

STATE OF OREGON

COUNTY OF BAKER

PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

CITY OF BAKER CITY
PO BOX 650
BAKER CITY, OR 97814

This superseding permit is issued to describe an amendment for additional points of appropriation proposed under Permit Amendment Application T-12979 and approved by Special Order Vol. 112, Page 113, entered March 18, 2019. This permit supersedes Permit G-17476.

The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: G-17741

SOURCE OF WATER: WELL 2, RESERVOIR WELL, GOLF COURSE 1, GOLF COURSE 2, GOLF COURSE 3, BRIDGE 1, BRIDGE 2, AND BRIDGE 3 IN OLD SETTLERS SLOUGH BASIN

PURPOSE OR USE: MUNICIPAL USE

RATE OF USE: 2.23 CUBIC FEET PER SECOND

PERIOD OF ALLOWED USE: YEAR-ROUND

DATE OF PRIORITY: DECEMBER 6, 2013

WELL LOCATIONS:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
9 S	40 E	WM	18	SE SE	WELL 2 (original) - 760 FEET NORTH AND 900 FEET WEST FROM THE SE CORNER OF SECTION 18
9 S	40 E	WM	19	NW SE	RESERVOIR WELL - 200 FEET SOUTH AND 700 FEET WEST FROM THE SE CORNER OF SW 1/4 NE 1/4 OF SECTION 19
9 S	40 E	WM	20	NW SE	GOLF COURSE 3 - 67 FEET SOUTH AND 150 FEET EAST FROM THE C1/4 CORNER OF SECTION 20
9 S	40 E	WM	20	NE SW	GOLF COURSE 1 - 51 FEET SOUTH AND 464 FEET WEST FROM THE C1/4 CORNER OF SECTION 20
9 S	40 E	WM	20	NW SE	GOLF COURSE 2 - 64 FEET SOUTH AND 21 FEET EAST FROM THE C1/4 CORNER OF SECTION 20
9 S	40 E	WM	21	NW SE	BRIDGE 2 - 20 FEET SOUTH AND 100 FEET EAST FROM THE C1/4 CORNER OF SECTION 21
9 S	40 E	WM	21	SE NW	BRIDGE 1 - 125 FEET NORTH AND 22 FEET WEST FROM THE C1/4 CORNER OF SECTION 21

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
9 S	40 E	WM	21	NW SE	BRIDGE 3 - 1300 FEET SOUTH AND 270 FEET EAST FROM THE C1/4 CORNER OF SECTION 21

THE PLACE OF USE IS LOCATED AS FOLLOWS:

WITHIN THE SERVICE BOUNDARY OF CITY OF BAKER CITY MUNICIPAL WATER DISTRICT

Permit Amendment T-12979 Conditions:

The combined quantity of water diverted at the new points of appropriation (Reservoir Well, Golf Course 1, Golf Course 2, Golf Course 3, Bridge 1, Bridge 2, and Bridge 3), together with that diverted at the old point of appropriation (Well 2), shall not exceed the quantity of water lawfully available at the original point of appropriation (Well 2).

Water use measurement conditions:

- a) Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of appropriation (new and existing).
- b) The water user shall maintain the meters or measuring devices in good working order.
- c) The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.

Water shall be acquired from the same aquifer as the original point of appropriation.

Original Permit Conditions:

Measurement devices, and recording/reporting of annual water use conditions:

- A. Before water use may begin under this permit, the permittee shall install a totalizing flow meter, or other suitable measuring device as approved by the Director, at each point of appropriation. The permittee shall maintain the meter or measuring device in good working order.
- B. The permittee shall allow the watermaster access to the device; provided however, where any device is located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The permittee shall keep a complete record of the volume of water diverted each month, and shall submit a report which includes water-use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water-use information, including the place and nature of use of water under the permit.

- D. The Director may provide an opportunity for the permittee to submit alternative measuring and reporting procedures for review and approval.

Static Water Level Conditions

The Department requires the water user to obtain, from a qualified individual (see below), and report annual static water levels for each well on the permit. The static water level shall be measured in the month of March. Reports shall be submitted to the Department within 30 days of measurement.

The permittee shall report an initial March static water-level measurement once well construction is complete and annual measurements thereafter. Annual measurements are required whether or not the well is used. The first annual measurement will establish a reference level against which future measurements will be compared. However, the Director may establish the reference level based on an analysis of other water-level data. The Director may require the user to obtain and report additional water levels each year if more data are needed to evaluate the aquifer system.

All measurements shall be made by a certified water rights examiner, registered professional geologist, registered professional engineer, licensed well constructor or pump installer licensed by the Construction Contractors Board. Measurements shall be submitted on forms provided by the, or specified by, the Department. Measurements shall be made with equipment that is accurate to at least the standards specified in OAR 690-217-0045. The Department requires the individual performing the measurement to:

- A. Associate each measurement with an owner's well name or number and a Department well log ID; and
- B. Report water levels to at least the nearest tenth of a foot as depth-to-water below ground surface; and
- C. Specify the method of measurement; and
- D. Certify the accuracy of all measurements and calculations reported to the Department.

The Department may require the discontinuance of groundwater use, or reduce the rate or volume of withdrawal, from the well(s) if any of the following events occur:

- A. Annual water-level measurements reveal an average water-level decline of three or more feet per year for five consecutive years; or
- B. Annual water-level measurements reveal a water-level decline of 15 or more feet in fewer than five consecutive years; or
- C. Annual water-level measurements reveal a water-level decline of 25 or more feet; or
- D. Hydraulic interference leads to a decline of 25 or more feet in any neighboring well with senior priority.

The period of restricted use shall continue until the water level rises above the decline level which triggered the action or the Department determines, based on the permittee's and/or the Department's data and analysis, that no action is necessary because the aquifer in question can sustain the observed declines without adversely impacting the resource or causing substantial interference with senior water rights. The water user shall not allow excessive decline, as defined in Commission rules, to occur within the aquifer

as a result of use under this permit. If more than one well is involved, the water user may submit an alternative measurement and reporting plan for review and approval by the Department.

Prior to using water from any well listed on this permit, the permittee shall ensure that the well has been assigned an OWRD Well Identification Number (Well ID tag), which shall be permanently attached to the well. The Well ID shall be used as a reference in any correspondence regarding the well, including any reports of water use, water level, or pump test data.

STANDARD CONDITIONS

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

If the number, location, source, or construction of any well deviates from that proposed in the permit application or required by permit conditions, this permit may be subject to cancellation, unless the Department authorizes the change in writing.

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this right, then use of water from any well listed on this permit, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

The well(s) shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port adequate to determine water-level elevation in the well at all times.

If the riparian area is disturbed in the process of developing a point of diversion, the permittee shall be responsible for restoration and enhancement of such riparian area in accordance with ODFW's Fish and Wildlife Habitat Mitigation Policy OAR 635-415. For purposes of mitigation, the ODFW Fish and Wildlife Habitat Mitigation Goals and Standards, OAR 635-415, shall be followed.

The use may be restricted if the quality of downstream waters decreases to the point that those waters no longer meet state or federal water quality standards due to reduced flows.

Where two or more water users agree among themselves as to the manner of rotation in the use of water and such agreement is placed in writing and filed by such water users with the watermaster, and such rotation system does not infringe upon such prior rights of any water user not a party to such rotation plan, the watermaster shall distribute the water according to such agreement.

Prior to receiving a certificate of water right, the permit holder shall submit to the Water Resources Department the results of a pump test meeting the Department's standards for each point of appropriation (well), unless an exemption has been obtained in writing under OAR 690-217. The Director may require water-level or pump-test results every ten years thereafter.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The original permit was issued August 27, 2015. Complete application of the water shall be made within five years of the date of permit issuance, being August 27, 2020. If beneficial use of permitted water has not been made before this date, the permittee may submit an application for extension of time, which may be approved based upon the merit of the application.

Within one year after complete application of water to the proposed use, the permittee shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Rights Examiner (CWRE).

Issued **MAR 18 2019** ;

Dwight French, Water Right Services Division Administrator, for
Thomas M. Byler, Director
Oregon Water Resources Department
