

STATE OF OREGON

COUNTY OF CLACKAMAS

PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

HARRISON MCKNIGHT JR
GRETA MCKNIGHT
35855 SE KELSO RD
BORING, OREGON 97009

(503) 668-8026

The specific limits for the use are listed below along with conditions of use.

APPLICATION FILE NUMBER: G-12476

SOURCE OF WATER: TWO WELLS IN THE NORTH FORK DEEP CREEK BASIN

PURPOSE OR USE: AGRICULTURAL USE AND IRRIGATION OF 38.42 ACRES

AMOUNT/VOLUME ALLOWED: 0.379 CUBIC FOOT PER SECOND (CFS), BEING 0.223 CFS FROM WELL 1 (PRIMARY), AND 0.156 CFS FROM WELL 2 (SUPPLEMENTAL)

PERIOD OF ALLOWED USE: MARCH 1 THROUGH OCTOBER 31 FOR IRRIGATION; YEAR ROUND FOR AGRICULTURAL USE

DATE OF PRIORITY: APRIL 5, 1991

POINT OF DIVERSION LOCATION: SE 1/4 SE 1/4, SECTION 3, T2S, R4E, W.M.;
WELL 1 - 138 FEET NORTH AND 631 FEET WEST, WELL 2 - 742 FEET NORTH AND 683 FEET WEST, BOTH FROM THE SE CORNER OF SECTION 3

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 2.5 acre-feet for each acre irrigated during the irrigation season of each year.

THE PLACE OF USE IS LOCATED AS FOLLOWS:

SE 1/4 SE 1/4 38.42 ACRES
SECTION 3
TOWNSHIP 2 SOUTH, RANGE 4 EAST, W.M.

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order.

- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.

Use of water from the wells, as allowed herein, shall be controlled or shut off if the wells display:

- (A) An average water level decline of three or more feet per year for five consecutive years; or
- (B) A total water level decline of fifteen or more feet; or
- (C) A hydraulic interference decline of fifteen or more feet in any neighboring well providing water for senior exempt uses or wells covered by prior rights.

The water user shall be responsible for complying with each of the following requirements for measuring water levels in the wells.

- (A) Use of water from a new well shall not begin until an initial static water level in the well has been measured and submitted to the Department.
- (B) In addition to the measurement required in subsection (a) of this section, a water level measurement shall be made each year during the period March 1 through March 31.
- (C) All water level measurements shall be made by a qualified individual. Qualified individuals are certified water rights examiners, registered geologists, registered professional engineers, licensed land surveyors, licensed water well driller, licensed pump installer, or the permittee/appropriator.
- (D) Any qualified individual measuring a well shall use standard methods of procedure and equipment designed for the purpose of well measurement. The equipment used shall be well suited to the conditions of construction at the well. A list of standard methods of procedure and suitable equipment shall be available from the Department.

(E) The permittee/appropriator shall submit a record of the measurement to the Department on a form available from the Department. The record of measurement shall include both measurements and calculations, shall include a certification as to their accuracy signed by the individual making the measurements, and shall be submitted to the Department within 90 days from the date of measurement. The Department shall determine when any of the declines cited in section (1) are evidenced by the well measurement required in this section.

Groundwater production allowed only from the deep Troutdale Aquifer groundwater reservoir between approximately 300 feet and 600 feet below ground surface.

Use of water under authority of this permit may be regulated if analysis of data available after the permit is issued discloses that the appropriation will measurably reduce the surface water flows necessary to maintain the free-flowing character of a scenic waterway in quantities necessary for recreation, fish and wildlife in effect as of the priority date of the right or as those quantities may be subsequently reduced.

STANDARD CONDITIONS

The wells shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Actual construction of the wells shall begin on or before July 8, 1997 and shall be completed on or before October 1, 1998. Complete application of the water to the use shall be made on or before October 1, 1999.

This permit is issued to correctly describe the period of allowed use for each of the uses listed. Permit G-12596, dated July 8, 1996, is superseded by this instrument and is of no further force or effect.

Issued August 21, 1996

for Steven Replogle

Martha O. Pagel Director
Water Resources Department
