

STATE OF OREGON

COUNTY OF CLACKAMAS

PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

DAMASCUS WATER DISTRICT  
19750 S.E. DAMASCUS LANE  
BORING, OREGON 97009

503-658-5585

to use the waters of WELL #9 in the DEEP CREEK BASIN for MUNICIPAL USE.

This permit is issued approving Application G-13113. The date of priority is SEPTEMBER 10, 1992. The use is limited to not more than 1.12 CUBIC FEET PER SECOND, or its equivalent in case of rotation, measured at the well.

The well is located as follows:

SE 1/4 SE 1/4, SECTION 35, T 1 S, R 3 E, W.M.; 100 FEET NORTH AND 1230 FEET WEST FROM THE SE CORNER OF SECTION 35.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the proposed place of use under this permit is as follows:

WITHIN THE BOUNDARIES OF THE DAMASCUS  
WATER DISTRICT, CLACKAMAS COUNTY  
TOWNSHIP 1 & 2 SOUTH, RANGE 3 EAST, W.M.

The well shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times.

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter. The permittee shall maintain the meter in good working order, shall keep a complete record of the rate and amount of water used each month and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the permittee shall report general water use information, including the place and nature of use of water under the permit.
- B. The permittee shall allow the watermaster access to the meter; provided however, where the meter is located within a private structure, the watermaster shall request access upon reasonable notice.

Within one year from the date the Water Resources Commission adopts rules describing the schedules, standards and procedures for water conservation management plans by water suppliers, the district shall submit a plan which is consistent with said rules.

Within one year of permit issuance, the district shall prepare a plan/timetable for the Water Resources Commission which shall indicate the steps which the district intends to pursue to obtain a long-term water supply.

The permittee shall develop a plan to monitor and report the impact of water use under this permit on water levels within the aquifer that provides water to the permitted well(s). The plan shall be submitted to the Department within one year of the date the permit is issued and shall be subject to the approval of the Department. At a minimum, the plan shall include a program to periodically measure static water levels within the permitted well(s) or an adequate substitute such as water levels in nearby wells. The plan shall also stipulate a reference water level against which any water-level declines will be compared. If a well listed on this permit displays a total static water-level decline of 25 or more feet over any period of years, as compared to the reference level, then the permittee shall discontinue use of, or reduce the rate or volume of withdrawal from, the well(s). Such action shall be taken until the water level recovers to above the 25-foot decline level or until the Department determines, based on the permittee's or the Department's data and analysis, that no action is necessary because the aquifer in question can sustain the observed declines without adversely impacting the resource or senior water rights. The permittee shall in no instance allow excessive decline to occur within the aquifer as a result of use under this permit.

The permit shall allow groundwater production from no shallower than 200 feet below land surface.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Actual construction work shall begin on or before October 14, 1995 and shall be completed on or before October 1, 1996. Complete application of water shall be made on or before October 1, 1997.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for beneficial use of water without waste. The water user is advised that new regulations may require use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The Director of the Water Resources Department has found that the proposed use of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

This permit is issued to correct scrivener errors in the measuring and reporting conditions and supersedes permit G-11829.

Issued this date, February 6, 1995.
