

STATE OF OREGON

COUNTY OF MARION

PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

MONTECUCCO FARMS & LEATHER'S OIL COMPANY  
%MONTECUCCO FARMS 4120 N. LOCUST  
CANBY, OREGON 97013

503-263-6066

to use the waters of WELLS 1 AND 2 in the <sup>Seneca</sup> GRIBBLE CREEK BASIN for  
COMMERCIAL USE.

This permit is issued approving Application G-13325. The date of  
priority is MARCH 12, 1993. The use is limited to not more than 1.0  
CUBIC FOOT PER SECOND, or its equivalent in case of rotation, measured  
at the well.

The wells are located as follows:

SW 1/4 SE 1/4, SE 1/4 SE 1/4, SECTION 9, T 4 S, R 1 W, W.M.; WELL  
1 - 150 FEET NORTH AND 1440 FEET EAST, WELL 2 - 700 FEET SOUTH AND 400  
FEET EAST, BOTH FROM THE NE CORNER OF J. GRIM DLC 46.

The use shall conform to such reasonable rotation system as may be  
ordered by the proper state officer.

A description of the proposed place of use under this permit is as  
follows:

SE 1/4  
ALL AS PROJECTED WITHIN DLC 46  
SECTION 9  
TOWNSHIP 4 SOUTH, RANGE 1 WEST, W.M.

The wells shall be constructed in accordance with the General Standards  
for the Construction and Maintenance of Water Wells in Oregon. The  
works shall be equipped with a usable access port, and may also include  
an air line and pressure gauge adequate to determine water level  
elevation in the well at all times.

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee  
shall install a meter or other suitable measuring device as  
approved by the Director. The permittee shall maintain the  
meter or measuring device in good working order.
- B. The permittee shall allow the watermaster access to the meter  
or measuring device; provided however, where the meter or  
measuring device is located within a private structure, the  
watermaster shall request access upon reasonable notice.
- C. The Director may require the permittee to keep and maintain a  
record of the amount (volume) of water used and may require  
the permittee to report water use on a periodic schedule as  
established by the Director. In addition, the Director may  
require the permittee to report general water use information,  
the periods of water use and the place and nature of use of  
water under the permit. The Director may provide an  
opportunity for the permittee to submit alternative reporting  
procedures for review and approval.

Application G-13325

Water Resources Department

PERMIT G-11962

The PERMITTEE shall obtain a static water-level measurement for each well during MARCH of each year and report the measurement to the Department within thirty days. The measurement shall be made by a certified water-rights examiner, registered professional geologist, certified engineering geologist, professional engineer, licensed well constructor or pump installer licensed by the Construction Contractors Board, licensed land surveyor or the permittee/appropriator. Water levels shall be reported as depth-to-water below ground level and shall be accompanied by supporting calculations. Reports and calculations shall be provided to the Department on forms provided by the Department and shall be certified as to their accuracy by the individual making the measurements. If a well listed on this permit displays a total static water-level decline of 25 or more feet over any period of years, as compared to the reference level, then the PERMITTEE shall discontinue use of, or reduce the rate or volume of withdrawal from, the well(s). Such action shall be taken until the water level recovers to above the 25-foot decline level or until the Department determines, based on the PERMITTEE'S or the Department's data and analysis, that no action is necessary because the aquifer in question can sustain the observed declines without adversely impacting the resource or senior water rights. The reference level for water-level declines shall be the second annual measurement taken after water use begins under the terms of this permit. The PERMITTEE shall in no instance allow excessive decline to occur within the aquifer as a result of use under this permit.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Actual construction work shall begin on or before February 28, 1996 and shall be completed on or before October 1, 1997. Complete application of the water shall be made on or before October 1, 1998.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for beneficial use of water without waste. The water user is advised that new regulations may require use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The Director of the Water Resources Department has found that the proposed use of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Issued this date, February 28, 1995. B date ext to 10-1-03  
C date ext to 10-1-04
