

STATE OF OREGON

COUNTY OF WASCO

PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

D. PAUL SCHANNO JR.
DIXIE SCHANNO
82163 DUFUR VALLEY RD
THE DALLES, OR 97021

The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: G-16606

SOURCE OF WATER: WELL 1 AND WELL 2 IN SPRING BRANCH BASIN

PURPOSE OR USE: IRRIGATION USE ON 434.6 ACRES

MAXIMUM RATE: 5.0 CUBIC FEET PER SECOND

PERIOD OF USE: MARCH 1 THROUGH OCTOBER 31

DATE OF PRIORITY: JANUARY 24, 2006

WELL LOCATIONS:

WELL 1: SE $\frac{1}{4}$ NW $\frac{1}{4}$, SECTION 3, T1N, R14E, W.M.; 1420 FEET SOUTH & 1785 FEET EAST FROM NW CORNER, SECTION 3

WELL 2: SW $\frac{1}{4}$ NE $\frac{1}{4}$, SECTION 4, T1N, R14E, W.M.; 2405 FEET SOUTH & 1870 FEET WEST FROM NW CORNER, SECTION 3

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second and 3.0 acre-feet for each acre irrigated during the irrigation season of each year.

THE PLACE OF USE IS LOCATED AS FOLLOWS:

NE $\frac{1}{4}$ NE $\frac{1}{4}$ 1.4 ACRES
NW $\frac{1}{4}$ NE $\frac{1}{4}$ 31.8 ACRES
SW $\frac{1}{4}$ NE $\frac{1}{4}$ 40.0 ACRES
SE $\frac{1}{4}$ NE $\frac{1}{4}$ 34.6 ACRES
NE $\frac{1}{4}$ NW $\frac{1}{4}$ 40.0 ACRES
NW $\frac{1}{4}$ NW $\frac{1}{4}$ 33.2 ACRES
SW $\frac{1}{4}$ NW $\frac{1}{4}$ 40.0 ACRES
SE $\frac{1}{4}$ NW $\frac{1}{4}$ 40.0 ACRES
NE $\frac{1}{4}$ SW $\frac{1}{4}$ 18.2 ACRES
SECTION 3

THE PLACE OF USE (CONT.):

NW $\frac{1}{4}$ SW $\frac{1}{4}$ 13.0 ACRES
 NE $\frac{1}{4}$ SE $\frac{1}{4}$ 28.6 ACRES
 NW $\frac{1}{4}$ SE $\frac{1}{4}$ 23.4 ACRES
 SECTION 3

SW $\frac{1}{4}$ NE $\frac{1}{4}$ 40.0 ACRES
 SE $\frac{1}{4}$ NE $\frac{1}{4}$ 40.0 ACRES
 NE $\frac{1}{4}$ SE $\frac{1}{4}$ 7.8 ACRES
 NW $\frac{1}{4}$ SE $\frac{1}{4}$ 2.6 ACRES
 SECTION 4

TOWNSHIP 1 NORTH, RANGE 14 EAST, W.M.

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a totalizing flow meter or other suitable measuring device as approved by the Director at each point of appropriation. The permittee shall maintain the meter or measuring device in good working order, shall keep a complete record of the amount of water used each month, and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water-use information, including the place and nature of use of water under the permit.
- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.

The Department requires the water user to measure and report annual static water levels for each well on the permit. The static water level shall be measured in the month of March. Reports shall be submitted to the Department within 30 days of measurement.

The permittee shall submit an initial March static water-level measurement once well construction is complete and annual measurements thereafter. Annual measurements are required whether or not the well is used. The first annual measurement will establish a reference level against which future measurements will be compared. However, the Director may establish the reference level based on an analysis of other water-level data. The Director may require the user to measure and report additional water levels each year if more data are needed to evaluate the aquifer system.

All measurements shall be made by a certified water rights examiner, registered professional geologist, registered professional engineer,

licensed well constructor or pump installer licensed by the Construction Contractors Board. Measurements shall be submitted on forms provided by, or specified by, the Department. Measurements shall be made with equipment that is accurate to at least the standards specified in OAR 690-217-0045. The Department requires the individual performing the measurement to:

- A. Associate each measurement with an owner's well name or number and a Department well log ID; and
- B. Report water levels to at least the nearest tenth of a foot as depth-to-water below ground surface; and
- C. Specify the method of measurement; and
- D. Certify the accuracy of all measurements and calculations submitted to the Department.

The water user shall discontinue use of, or reduce the rate or volume of withdrawal from, the well(s) if any of the following events occur:

- A. Annual water-level measurements reveal an average water-level decline of three or more feet per year for five consecutive years; or
- B. Annual water-level measurements reveal a water-level decline of 15 or more feet in fewer than five consecutive years; or
- C. Annual water-level measurements reveal a water-level decline of 25 or more feet; or
- D. Hydraulic interference leads to a decline of 25 or more feet in any neighboring well with senior priority.

The period of restricted use shall continue until the water level rises above the decline level which triggered the action or the Department determines, based on the permittee's and/or the Department's data and analysis, that no action is necessary because the aquifer in question can sustain the observed declines without adversely impacting the resource or causing substantial interference with senior water rights. The water user shall not allow excessive decline, as defined in Commission rules, to occur within the aquifer as a result of use under this permit. If more than one well is involved, the water user may submit an alternative measurement and reporting plan for review and approval by the Department.

WELL CONSTRUCTION CONDITIONS

Well 1 shall be continuously cased and continuously sealed to a minimum depth of 425 feet below land surface. **Well 2** shall be continuously cased and continuously sealed to a minimum depth of 230 feet below land surface. The wells shall produce ground water only from the basalt ground water reservoir; the wells may not be completed such that they allow ground water to be produced from the Dalles Formation. If during well construction, it becomes apparent that the wells can be constructed to eliminate interference with nearby shallow wells or hydraulically connected streams in a manner other than specified in this permit, the

permittee can contact the Department Hydrogeologist for this permit or the Ground Water/Hydrology Section Manager to request approval of such construction. The request shall be in writing, and shall include a rough well log and a proposed construction design for approval by the Department. The request can be approved only if it is received and reviewed prior to placement of any permanent casing and sealing material. If the well is constructed first and then the request made, requested modification will not be approved. The new well depth and construction specifications will be incorporated into any certificate issued for this permit.

STANDARD CONDITIONS

If the number, location, source, or construction of any well deviates from that proposed in the permit application or required by permit conditions, this permit may not be valid, unless the Department authorizes the change in writing.

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this permit, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

The wells shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times.

Where two or more water users agree among themselves as to the manner of rotation in the use of water and such agreement is placed in writing and filed by such water users with the watermaster, and such rotation system does not infringe upon such prior rights of any water user not a party to such rotation plan, the watermaster shall distribute the water according to such agreement.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

Completion of construction and complete application of the water to the use shall be made on or before October 1, 2011. If the water is not completely applied before this date, and the permittee wishes to continue development under the permit, the permittee must submit an application for extension of time, which may be approved based upon the merit of the application.

Within one year after complete application of water to the proposed use, the permittee shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Rights Examiner (CWRE).

Issued September 13, 2007

Phillip C. Ward, Director
Water Resources Department
