

STATE OF OREGON

COUNTY OF CLACKAMAS

PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

SALMON VALLEY WATER COMPANY
PO BOX 205
WELCHES, OR 97067

This superseding permit is issued to describe an amendment for a change in point of appropriation proposed under Permit Amendment Application T-13484 and approved by Special Order Vol. 118, Page 44, entered NOV 09 2020, an amendment for additional points of appropriation proposed under Permit Amendment Application T-10240 and approved by Special Order Vol. 71, Page 248, and to describe an extension of time for complete application of water approved on June 11, 2002, and a Water Management and Conservation Plan approved on July 1, 2019. This permit supersedes Permit G-11534.

The specific limits and conditions of the use are listed below:

APPLICATION FILE NUMBER: G-12785

SOURCE OF WATER: SIX WELLS IN THE SALMON RIVER BASIN

PURPOSE OR USE: QUASI-MUNICIPAL

MAXIMUM RATE: 1.0 CUBIC FOOT PER SECOND

DATE OF PRIORITY: FEBRUARY 21, 1992

WELL LOCATIONS:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
3 S	7 E	WM	4	SW NW	WELL - 2205 FEET SOUTH AND 295 FEET EAST FROM THE NW CORNER OF SECTION 4
3 S	7 E	WM	5	NW NE	WELL 3 - 210 FEET SOUTH AND 2360 FEET WEST FROM THE NE CORNER OF SECTION 5

Permit Amendment T-13484 Conditions:

Prior to the use of water from the proposed point of appropriation, land use approval must be obtained and evidence of such approval shall be submitted to the Department.

The combined quantity of water diverted at the new point of appropriation, (Well FG-7), together with the old points of appropriation, (Well, Well 3, Well 4, Well 5, and Well 6), shall not exceed the quantity of water lawfully available at the original points of appropriation, (Well, Well 2, Well 3, Well 4, Well 5 and Well 6).

Water use measurement conditions:

- a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of appropriation (new and existing).
- b. The water user shall maintain the meters or measuring devices in good working order.

- c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.

Water shall be acquired from the same aquifer as the original point of appropriation.

Extension of Time Conditions:

Periodic Progress Report Checkpoints

In accordance with OAR 690-315-0050(6), the permittee must submit a written progress report to the Department by October 1, of the years 2007, 2012, 2017, 2022, and 2027. The report must be received by the Department not sooner than 90 days prior to the due date. The permittee's report must describe in detail the work done each year since the last extension was granted or the last progress report submitted. The report shall include:

- a) The amount of construction completed;
- b) The amount of beneficial use of water being made, including the total volume of water used, water used relative to the specific authorizations (types of use, acres irrigated, etc.) contained in the permit, and the percent of the total allowable water use that this represents;
- c) A review of the permittee's compliance with terms and conditions of the permit and/or previous extension; and
- d) Financial investments made toward developing the beneficial water use. The Department will review the progress report to determine whether the permittee is exercising diligence towards completion of the project and complying with the terms and conditions of the permit and extension.

Failure to submit a progress report by the due date above may jeopardize continued development under the permit.

Original Permit Conditions:

Prior to using water from any well listed on this permit, the permittee shall ensure that the well has been assigned an OWRD Well Identification Number (Well ID). A tag showing the Well ID shall be permanently attached to the well. If a well does not have a Well ID, the permittee shall apply for one from the Department and attach it to the well within 60 days of the date the permit is issued. The Well ID shall be used as a reference in any correspondence regarding the well, including any reports of water use, water level, or pump test data.

STANDARD CONDITIONS

- (1) Use of water from the well, as allowed herein, shall be regulated if the well displays:

- (a) An average water level decline of three or more feet per year for five consecutive years; or
 - (b) A total water level decline of fifteen or more feet; or
 - (c) A hydraulic interference decline of fifteen or more feet in any neighboring well providing water for senior exempt uses or wells covered by prior rights.
- (2) The permittee/appropriator shall install a meter or other measuring device suitable to the Director, and shall keep a complete record of water uses.
- (3) The permittee/appropriator shall be responsible for complying with each of the following requirements for measuring water levels in the well.
- (a) Use of the water from a new well shall not begin until the initial water level in the well has been measured. A measurement of initial water level shall be made at the time a pump is installed, but before pumping begins.
 - (b) In addition to the measurement required in subsection (a) of this section, a water level measurement shall be made each year at the time of spring high water during the period March 15 through April 15.
 - (c) All water level measurements shall be made by a qualified individual. Qualified individuals include certified water rights examiners, licensed water well drillers, registered geologists, registered professional engineers, registered land surveyors, or the permittee/appropriator.
 - (d) Any qualified individual measuring a well shall use standard methods of procedure and equipment designed for the purpose of well measurement. The equipment used shall be well suited to the conditions of construction at the well. A list of standard methods of procedure and suitable equipment shall be received not later than 30 days from the date of measurement.
 - (e) The permittee/appropriator shall submit a record of the measurement to the Department on a form available from the Department. The record of measurement shall be received not later than 30 days from the date of measurement.
- (4) The Department shall determine when any of the declines cited in section (1) are evidenced by the well measurement required in section (3).

Within one year from the date the water Resources Commission adopts rules describing the schedules, standards and procedures for water conservation management plans by water suppliers, Salmon Valley Water Company shall submit a plan which is consistent with said rules.

Within one year of permit issuance, the Salmon Valley Water Company shall prepare a plan/timetable for the Water Resources Commission which shall indicate the steps which Salmon Valley Water Company intends to pursue to obtain a long-term water supply.

The well shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

Actual construction work was to begin on or before August 17, 1993. By Extension of Time Final Order dated August 17, 1992, the deadline for completing construction and for complete application of water to use was extended to October 1, 2030.

Within one year after making beneficial use of water, the permittee shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Rights Examiner.

Dated in Salem, Oregon on NOV 09 2020

Lisa J. Jaramillo, Transfer and Conservation Section Manager for
THOMAS M. BYLER, DIRECTOR
Oregon Water Resources Department
