

STATE OF OREGON

COUNTY OF YAMHILL

PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

DOMAINE DROUHIN OREGON
PO BOX 700
DUNDEE, OREGON 97115

This superseding permit is issued to describe an amendment for a change in place of use proposed under Permit Amendment Application T-12506 and approved by Special Order Vol. 10-1, Page 63, entered APR 27 2017, and to describe an extension of time for complete application of water approved May 20, 2014 and an assignment to a new permittee approved January 6, 2014. This permit supersedes Permit G-12080.

to use the waters of WELLS 1 AND 2 in the WILLAMETTE BASIN for IRRIGATION of 1.3 ACRES, DEFICIENCY OF RATE FOR IRRIGATION USE ON 143.4 ACRES UNDER PERMIT G-11362, AND INDUSTRIAL USE.

This Permit is issued approving Application G-12684. The date of priority is October 1, 1991. The use is limited to not more than 1.8 CUBIC FOOT PER SECOND (CFS), BEING FURTHER LIMITED TO NOT MORE THAN 0.122 CFS FOR INDUSTRIAL USE, or its equivalent in case of rotation, measured at the well.

The wells are located as follows:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
3 S	3 W	WM	34	SW SW	WELL 1 - 1450 FEET SOUTH AND 215 FEET WEST FROM THE SE CORNER OF DLC 55
4 S	3 W	WM	3	NW NW	WELL 2 - 290 FEET SOUTH AND 685 FEET EAST FROM THE NW CORNER OF SECTION 3

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 2.5 acre-feet for each acre irrigated during the irrigation season of each year. The period of use allowed for irrigation is April 1 through October 31.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

This right is limited to any deficiency in the available supply of any prior right existing for the same land.

A description of the proposed place of use under this permit is as follows:

IRRIGATION					
Twp	Rng	Mer	Sec	Q-Q	Acres
3 S	3 W	WM	33	SE NE	4.4
3 S	3 W	WM	33	NE SW	3.5
3 S	3 W	WM	33	NE SE	29.8
3 S	3 W	WM	33	NW SE	22.5
3 S	3 W	WM	33	SE SE	21.0
3 S	3 W	WM	34	SW NW	1.5
3 S	3 W	WM	34	NW SW	14.9
3 S	3 W	WM	34	SW SW	25.7
3 S	3 W	WM	34	SE SW	13.8
4 S	3 W	WM	3	NW NW	2.4
4 S	3 W	WM	4	NE NE	5.2
Total					144.7

INDUSTRIAL				
Twp	Rng	Mer	Sec	Q-Q
3 S	3 W	WM	33	NE SE

The well shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times.

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order, shall keep a complete record of the amount of water used each month, and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water-use information, including the place and nature of use of water under the permit.
- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.

In the event of a request for a change in point of appropriation, an additional point of appropriation or alteration of the appropriation facility associated with this authorized diversion, the quantity of water allowed herein, together with any other right, shall not exceed the capacity of the facility at the time of perfection of this right.

The PERMITTEE shall obtain a static water-level measurement for each well during MARCH of each year and report the measurement to the Department within thirty days. The measurement shall be made by a certified water-rights examiner, registered professional geologist, certified engineering geologist, professional engineer, licensed well constructor or pump installer licensed by the Construction Contractors Board, licensed land surveyor or the permittee/appropriator. Water levels shall be reported as depth-to-water below ground level and shall be accompanied by supporting calculations. Reports and calculations shall be provided to the Department on forms provided by the Department and shall be certified as to their accuracy by the individual making the measurements. If a well listed on this permit displays a total static water-level decline of 25 or more feet over any period of years, as compared to the reference level, then the PERMITTEE shall discontinue use of, or reduce the rate or volume of withdrawal from, the well(s). Such action shall be taken until the water level recovers to above the 25-foot decline level or until the Department determines, based on the PERMITTEE'S or the Department's data and analysis, that no action is necessary because the aquifer in question can sustain the observed declines without adversely impacting the resource or senior water rights. The reference level for water-level declines shall be the second annual measurement taken after water use begins under the terms of this permit. The PERMITTEE shall in no instance allow excessive decline to occur with the aquifer as a result of use under this permit.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Actual construction work shall begin on or before June 26, 1996, and shall be completed on or before October 1, 1997. By Extension of Time Final Order dated July 25, 2014 the completion of the application of water was extended to on or before October 1, 2022.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface of ground water rights.

The Director of Water Resources Department has found that the proposed use of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Issued this date, April 27, 2017, 2017

Dwight French, Water Right Services Administrator, for
Thomas M. Byler, Director
Oregon Water Resources Department
