

STATE OF OREGON

COUNTY OF WASCO

PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

FRED JUSTESEN
59720 TWIN LAKES ROAD
GRASS VALLEY, OREGON 97029

(541) 333-2311

The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: G-15795

SOURCE OF WATER: A WELL, TRIBUTARY TO PINE HOLLOW

STORAGE FACILITIES: HAYSTACK RESERVOIR, ELK RESERVOIR, AND MULEY LAKE RESERVOIR

PURPOSE OR USE OF GROUND WATER AND STORED WATER: FILL AND MAINTENANCE OF 3 RESERVOIRS FOR AQUATIC LIFE, POLLUTION ABATEMENT, RECREATION, WILDLIFE, AND WETLAND ENHANCEMENT

MAXIMUM RATE: 0.446 CUBIC FOOT PER SECOND (CFS), BEING 0.446 CFS FOR THE INITIAL FILL OF 38.0 ACRE-FEET IN 3 RESERVOIRS AND 0.38 CFS FOR MAINTENANCE OF THE RESERVOIRS

MAXIMUM VOLUME OF STORAGE: 38.0 ACRE FEET (AF) EACH YEAR, BEING 12.0 AF IN HAYSTACK RESERVOIR, 12.0 AF IN ELK RESERVOIR, AND 14.0 AF IN MULEY RESERVOIR

PERIOD OF USE: YEAR ROUND

DATE OF PRIORITY: JULY 3, 2002

WELL LOCATION: NW 1/4 NE 1/4, SECTION 21, T6S, R17E, W.M.; 620 FEET SOUTH & 1600 FEET WEST OF NE CORNER, SECTION 21

DAM LOCATIONS:

HAYSTACK RESERVOIR - NE 1/4 NE 1/4, SECTION 21, T6S, R17E, W.M.; 330 FEET SOUTH & 120 FEET WEST OF NE CORNER, SECTION 21

ELK RESERVOIR - NW 1/4 SW 1/4, SECTION 21, T6S, R17E, W.M.; 2600 FEET SOUTH & 4900 FEET WEST OF NE CORNER, SECTION 21

MULEY RESERVOIR - SW 1/4 SE 1/4, SECTION 21, T6S, R17E, W.M.; 4950 FEET SOUTH & 2600 FEET WEST OF NE CORNER, SECTION 21

The area submerged by Haystack Reservoir, when full, will be 3.0 acres. The maximum height of the dam shall not exceed 9.5 feet.

The area submerged by Elk Reservoir, when full, will be 3.0 acres. The maximum height of the dam shall not exceed 9.5 feet.

The area submerged by Muley Reservoir, when full, will be 4.0 acres. The maximum height of the dam shall not exceed 8.0 feet.

THE PLACE OF USE AND AREA SUBMERGED BY THE RESERVOIRS IS LOCATED AS FOLLOWS:

NE 1/4 NE 1/4
NW 1/4 SW 1/4
SE 1/4 SW 1/4
SW 1/4 SE 1/4

SECTION 21

TOWNSHIP 6 SOUTH, RANGE 17 EAST, W.M.

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order.
- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.

Use of water under authority of this permit may be regulated if analysis of data available after the permit is issued discloses that the appropriation will measurably reduce the surface water flows necessary

to maintain the free-flowing character of a scenic waterway in quantities necessary for recreation, fish and wildlife in effect as of the priority date of the right or as those quantities may be subsequently reduced.

Surface water shall not be appropriated to fill or maintain the reservoirs without a water right permitting the diversion of such surface water.

STANDARD CONDITIONS

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this permit, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

The wells shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Complete application of the water to the use shall be made on or before October 1, 2007. If the water is not completely applied before this date, and the permittee wishes to continue development under the permit, the permittee must submit an application for extension of time, which may be approved based upon the merit of the application.

Within one year after complete application of water to the proposed use, the permittee shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Rights Examiner (CWRE).

Issued February 20 , 2003

Paul R. Cleary, Director
Water Resources Department

REAL ESTATE TRANSACTIONS: Pursuant to ORS 537.330, in any transaction for the conveyance of real estate that includes any portion of the lands described in this permit, the seller of the real estate shall, upon accepting an offer to purchase that real estate, also inform the purchaser in writing whether any permit, transfer approval order, or certificate evidencing the water right is available and that the seller will deliver any permit, transfer approval order or certificate to the purchaser at closing, if the permit, transfer approval order or certificate is available.

CULTURAL RESOURCES PROTECTION LAWS: Permittees involved in ground-disturbing activities should be aware of federal and state cultural resources protection laws. ORS 358.920 prohibits the excavation, injury, destruction or alteration of an archeological site or object, or removal of archeological objects from public and private lands without an archeological permit issued by the State Historic Preservation Office. 16 USC 470, Section 106, National Historic Preservation Act of 1966 requires a federal agency, prior to any undertaking to take into account the effect of the undertaking that is included on or eligible for inclusion in the National Register. For further information, contact the State Historic Preservation Office at 503-378-4168, extension 232.
