

STATE OF OREGON

COUNTY OF WASHINGTON

PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

GLENN WALTERS NURSERY, INC.

P.O. BOX 280

BANKS, OREGON 97106

503-693-1125

The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: G-12601

SOURCE OF WATER: WELL # 3 IN THE MCFEE CREEK BASIN

PURPOSE OR USE: SUPPLEMENTAL NURSERY OPERATIONS ON 87.1 ACRES

MAXIMUM RATE: 300.0 GALLONS PER MINUTE (0.668 CFS), OR ITS EQUIVALENT IN CASE OF ROTATION, MEASURED AT THE WELL

PERIOD OF USE: YEAR ROUND

DATE OF PRIORITY: JULY 5, 1991

POINT OF DIVERSION LOCATION: SW 1/4 NE 1/4, SECTION 8, T2S, R2W, W.M.; 1015 FEET NORTH AND 94 FEET EAST FROM C 1/4 CORNER, SECTION 8

The amount of water used for NURSERY OPERATIONS is limited to a diversion of 0.15 cubic foot per second per acre. For the irrigation of **containerized nursery plants**, the amount of water diverted is limited to ONE-FORTIETH of one cubic foot per second (or its equivalent) and 5.0 acre feet per acre per year. For the irrigation of **in ground nursery plants** the amount of water diverted is limited to ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 2.5 acre feet per acre per year. The use of water for NURSERY OPERATIONS may be made at anytime of the year that the use is beneficial. For the irrigation of **any other crop**, the amount of water diverted is limited to ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 2.5 acre feet per acre during the irrigation season of each year.

THE PLACE OF USE IS LOCATED AS FOLLOWS:

SW 1/4 NE 1/4 15.4 ACRES
NE 1/4 SW 1/4 36.0 ACRES
NW 1/4 SW 1/4 9.1 ACRES
SE 1/4 SW 1/4 26.6 ACTRE

SECTION 8

TOWNSHIP 2 SOUTH, RANGE 2 WEST, W.M.

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order, shall keep a complete record of the amount of water used each month and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water use information, including the place and nature of use of water under the permit.
- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.

This right is limited to any deficiency in the available supply of any prior right existing for the same land.

The source of water allowed herein is limited to a confined aquifer within the Columbia River Basalts.

The permittee shall obtain a static water-level measurement for each well during March of each year and report the measurement to the Department within thirty days. The measurement shall be made by a certified water-rights examiner, registered professional geologist, certified engineering geologist, professional engineer, licensed well constructor, pump installer licensed by the Construction Contractors Board, licensed land surveyor or the permittee/appropriator. Water levels shall be reported as depth-to-water below ground level and shall

Application G-12601 Water Resources Department

PERMIT G-13701

be accompanied by supporting calculations. Reports and calculations shall be provided to the Department on forms provided by the Department and shall be certified as to their accuracy by the individual making the measurements. If a well listed on this permit displays a total static water-level decline of 25 or more feet over any period of years, as compared to the reference level, then the permittee shall discontinue use of, or reduce the rate of volume of withdrawals from, the well(s). Such action shall be taken until the water level recovers to above the 25-foot decline level or until the Department determines, based on the permittee's or the Department's data and analysis, that no action is necessary because the aquifer in question can sustain the observed declines without adversely impacting the resource or senior water rights. The reference level for water-level declines shall be the second annual measurement taken after water use begins under the terms of this permit. The permittee shall in no instance allow excessive decline to occur within the aquifer as a result of use under this permit.

This permit expires June 23, 2004. This permit may be extended for additional five year periods if the Director finds the groundwater resource can probably support the extended use.

Within two years of permit issuance, the permittee shall prepare a plan for the Director which shall indicate the steps for obtaining a long term water supply.

STANDARD CONDITIONS

The wells shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

Prior to receiving an additional 5 year extension, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

This permit is issued to extend the permitted use for an additional 5 year period. Permit G-11780, dated June 23, 1994 is superseded by this instrument and is of no further force or effect.

Issued July 30, 1999

Martha O. Pagel, Director
