Use of water from the well shall not be allowed under this permit if the well displays loss of hydraulic head equal to a water level decline of 25 or more feet.

The Water Resources Department has determined that the initial water level in the well was equivalent to 20 feet above land surface on April 21, 1988. That is the level from which previously cited declines will be referenced.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to restrictions on the use, civil penalties, or cancellation of the permit.
