW CORNER OF SECTION 16.

THIS CHANGE TO AN EXISTING WATER PERMIT MAY BE MADE PROVIDED THE FOLLOWING CONDITIONS ARE MET BY THE WATER USER:

1. The quantity of water diverted at the new point of appropriation (well), together with that diverted at the old points of appropriation, shall not exceed the quantity of water lawfully available at the original points of appropriation.
2. The water user shall install and maintain a headgate, an in-line flow meter, weir, or other suitable device for measuring and recording the quantity of water diverted. The type and plans of the headgate and measuring device must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department.

3. Water shall be acquired from the same aquifer as the original points of appropriation.
4. All other terms and conditions of the permit remain the same.

Permit G-8542, in the name of TERREBONNE DOMESTIC WATER DISTRICT is amended as described herein.
