

STATE OF OREGON
COUNTY OF DESCHUTES
PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

SUNRIVER UTILITIES COMPANY
P.O. BOX 3699
SUNRIVER, OREGON 97707

503-593-1221 EXT. 458

to use the waters of WELL 9 AND WELL 12 in the DESCHUTES RIVER BASIN for GROUP DOMESTIC USE FOR 4500 FAMILIES INCLUDING THE IRRIGATION OF UP TO 1/2 ACRE LAWN OR NON-COMMERCIAL GARDEN FOR EACH FAMILY AND IRRIGATION OF 749.9 ACRES.

This permit is issued approving Application G-11627. The date of priority is NOVEMBER 12, 1987 FOR 3200 GALLONS PER MINUTE (GPM) AND DECEMBER 8, 1992 FOR 500 GPM. The use is limited to not more than 3700 GPM; BEING 1700 GPM FROM WELL 9 AND 2000 GPM FROM WELL 12, FURTHER DESCRIBED AS BEING 2450 GPM FOR GROUP DOMESTIC AND 1250 GPM FOR IRRIGATION or its equivalent in case of rotation, measured at the wells.

The wells are located as follows:

WELL 9 - NE 1/4 NE 1/4, SECTION 29, T 19 S, R 11 E, W.M.; BEING 1200 FEET SOUTH AND 70 FEET WEST FROM NE CORNER, SECTION 29.

WELL 12 - NW 1/4 NW 1/4, SECTION 8, T 20 S, R 11 E, W.M.; BEING 420 FEET SOUTH AND 200 FEET WEST FROM NE CORNER, SECTION 8.

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 3.0 acre-feet for each acre irrigated during the irrigation season of each year. This right is limited to any deficiency in the available supply of any prior right existing for the same land.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the proposed place of use under this permit is as follows:

SECTION 18

TOWNSHIP 20 SOUTH, RANGE 11 EAST, W.M.

The adequacy of the construction of Well 12 shall be approved by the Groundwater Hydrology Section of the Water Resources Department before water is appropriated from the well. The well shall be constructed to develop water from an aquifer greater than 70 feet in depth from land surface so that the proposed groundwater use will not have the potential for substantial interference with the Deschutes River.

The Sunriver Utilities Company shall develop a plan to monitor and report the impact of water use under this permit on water levels within the aquifer that provides water to the permitted wells. The plan shall be submitted to the Department within one year of the date the permit is issued and shall be subject to the approval of the Department. At a minimum, the plan shall include a program to periodically measure static water levels within the permitted wells or an adequate substitute such as water levels in nearby wells. The plan shall also stipulate a reference water level against which any water-level declines will be compared. If a well listed on this permit displays a total static water-level decline of 25 or more feet over any period of years, as compared to the reference level, then the Sunriver Utilities Company shall discontinue use of, or reduce the rate or volume of withdrawal from, the wells. Such action shall be taken until the water level recovers to above the 25-foot decline level or until the Department determines, based on the Sunriver Utilities Company or the Department's data and analysis, that no action is necessary because the aquifer in question can sustain the observed declines without adversely impacting the resource or senior water rights. The Sunriver Utilities Company shall in no instance allow excessive decline to occur within the aquifer as a result of use under this permit.

Within one year from the date the Water Resources Commission adopts rules describing the schedules, standards and procedures for water conservation management plans by water suppliers, Sunriver Utilities Company shall submit a plan which is consistent with said rules.

Within one year of permit issuance, Sunriver Utilities Company shall prepare a plan/timetable for the Water Resources Commission which shall indicate the steps which the Company intends to pursue to obtain a long-term water supply.

The well shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times. When required by the department, the permittee shall install and maintain a weir, meter, or other suitable measuring device, and shall keep a complete record of the amount of ground water withdrawn.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Actual construction work shall begin on or before December 23, 1993, and shall be completed on or before October 1, 1998. Complete application of the water shall be made on or before October 1, 1998.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for beneficial use of water without waste. The water user is advised that new regulations may require use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The Director finds that the proposed uses of water described by this permit, as conditioned, would not impair or be detrimental to the public interest.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

Issued this date, December 23, 1992.
