

STATE OF OREGON

COUNTY OF LAKE

PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

SAM FARR
S & F LAND AND CATTLE CO LLC
92603 DOG LAKE LANE
LAKEVIEW, OR 97630

The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: G-17167

SOURCE OF WATER: WELL 1 AND WELL 2 IN TWENTYMILE CREEK BASIN

PURPOSE OR USE: SUPPLEMENTAL IRRIGATION OF 320.0 ACRES

MAXIMUM RATE: 2.8 CUBIC FEET PER SECOND

PERIOD OF USE: MARCH 1 THROUGH OCTOBER 31

DATE OF PRIORITY: JANUARY 21, 2009

WELL LOCATIONS:

WELL 1: NW $\frac{1}{4}$ SW $\frac{1}{4}$, SECTION 19, T39S, R25E, W.M.; 860 FEET SOUTH AND 100 FEET EAST FROM W1/4 CORNER, SECTION 19

WELL 2: SE $\frac{1}{4}$ SE $\frac{1}{4}$, SECTION 19, T39S, R25E, W.M.; 100 FEET NORTH AND 350 FEET WEST FROM SE CORNER, SECTION 19

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second and 3.0 acre-feet for each acre irrigated during the irrigation season of each year.

THE PLACE OF USE IS LOCATED AS FOLLOWS:

SW $\frac{1}{4}$ NE $\frac{1}{4}$	2.31 ACRES
SE $\frac{1}{4}$ NE $\frac{1}{4}$	1.65 ACRES
NE $\frac{1}{4}$ SW $\frac{1}{4}$	3.47 ACRES
SE $\frac{1}{4}$ SW $\frac{1}{4}$	3.31 ACRES
NE $\frac{1}{4}$ SE $\frac{1}{4}$	35.06 ACRES
NW $\frac{1}{4}$ SE $\frac{1}{4}$	37.66 ACRES

SW ¼ SE ¼ 37.39 ACRES
SE ¼ SE ¼ 34.57 ACRES
SECTION 19

NW ¼ SW ¼ 0.61 ACRE
SW ¼ SW ¼ 0.56 ACRE
SECTION 20

NE ¼ NE ¼ 18.37 ACRES
NW ¼ NE ¼ 34.76 ACRES
SW ¼ NE ¼ 40.0 ACRES
SE ¼ NE ¼ 28.97 ACRES
NE ¼ NW ¼ 6.99 ACRES
SE ¼ NW ¼ 15.73 ACRES
NE ¼ SW ¼ 0.63 ACRE
NE ¼ SE ¼ 4.75 ACRES
NW ¼ SE ¼ 13.21 ACRES
SECTION 30

TOWNSHIP 39 SOUTH, RANGE 25 EAST, W.M.

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a totalizing flow meter or other suitable measuring device as approved by the Director at each point of appropriation. The permittee shall maintain the meter or measuring device in good working order.
- B. The permittee shall keep a complete record of the amount of water diverted each month, and shall submit a report which includes the recorded water-use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water-use information, including the place and nature of use of water under the permit.
- C. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where any meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
- D. The Director may provide an opportunity for the permittee to submit alternative measuring and reporting procedures for review and approval.

The well(s) shall be continuously cased and continuously sealed to a minimum depth of 190 feet below land surface. The well(s) may not be completed in such a manner to allow ground water to be developed from an unconfined aquifer. If during well construction, it becomes apparent

that the well can be constructed to eliminate interference with nearby shallow wells or hydraulically connected streams in a manner other than specified in this permit, the permittee can contact the Department Hydrogeologist for this permit or the Ground Water/Hydrology Section Manager to request approval of such construction. The request shall be in writing, and shall include a rough well log and a proposed construction design for approval by the Department. The request can be approved only if it is received and reviewed prior to placement of any permanent casing and sealing material. If the well is constructed first and then the request made, the requested modification will not be approved. If approved, the new well depth and construction specifications will be incorporated into any certificate issued for this permit.

Prior to using water from any well listed on this permit, the permittee shall ensure that the well has been assigned an OWRD Well Identification Number (Well ID tag), which shall be permanently attached to the well. The Well ID shall be used as a reference in any correspondence regarding the well, including any reports of water use, water level, or pump test data.

STANDARD CONDITIONS

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

If the number, location, source, or construction of any well deviates from that proposed in the permit application or required by permit conditions, this permit may be subject to cancellation, unless the Department authorizes the change in writing.

If substantial interference with surface water or a senior water right occurs due to withdrawal of water from any well listed on this permit, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

The well(s) shall be constructed and maintained in accordance with the General Standards for the Construction and Maintenance of Water Supply Wells in Oregon. The works shall be equipped with a usable access port adequate to determine water-level elevation in the well at all times.

If the riparian area is disturbed in the process of developing a point of appropriation, the permittee shall be responsible for restoration and enhancement of such riparian area in accordance with ODFW's Fish and Wildlife Habitat Mitigation Policy OAR 635-415. For purposes of

mitigation, the ODFW Fish and Wildlife Habitat Mitigation Goals and Standards, OAR 635-415, shall be followed.

The use may be restricted if the quality of downstream waters decreases to the point that those waters no longer meet state or federal water quality standards due to reduced flows.

Where two or more water users agree among themselves as to the manner of rotation in the use of water and such agreement is placed in writing and filed by such water users with the watermaster, and such rotation system does not infringe upon such prior rights of any water user not a party to such rotation plan, the watermaster shall distribute the water according to such agreement.

Prior to receiving a certificate of water right, the permit holder shall submit to the Water Resources Department the results of a pump test meeting the Department's standards for each point of appropriation (well), unless an exemption has been obtained in writing under OAR 690-217. The Director may require water-level or pump-test data every ten years thereafter.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

Completion of construction and application of the water shall be made within five years of the date of permit issuance. If beneficial use of permitted water has not been made before this date, the permittee may submit an application for extension of time, which may be approved based upon the merit of the application.

Within one year after making beneficial use of water, the permittee shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Rights Examiner.

Issued May 1, 2014

E. Timothy Wallin, Water Rights Program Manager
for Phillip C. Ward, Director
