Permit Amendment T-12637 Conditions

The combined quantity of water diverted at the new point of appropriation (UPPER WELL), together with that diverted at the old points of appropriation (Wells A and B), shall not exceed the quantity of water lawfully available at the original points of appropriation (Wells A and B).

Water shall be acquired from the same aquifer as the original points of appropriation (Wells A and B).

Water use measurement conditions:

- a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at the new point of appropriation.
- b. The water user shall maintain the meters or measuring device in good working order.
- c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.

STANDARD CONDITIONS

The well shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level evaluation in the well at all times. When required by the department, the permittee shall install and maintain a weir, meter, or other suitable measuring device, and shall keep a complete record of the amount of ground water withdrawn.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

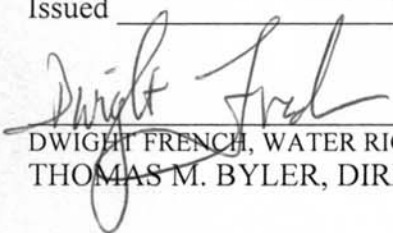

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The original permit was issued June 24, 1991. Actual construction work was to begin on or before June 24, 1992, complete application of the water was to be made on or before October 1, 1993. By Extension of Time Final order dated April 26, 2013, the deadline for completing construction and for complete application of water to use was extended to October 1, 2020.

Within one year after complete application of water to the proposed use, the permittee shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Right Examiner (CWRE).
