

STATE OF OREGON

COUNTY OF MARION

PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

THOMAS DeARMOND

11463 BROADACRES RD NE
HUBBARD, OR 97032

503-981-0319

The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: G-16608

SOURCE OF WATER: WELL 3 IN SENECALE CREEK BASIN

PURPOSE OR USE: NURSERY USE ON 127.9 ACRES

MAXIMUM RATE: 3.2 CUBIC FEET PER SECOND

PERIOD OF USE: DECEMBER 1 THROUGH MAY 31

DATE OF PRIORITY: JANUARY 23, 2006

WELL LOCATION: WELL 3 - NE $\frac{1}{4}$ NE $\frac{1}{4}$, SECTION 31, T4S, R1W, W.M.; 200 FEET NORTH & 1130 FEET WEST FROM SE CORNER, DLC 59

The amount of water used for nursery use is limited to a maximum of 5.0 acre feet per acre and a diversion of 0.15 cubic foot per second per acre. For irrigation of containerized nursery plants, the amount of water diverted is limited to one fortieth of one cubic foot per second and 5.0 acre feet per acre per year. For irrigation of in-ground nursery plants the amount of water diverted is limited to one eightieth of one cubic foot per second and 2.5 acre feet per acre per year. The use of water for nursery use may be made at any time, during the period of allowed use specified above, that the use is beneficial. For irrigation of any other crop, the amount of water diverted is limited to one eightieth of one cubic foot per second and 2.5 acre feet per acre during the irrigation season of each year.

THE PLACE OF USE IS LOCATED AS FOLLOWS:

DLC 58	(NE $\frac{1}{4}$ SW $\frac{1}{4}$)	2.3 ACRES
DLC 58	(NW $\frac{1}{4}$ SW $\frac{1}{4}$)	23.1 ACRES
DLC 59	(NW $\frac{1}{4}$ SW $\frac{1}{4}$)	0.3 ACRES
DLC 58	(SW $\frac{1}{4}$ SW $\frac{1}{4}$)	6.9 ACRES
DLC 59	(SW $\frac{1}{4}$ SW $\frac{1}{4}$)	1.5 ACRES
LOT 3	(SW $\frac{1}{4}$ SW $\frac{1}{4}$)	11.6 ACRES

SECTION 29

THE PLACE OF USE IS LOCATED AS FOLLOWS (CONTINUED) :

DLC 58 (NE ¼ SE ¼) 1.4 ACRES
 DLC 59 (NE ¼ SE ¼) 4.0 ACRES
 DLC 59 (SW ¼ SE ¼) 4.6 ACRES
 DLC 59 (SE ¼ SE ¼) 35.5 ACRES

SECTION 30

DLC 59 (NE ¼ NE ¼) 24.0 ACRES
 DLC 59 (NW ¼ NE ¼) 10.7 ACRES

SECTION 31

LOT 2 (NW ¼ NW ¼) 1.7 ACRES
 DLC 59 (NW ¼ NW ¼) 0.3 ACRE

SECTION 32

TOWNSHIP 4 SOUTH, RANGE 1 WEST, W.M.

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a totalizing flow meter at each point of appropriation. The totalizing flow meter(s) must be installed and maintained in good working order consistent with those standards identified in OAR 690-507-645(1) through (3). The permittee shall keep a complete record of the amount of water used each month and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water use information, including the place and nature of use of water under the permit.
- B. The permittee shall allow the watermaster access to the meter(s); provided however, where any meter is located within a private structure, the watermaster shall request access upon reasonable notice.

The well shall produce groundwater only from the alluvial groundwater reservoir.

The use may be restricted if the quality of the source stream or downstream waters decrease to the point that those waters no longer meet existing state or federal water quality standards due to reduced flows.

- (1) Use of water from the well, as allowed herein, shall be controlled or shut off if the well displays:
 - (a) An average water level decline of three or more feet per year for five consecutive years; or

- (b) A total water level decline of fifteen or more feet; or
 - (c) A hydraulic interference decline of fifteen or more feet in any neighboring well providing water for senior exempt uses or wells covered by prior rights.
- (2) The water user shall be responsible for complying with each of the following requirements for measuring water levels in the well.
- (a) Use of water from a new well shall not begin until an initial static water level in the well has been measured and submitted to the Department.
 - (b) In addition to the measurement required in subsection (a) of this section, a water level measurement shall be made each year during the period March 1 through March 31.
 - (c) All water level measurements shall be made by a qualified individual. Qualified individuals are certified water rights examiners, registered geologists, registered professional engineers, licensed land surveyors, licensed water well driller, licensed pump installer, or the permittee / appropriator.
 - (d) Any qualified individual measuring a well shall use standard methods of procedure and equipment designed for the purpose of well measurement. The equipment used shall be well suited to the conditions of construction at the well. A list of standard methods of procedure and suitable equipment shall be available from the Department.
 - (e) The permittee/appropriator shall submit a record of the measurement to the Department on a form available from the Department. The record of measurement shall include both measurements and calculations, shall include a certification as to their accuracy signed by the individual making the measurements, and shall be submitted to the Department within 90 days from the date of measurement. The Department shall determine when any of the declines cited in section (1) are evidenced by the well measurement required in this section.

STANDARD CONDITIONS

If the number, location, source, or construction of any well deviates from that proposed in the permit application or required by permit conditions, this permit may not be valid, unless the Department authorizes the change in writing.

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this permit, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

The well shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times.

Where two or more water users agree among themselves as to the manner of rotation in the use of water and such agreement is placed in writing and filed by such water users with the watermaster, and such rotation system does not infringe upon such prior rights of any water user not a party to such rotation plan, the watermaster shall distribute the water according to such agreement.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

Completion of construction and complete application of the water to the use shall be made on or before October 1, 2011. If the water is not completely applied before this date, and the permittee wishes to continue development under the permit, the permittee must submit an application for extension of time, which may be approved based upon the merit of the application.

Within one year after complete application of water to the proposed use, the permittee shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Rights Examiner (CWRE).

Issued May 3, 2007

E. Timothy Wall for

Phillip C. Ward, Director
Water Resources Department
