

STATE OF OREGON

COUNTY OF CROOK

PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

STAFFORD RANCHES/
SAM STAFFORD
8600 SW WILEY ROAD
POWELL BUTTE, OR 97753

This superseding permit is issued to describe an amendment for a change in point of appropriation proposed under Permit Amendment Application T-13464 and approved by Special Order Vol. 117, Page 491, entered SEP 03 2020, and to describe an extension of time for complete application of water approved on May 12, 2020, and to describe an assignment approved on March 26, 2014. This permit supersedes Permit G-13590.

The specific limits and conditions of the use are listed below:

APPLICATION FILE NUMBER: G-14725

SOURCE OF WATER: A WELL IN THE CROOKED RIVER BASIN

PURPOSE OR USE: INDUSTRIAL USE (LOG DECK SPRINKLING)

MAXIMUM RATE: 1.0 CUBIC FOOT PER SECOND

PERIOD OF USE: FEBRUARY 1 TO DECEMBER 1

DATE OF PRIORITY: APRIL 16, 1998

WELL LOCATION:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
14 S	15 E	WM	23	NE NW	WELL #2 (CROO 50577) - 40 FEET SOUTH AND 830 FEET WEST FROM THE N1/4 CORNER OF SECTION 23

THE PLACE OF USE IS LOCATED AS FOLLOWS:

Twp	Rng	Mer	Sec	Q-Q
14 S	15 E	WM	23	NE NW
14 S	15 E	WM	23	NW NW

Permit Amendment T-13464 Conditions:

The quantity of water diverted at the new point of appropriation, (Well #2), shall not exceed the quantity of water lawfully available at the original point of appropriation, (Well #1).

Water use measurement conditions:

- a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of appropriation, (new and existing).
- b. The water user shall maintain the meters or measuring devices in good working order.
- c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.

Water shall be acquired from the same aquifer as the original point of appropriation.

Extension of Time Conditions:**1. Checkpoint Condition**

The use of any water under Permit G-13590 is subject to this Condition.

No water may be appropriated from CROO 50577 (Unauthorized Well) under Permit G-13590, unless a permit amendment authorizing either; 1) a change in point of appropriation, or 2) an additional point of appropriation, to include CROO 50577 as an authorized point of appropriation, is approved by the Department.

The permit holder shall submit an Application for Permit Amendment, requesting authorization of use of water from CROO 50577, under Permit G-13590, no later than June 10, 2020.

This Extension of Time is contingent on the timely submittal and approval of the above described Permit Amendment. Failure to submit an Application for Permit Amendment by June 10, 2020, may result in the termination of this Extension of Time. If the Permit Amendment does not authorize the use of water from CROO 50577 under this permit, the Extension of Time shall be terminated.

Original Permit Conditions:

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a meter or other suitable measuring device as approved by the Director. The permittee shall maintain the meter or measuring device in good working order.

- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.
- C. The Director may require the permittee to keep and maintain a record of the amount (volume) of water used and may require the permittee to report water use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water use information, the periods of water use and the place and nature of use of water under the permit. The Director may provide an opportunity for the permittee to submit alternative reporting procedures for review and approval.

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this permit, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

Use of water under authority of this permit may be regulated if analysis of data available after the permit is issued discloses that the appropriation will measurably reduce the surface water flows necessary to maintain the free-flowing character of a scenic waterway in quantities necessary for recreation, fish and wildlife in effect as of the priority date of the right or as those quantities may be subsequently reduced.

STANDARD CONDITIONS

The wells shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times.

The use shall conform to such reasonable rotation system as may be ordered by the proper state officer.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Actual construction of the well was to begin on or before December 24, 1999. Complete application of water to the use was to be made on or before October 1, 2003. By Extension of Time Final Order dated May 12, 2020, the completion of the application of water was extended to on or before October 1, 2024. Within one year after complete application of the proposed use, the permittee shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Rights Examiner, (CWRE).

SEP 03 2020
