

STATE OF OREGON

COUNTY OF MARION

PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

RON VANDECOEVERING
11607 BARON ROAD NE
MT. ANGEL, OREGON 97362

503-845-9490

to use the waters of ONE WELL in the PUDDING RIVER BASIN for SUPPLEMENTAL IRRIGATION OF 105.5 ACRES.

This permit is issued approving Application G-12130. The date of priority is MAY 31, 1990. The use is limited to not more than 0.67 CUBIC FOOT PER SECOND, or its equivalent in case of rotation, measured at the well.

The well is located as follows:

SW 1/4 SE 1/4, SECTION 32, T 5 S, R 1 W, W.M.; 1050 FEET NORTH AND 3680 FEET EAST FROM SW CORNER, SECTION 33.

The amount of water used for irrigation, together with the amount secured under any other right existing for the same lands, shall be limited to ONE-EIGHTIETH of one cubic foot per second per acre, or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 2.5 acre-feet per acre for each acre irrigated during the irrigation season of each year. This right shall be limited to any deficiency in the available supply of any prior right existing for the same land.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the proposed place of use under the permit is as follows:

NE 1/4 SW 1/4	2.1 ACRES
SW 1/4 SW 1/4	10.6 ACRES
SE 1/4 SW 1/4	29.2 ACRES
NE 1/4 SE 1/4	5.7 ACRES
NW 1/4 SE 1/4	38.6 ACRES
SW 1/4 SE 1/4	19.3 ACRES

SECTION 33

TOWNSHIP 5 SOUTH, RANGE 1 WEST, W.M.

The well shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times. The permittee shall install and maintain a weir, meter, or other suitable measuring device, and shall keep a complete record of the amount of ground water withdrawn and submit an annual report of the water used to the Department.

"CERTIFICATE NO. 76007

The water user shall annually report a March static water level in the well to the Water Resources Department. The measurement shall be made and calculations detailed by a certified water rights examiner, registered professional geologist, certified engineering geologist, professional engineer or the permittee/appropriator.

Use of water from the well shall be invalid under this permit if the well displays an (A) average water level decline of 3 or more feet per year for 5 consecutive years, or (B) a water level decline of 15 or more feet in fewer than 5 consecutive years, or (C) a water level decline of 25 or more feet, or (D) a hydraulic interference decline of 25 or more feet in any neighboring well with senior priority which provides water for an authorized use.

The Water Resources Department has determined that the initial water level in the well shall be that measured in March, 1992. That is the level from which previously cited declines will be referenced. As much as possible, future levels shall reflect annual high levels which are usually found in the spring of each year.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Actual construction work shall begin on or before March 2, 1993, and shall be completed on or before October 1, 1994. Complete application of the water shall be made on or before October 1, 1995.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for beneficial use of water without waste. The water user is advised that new regulations may require use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

Issued this date, MARCH 2, 1992.

/s/ WILLIAM H. YOUNG

Water Resources Department
William H. Young
Director
