

STATE OF OREGON
COUNTY OF DESCHUTES

PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

DAVENPORT NEWBERRY HOLDINGS LLC
4010 STONE WAY N. SUITE 400
SEATTLE, WA 98103

This superseding permit is issued to describe an amendment for a point of appropriation a change in place of use and the correction of a scrivener's error proposed under Permit Amendment Application T-11873 and approved by Special Order Vol. 93, Page ~~868~~, entered Nov. 25, 2014. This permit supersedes Permit G-17032.

The specific limits for the use are listed below along with conditions of use.

APPLICATION FILE NUMBER: G-13711

SOURCE OF WATER: SIX (6) WELLS WITHIN THE PAULINA CREEK BASIN

PURPOSE OR USE: INDUSTRIAL USE

QUANTITY: 3.56 CUBIC FEET PER SECOND

PERIOD OF ALLOWED USE: YEAR ROUND

DATE OF PRIORITY: JUNE 10, 1994

POINTS OF DIVERSION LOCATION:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
21 S	12 E	WM	21	NE SW	WELL 1 (DESC 10060) - 1895 FEET NORTH AND 1795 FEET EAST FROM THE SW CORNER OF SECTION 21
21 S	12 E	WM	21	SE SE	WELL 2 - 4620 FEET SOUTH AND 4620 FEET EAST FROM THE NW CORNER OF SECTION 21
21 S	12 E	WM	28	NE NW	WELL 3 - 4620 FEET NORTH AND 1980 FEET EAST FROM THE SW CORNER OF SECTION 28
21 S	12 E	WM	16	NW SE	WELL 4 - 1980 FEET NORTH AND 3300 FEET EAST FROM THE SW CORNER OF SECTION 16
21 S	12 E	WM	20	SE NE	WELL 5 - 1980 FEET SOUTH AND 660 FEET WEST FROM THE NE CORNER OF SECTION 20
21 S	12 E	WM	29	SW NE	WELL 6 - 2065 FEET SOUTH AND 1710 FEET WEST FROM THE NE CORNER OF SECTION 29

THE PLACE OF USE IS LOCATED AS FOLLOWS:

INDUSTRIAL USE				
Twp	Rng	Mer	Sec	Q-Q
21 S	12 E	WM	11	SE SW
21 S	12 E	WM	14	NE NW
21 S	12 E	WM	14	SW NW

22 S	12 E	WM	4	NE NW
22 S	12 E	WM	4	NE SW
22 S	12 E	WM	9	SE NW

Permit Amendment T-11873 Conditions

The combined quantity of water diverted at the new point of appropriation, together with that diverted at the old points of appropriation, shall not exceed the quantity of water lawfully available at the original point of appropriation.

Water use measurement conditions:

- a) Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device at each point of appropriation (new and existing).
- b) The water user shall maintain the meters or measuring devices in good working order.
- c) The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.

Water shall be acquired from the same aquifer as the original point of appropriation.

Previous Permit Conditions:

The quantity of water diverted at Well 1 shall not exceed the quantity of water lawfully available at the original point of appropriation of Well 1.

Water from Well 1 shall be acquired from the same aquifer as the original point of appropriation of Well 1.

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order, shall keep a complete record of the amount of water used each month and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water use information, including the place and nature of use of water under the permit.
- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.

This use may be regulated if analysis of data available after the permit or certificate is issued discloses that the appropriation will measurably reduce the surface water flows necessary to maintain the free-flowing character of a scenic waterway in quantities necessary for recreation, fish and wildlife in effect as of the priority date of the right or as those quantities may be subsequently reduced.

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this permit, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

The water user shall develop a plan to monitor and report the impact of water use under this permit on water levels within the aquifer that provides water to the permitted well(s). The plan shall be submitted to the Department within one year of the date the permit is issued and shall be subject to the approval of the Department. At a minimum, the plan shall include a program to periodically measure static water levels within the permitted well(s) or an adequate substitute such as water levels in nearby wells. The plan shall also stipulate a reference water level against which any water-level declines will be compared. If a well listed on this permit (or replacement well) displays a total static water-level decline of 25 or more feet over any period of years, as compared to the reference level, then the water user shall discontinue use of, or reduce the rate or volume of withdrawal from, the well(s). Such action shall be taken until the water level recovers to above the 25-foot decline level or until the Department determines, based on the water user's and/or the Department's data and analysis, that no action is necessary because the aquifer in question can sustain the observed declines without adversely impacting the resource or senior water rights. The water user shall in no instance allow excessive decline, as defined in Commission rules, to occur within the aquifer as a result of use under this permit.

STANDARD CONDITIONS

The wells shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

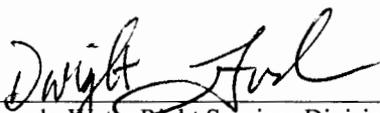

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Actual construction of the well shall begin within one year from permit issuance and shall be completed on or before October 1, 2015. Complete application of the water to the use shall be made on or before October 1, 2015.

Issued Nov. 25, 2014

Dwight French, Water Right Services Division Administrator, for
Thomas M. Byler, Director
Oregon Water Resources Department
