

STATE OF OREGON
 COUNTY OF DESCHUTES

PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

SUNRIVER WATER LLC
 P.O. BOX 3699
 SUNRIVER, OR 97707

(541)593-4643

This superseding permit is issued to describe amendments for additional points of appropriation and change in the place of use proposed under Permit Amendment Application T-11650, approved by Special Order Vol. 93, Page ~~255~~ entered November 24, 2014, and to describe an amendment for additional points of appropriation approved by Special Order Vol. 65, Page 333, to describe amendments to change the place of use approved by Special order Vol. 71, Page 510, and to describe an extension of time for complete application of water approved April 28, 2005 and the Water Management and Conservation Plan evidenced by Special Order Vol. 91 Page 387. This permit supersedes Permit G-13249.

To use the waters of WELL 2, WELL 9, WELL 12 , WELL 12A, and WELL 16 in the DESCHUTES RIVER BASIN for QUASI-MUNICIPAL WATER USE INCLUDING IRRIGATION OF 749.9 ACRES.

This permit is issued to supersede Permit G-11598 Application G-11627. The date of priority is NOVEMBER 12, 1987, FOR 3200 GALLONS PER MINUTE (GPM) AND DECEMBER 8, 1992, FOR 500 GPM. The use is limited to not more than 3700 GPM: BEING 1700 GPM FOR GROUP DOMESTIC AND 1250 GPM FOR IRRIGATION or its equivalent in case of rotation, measured at the wells.

The wells are located as follows:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
19 S	11 E	WM	29	NE NE	WELL#9: 1200 FEET SOUTH AND 70 FEET WEST FROM THE NE CORNER OF SECTION 8
19 S	11 E	WM	32	SW SW	WELL#2: 1070 FEET NORTH AND 1300 FEET EAST FROM THE SW CORNER OF SECTION 32
20 S	11 E	WM	5	NE NE	WELL#16: 890 FEET SOUTH AND 352 FEET WEST FROM THE NE CORNER OF SECTION 5
20 S	11 E	WM	5	NE NE	WELL 12A(aka WELL 14): 875 FEET SOUTH AND 340 FEET WEST FROM THE NE CORNER OF SECTION 5

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
20 S	11 E	WM	8	NW NW	WELL#12: 420 FEET SOUTH AND 200 FEET WEST FROM THE NE CORNER OF SECTION 8

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE_EIGHTIETH of one cubic foot per second (or its equivalent) and 3.0 acre-feet for each acre irrigated during the irrigation season of each year. This right is limited to any deficiency in the available supply of any prior right existing for the same land.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the proposed place of use under this permit is as follows:

QUASI-MUNICIPAL
WITHIN THE SERVICE BOUNDRIES OF SUNRIVER WATER LLC

Total					749.90

The adequacy of the construction of Well 12 shall be approved by the Groundwater Hydrology Section of the Water Resources Department before water is appropriated from the well. The well shall be constructed to develop water from an aquifer greater than 70 feet in depth from land surface so that the proposed groundwater use will not have the potential for substantial interference with the Deschutes River.

The Permittee shall develop a plan to monitor and report:

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order, shall keep a complete record of the amount of water used each month and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water use information, including the place and nature of use of water under the permit.

- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.

STANDARD CONDITIONS

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this permit, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

The wells shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Complete application of the water to the use shall be made on or before October 1, 2008. If the water is not completely applied before this date, and the permittee wishes to continue development under the permit, the permittee must submit an application for extension of time, which may be approved based upon the merit of the application.

Within one year after complete application of water to the proposed use, the permittee shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Rights Examiner (CWRE).

Issued November 21st, 2014

Dwight French, Water Right Services Administrator, for
Thomas M. Byler, Director
Oregon Water Resources Department
