

STATE OF OREGON  
COUNTY OF MORROW

PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

TIMOTHY HELLBERG  
81300 W 6TH  
IRRIGON OR 97844

TRINA HELLBERG MILES  
DARRELL MILES  
242309 E TIERNEY PR SE  
KENNEWICK WA 99337

**This superseding permit is issued to describe an amendment for an additional point of appropriation proposed under Permit Amendment Application T-11452 and approved by Special Order Vol. 103, Page 714, entered January 9, 2017, and to describe an extension of time for complete application of water approved October 24, 2014. This permit supersedes Permit G-16366.**

The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: G-16816

SOURCE OF WATER: TWO WELLS WITHIN THE COLUMBIA RIVER BASIN

PURPOSE OR USE: IRRIGATION USE ON 22.8 ACRES AND TEMPERATURE CONTROL

MAXIMUM RATE: 0.438 CUBIC FOOT PER SECOND (CFS), BEING NO MORE THAN 0.28 CFS FOR IRRIGATION

PERIOD OF USE: MARCH 1 THROUGH OCTOBER 31

DATE OF PRIORITY: MARCH 16, 2007

**AUTHORIZED POINTS OF APPROPRIATION:**

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
5 N	26 E	WM	26	SE NE	WELL 1 - (MORR 1237) 220 FEET SOUTH AND 330 FEET WEST FROM THE NE CORNER OF THE SENE OF SECTION 26
5 N	26 E	WM	26	SE NW	WELL 2 - (MORR 1234) 1610 FEET SOUTH AND 70 FEET WEST FROM THE N1/4 CORNER OF SECTION 26

The amount of water used for irrigation under this right, together with the amount secured under Application G-16816/T-11452.sah Water Resources Department PERMIT G-17548

any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second and 3.0 acre-feet for each acre irrigated during the irrigation season of each year.

**AUTHORIZED PLACE OF USE:**

IRRIGATION AND TEMPERATURE CONTROL						
Twp	Rng	Mer	Sec	Q-Q	Acres	Well
5 N	26 E	WM	26	SW NE	3.8	Well 2
5 N	26 E	WM	26	SE NE	13.8	Well 2
5 N	26 E	WM	26	SE NE	5.2	Well 1

Permit Amendment T-11452 Conditions:

The combined quantity of water diverted at the new point of appropriation, together with that diverted at the old point of appropriation, shall not exceed the quantity of water lawfully available at the original point of appropriation.

Water shall be acquired from the same aquifer as the original point of appropriation.

Original Permit Conditions:

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a totalizing flow meter or other suitable measuring device as approved by the Director at each point of appropriation. The permittee shall maintain the meter or measuring device in good working order, shall keep a complete record of the amount of water used each month and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water use information, including the place and nature of use of water under the permit.
- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.

The wells shall produce groundwater only from the alluvial groundwater reservoir.

**STANDARD CONDITIONS**

Failure to comply with any of the provisions of this permit may result in action, including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

If the number, location, source, or construction of any well deviates from that proposed in the permit application or required by permit conditions, this permit may not be valid, unless the Department authorizes the change in writing.

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this permit, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences

The wells shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times.

If riparian area is disturbed in the process of developing a point of diversion, the permittee shall be responsible for restoration and enhancement of such riparian area in accordance with ODFW's Fish and Wildlife Habitat Mitigation Policy OAR 635-415. For purposes of mitigation, the ODFW Fish and Wildlife Habitat Mitigation Goals and Standards, OAR Chapter 635, Division 415, section 030 adopted November 13, 1991 shall be followed.

The use may be restricted if the quality of the source stream or downstream waters decrease to the point that those waters no longer meet existing state or federal water quality standards due to reduced flows.

When two or more water users agree among themselves as to the manner of rotation in the use of water and such agreement is placed in writing and filed by such water users with the watermaster, and such rotation system does not infringe upon such prior rights of any water user not a party to such rotation plan, the watermaster shall distribute the water according to such agreement.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

Completion of construction and complete application of the water to the use was to be made on or before October 1, 2012. By Extension of Time Final Order issued October 24, 2014, the completion of construction and complete application of the water to the use was extended to October 1, 2017. If the water is not completely applied before this date, and the permittee wishes to continue development under the permit, the permittee must submit an application for extension of time, which may be approved based upon the merit of the application.

Within one year after complete application of water to the proposed use, the permittee shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Right Examiner (CWRE).
