

STATE OF OREGON
COUNTY OF DESCHUTES
PERMIT TO APPROPRIATE THE PUBLIC WATERS

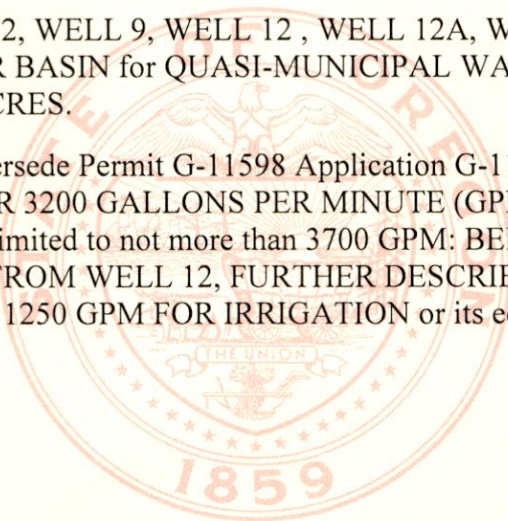

THIS PERMIT IS HEREBY ISSUED TO

SUNRIVER WATER, LLC
P.O. BOX 3699
SUNRIVER, OR 97707

This superseding permit is issued to describe an amendment for an additional point of appropriation proposed under Permit Amendment Application T-12576, approved by Special Order Vol. 107, Page 107, entered April 5, 2018, to describe an amendment for additional points of appropriation proposed by Permit Amendment Application T-9730, approved to describe a change the place of use approved by Permit Amendment Application T-10106 and approved by Special Order Vol. 71, Page 510, and to describe amendments for additional points of appropriation and to change the place of use proposed by Permit Amendment Application T-11650, to describe an extension of time for complete application of water approved April 28, 2005 and to describe the Water Management and Conservation Plan evidenced by Special Order Vol. 91 Page 387. This permit supersedes Permit G-17288.

To use the waters of WELL 2, WELL 9, WELL 12, WELL 12A, WELL 16 and NORTH WELL in the DESCHUTES RIVER BASIN for QUASI-MUNICIPAL WATER USE INCLUDING IRRIGATION OF 749.9 ACRES.

This permit is issued to supersede Permit G-11598 Application G-11627. The date of priority is NOVEMBER 12, 1987, FOR 3200 GALLONS PER MINUTE (GPM) AND DECEMBER 8, 1992, FOR 500 GPM. The use is limited to not more than 3700 GPM: BEING 1700 GPM FROM WELL 9 AND 2000 GPM FROM WELL 12, FURTHER DESCRIBED AS BEING 2450 FOR GROUP DOMESTIC AND 1250 GPM FOR IRRIGATION or its equivalent in case of rotation, measured at the wells.

The wells are located as follows:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
19 S	11 E	WM	29	NE NE	WELL 9 - 1200 FEET SOUTH AND 70 FEET WEST FROM THE NE CORNER OF SECTION 8
19 S	11 E	WM	32	SW SW	WELL 2 - 1070 FEET NORTH AND 1300 FEET EAST FROM THE SW CORNER OF SECTION 32
19 S	11 E	WM	33	NE NE	NORTH WELL - 465 FEET SOUTH AND 4457 FEET EAST FROM THE NW CORNER OF SECTION 33
20 S	11 E	WM	5	NE NE	WELL 16 - 890 FEET SOUTH AND 352 FEET WEST FROM THE NE CORNER OF SECTION 5
20 S	11 E	WM	5	NE NE	WELL 12A (WELL 14): 875 FEET SOUTH AND 340 FEET WEST FROM THE NE CORNER OF SECTION 5
20 S	11 E	WM	8	NW NW	WELL 12 - 420 FEET SOUTH AND 200 FEET WEST FROM THE NE CORNER OF SECTION 8

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to a diversion of ONE-EIGHTIETH of one cubic foot per second (or its equivalent) and 3.0 acre-feet for each acre irrigated during the irrigation season of each year. This right is limited to any deficiency in the available supply of any prior right existing for the same land.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

A description of the proposed place of use under this permit is as follows:

QUASI-MUNICIPAL
WITHIN THE SERVICE BOUNDRIES OF SUNRIVER WATER LLC

Total					749.9

The adequacy of the construction of Well 12 shall be approved by the Groundwater Hydrology Section of the Water Resources Department before water is appropriated from the well. The well shall be constructed to develop water from an aquifer greater than 70 feet in depth from land surface so that the proposed groundwater use will not have the potential for substantial interference with the Deschutes River.

Permit Amendment T-9730 Conditions

1. The combined quantity of water diverted at the new point of appropriation (well), together with that diverted at the old point of appropriation, shall not exceed the maximum rate and duty allowed under Permit G-13249
2. Prior to water use from the proposed points of appropriation the water user shall install and maintain a headgate, an in-line flow meter, weir, or other suitable device for

measuring and recording the quantity of water diverted. The type and plans of the headgate and measuring device must be approved by the Department prior to beginning construction and shall be installed under the general supervision of the Department.

3. Water shall be acquired from the same aquifer as the original point of appropriation.
4. The former place of use shall no longer be irrigated as part of this permit.

Permit Amendment T-10106 Conditions

1. Prior to water use from the proposed points of appropriation the water user shall install meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order, and shall keep a complete record of the amount of water used each month and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water use information, including the place and nature of use of water under the permit.

The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.

Permit Amendment T-11650 Conditions

1. The combined quantity of water diverted at the new points of appropriation, together with that diverted at the old points of appropriation, shall not exceed the quantity of water lawfully available at the original points of appropriation.
2. Water use measurement conditions:
 - a) Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device at each point of appropriation new and existing.
 - b) The water user shall maintain the meters or measuring devices in good working order.
 - c) The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meter or measuring device is located within a private structure, the Watermaster shall request access upon reasonable notice.
3. Water shall be acquired from the same aquifer as the original points of appropriation.

Permit Amendment T-12576 Conditions

1. The combined quantity of water diverted at the new point of appropriation, together with that diverted at the old points of appropriation, shall not exceed the quantity of water lawfully available at the original points of appropriation.
2. Water shall be acquired from the same aquifer as the original points of appropriation.

The Permittee shall develop a plan to monitor and report:

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order, shall keep a complete record of the amount of water used each month and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water use information, including the place and nature of use of water under the permit.
- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.

The Sunriver Utilities Company shall develop a plan to monitor and report the impact of water use under this permit on water levels within the aquifer that provides water to the permitted wells. The plan shall be submitted to the Department within one year of the date the permit is issued and shall be subject to the approval of the Department. At a minimum, the plan shall include a program to periodically measure static water levels within the permitted wells or an adequate substitute such as water levels in nearby wells. The plan shall also stipulate a reference water level against which any water-level declines will be compared. If a well listed on this permit displays a total static water-level decline of 25 or more feet over any period of years, as compared to the reference level, then the Sunriver Utilities Company shall discontinue use of, or reduce the rate or volume of withdrawal from, the wells. Such action shall be taken until the water level recovers to above the 25-foot decline level or until the Department determines, based on the Sunriver Utilities Company or the Department's data and analysis, that no action is necessary because the aquifer in question can sustain the observed declines without adversely impacting the resource or senior water rights. The Sunriver Utilities Company shall in no instance allow excessive decline to occur within the aquifer as a result of use under this permit.

Within one year from the date the Water Resources Commission adopts rules describing the schedules, standards and procedures for water conservation management plans by water suppliers, Sunriver Utilities Company shall submit a plan which is consistent with said rules.

The well shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times. When required by the department, the permittee shall install and maintain a weir, meter, or other suitable measuring device, and shall keep a complete record of the amount of ground water withdrawn.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Actual construction work was to begin on or before December 23, 1993, and was to be completed on or before October 1, 1998. Complete application of the water was to be made on or before October 1, 1998. By Extension of Time Final Order dated April 28, 2005 the completion of construction was extended to October 1, 2033 and complete application of the water was extended to October 1, 2034.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for beneficial use of water without waste. The water user is advised that new regulations may require use of best practical technologies or conservation practices to achieve this end.

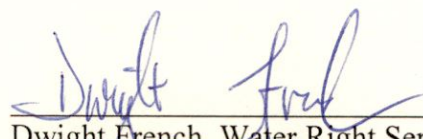

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The Director finds that the proposed uses of water described by this permit, as conditioned, would not impair or be detrimental to the public interest.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

Permit G-13249 was issued to describe the use of water as amended by Special Order issued by the Director on April 7, 1994, recorded in Volume 48, Page 151, and to assert that the place of use allowed herein, in accordance with, and subject to, the provisions of ORS 540.510 (3)(a)& (b), shall include NE 1/4 SE 1/4 and SE 1/4 SE 1/4, Section 18, Township 20 South, Range 11 East, W.M. as requested by the applicant's agent on December 23, 1996. No other changes to the water right described by Permit G-11598 were contemplated by the issuance of this document. Permit G-11598 issued December 23, 1992 was superseded by permit G-13249 and is no longer valid.

Issued APR 05 2018

Dwight French, Water Right Services Administrator, for
Thomas M. Byler, Director
Oregon Water Resources Department
