

STATE OF OREGON

COUNTY OF CLACKAMAS

PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

STEVE KOCH  
27815 S ELISHA  
CANBY, OR 97013

**This superseding permit is issued to describe an amendment for a change in place of use proposed under Permit Amendment Application T-13426 and approved by Special Order Vol. 117, Page 170, entered OCT 15 2020. This permit supersedes Permit G-18472.**

The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: G-16289

SOURCE OF WATER: WELL 1, WELL 2, WELL 3, AND WELL 4 IN DOVE CREEK BASIN

PURPOSE OR USE: NURSERY USE ON 93.7 ACRES

MAXIMUM RATE: 1.67 CUBIC FEET PER SECOND (CFS); BEING 1.67 CFS FROM NOVEMBER 1 THROUGH MAY 31; FURTHER LIMITED TO 1.3 CFS FROM JUNE 1 THROUGH OCTOBER 31

PERIOD OF USE: YEAR ROUND

DATE OF PRIORITY: AUGUST 6, 2004

WELL LOCATIONS:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
4 S	1 E	WM	24	SE SW	WELL 1 (RE-DESCRIBED) - 1250 FEET NORTH AND 1950 FEET EAST FROM THE SW CORNER OF SECTION 24
4 S	1 E	WM	24	SW SE	WELL 2 (RE-DESCRIBED) - 1210 FEET SOUTH AND 430 FEET EAST FROM THE SW CORNER OF DLC 46
4 S	1 E	WM	23	SE SE	WELL 3 - 1040 FEET NORTH AND 200 FEET WEST FROM THE SE CORNER OF SECTION 23
4 S	1 E	WM	24	NW NW	WELL 4 - 1160 FEET SOUTH AND 160 FEET EAST FROM THE NW CORNER OF SECTION 24

The amount of water used for nursery use is limited to a maximum of 5.0 acre feet per acre and a diversion of 0.15 cubic foot per second per acre. For irrigation of containerized nursery plants, the amount of water diverted is limited to one fortieth of one cubic foot per second and 5.0 acre feet per acre per year. For irrigation of in-ground nursery plants, the amount of water diverted is limited to one eightieth of one cubic foot per second and 2.5 acre feet per acre per year. The use of water for nursery use may be made at any time, during the period of allowed use specified above, that the use is beneficial. For irrigation of any other crop, the amount of water diverted is limited to one-eightieth of one cubic foot per second and 2.5 acre feet per acre during the irrigation season of each year.

**THE PLACE OF USE IS LOCATED AS FOLLOWS:**

NURSERY USE					
Twp	Rng	Mer	Sec	Q-Q	Acres
4 S	1 E	WM	23	NE NE	9.3
4 S	1 E	WM	23	SE NE	30.0
4 S	1 E	WM	23	SE SE	7.3
4 S	1 E	WM	24	NW NW	11.3
4 S	1 E	WM	24	SW NW	6.4
4 S	1 E	WM	24	NW SW	29.4
				Total	93.7

**Permit Amendment T-13426 Conditions:**

Water use measurement conditions:

- a. Before water use may begin under this order, the water user shall install a totalizing flow meter, or, with prior approval of the Director, another suitable measuring device, at each point of appropriation.
- b. The water user shall maintain the meters or measuring devices in good working order.
- c. The water user shall allow the Watermaster access to the meters or measuring devices; provided however, where the meters or measuring devices are located within a private structure, the Watermaster shall request access upon reasonable notice.

**Original Permit Conditions**

**Measurement, recording and reporting conditions:**

- A. Before water use may begin under this permit, the water user shall install a meter or other suitable measuring device as approved by the Director. The water user shall maintain the meter or measuring device in good working order, shall keep a complete record of the amount of water used each month and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the water user to report general water use information, including the place and nature of use of water under the permit.
- B. The water user shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.

## WELL CONDITIONS

1. The well(s) shall produce groundwater only from the alluvial sediment groundwater reservoir.
2. To monitor the effect of water use from the well(s) authorized under this permit, the Department requires the water user to make and report annual static water level measurements. The static water level shall be measured in the month of March. Reports shall be submitted to the Department within 30 days of measurement.
  - A. Measurements must be made according to the following schedule:
    1. Before Use of Water Takes Place  
Initial and Annual Measurements  
 The Department requires the water user to submit an initial water level measurement in the month specified above once well construction is complete and annually thereafter until use of water begins; and
    2. After Use of Water has Begun  
Seven Consecutive Annual Measurements  
 Following the first year of water use, the user shall submit seven consecutive annual reports of static water level measurements. The first of these seven annual measurements will establish the reference level against which future annual measurements will be compared. Based on an analysis of the data collected, the Director may require that the user obtain and report additional annual static water level measurements beyond the seven year minimum reporting period. The additional measurements may be required in a different month. If the measurement requirement is stopped, the Director may restart it at any time.
  - B. All measurements shall be made by a certified water rights examiner, registered professional geologist, licensed well constructor or pump installer licensed by the Construction Contractors Board and be submitted to the department on forms provide by the Department. The Department requires the individual performing the measurement for:
    - 1) Identify each well with its associated measurement; and
    - 2) Measure and report Water levels to the nearest tenth of a foot as depth-to-water below ground surface; and
    - 3) Specify the method used to obtain each well measurement; and
    - 4) Certify the accuracy of all measurements and calculations submitted to the Department.
  - C. The water user shall discontinue use of, or reduce the rate or volume of withdrawal from, the well(s) if annual water level measurements reveal any of the following events:
    1. An average water level decline of three or more feet per year for five consecutive years; or
    2. A water level decline of 15, or more feet in fewer than five consecutive years; or
    3. A water level decline of 25 or more feet; or
    4. Hydraulic interference leading to a decline of 25 or more feet in any neighboring well with senior priority.

- D. The period of non or restricted use shall continue until the annual water level rises above the decline level which triggered the action or until the Department determines, based on the water user's and/or the Department's data and analysis, that no action is necessary because the aquifer in question can sustain the observed declines without adversely impacting the resource or senior water rights. The water user shall in no instance allow excessive decline, as defined in Commission rules, to occur within the aquifer as a result of use under this permit. If more than one well is involved, the water user may submit an alternative measurement and reporting plan for review and approval by the Department.

### STANDARD CONDITIONS

If the number, location, source, or construction of any well deviates from that proposed in the permit application or required by permit conditions, this permit may not be valid.

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this permit, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

The wells shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times.

Where two or more water users agree among themselves as to the manner of rotation in the use of water and such agreement is placed in writing and filed by such water users with the watermaster, and such rotation system does not infringe upon such prior rights of any water user not a party to such rotation plan, the watermaster shall distribute the water according to such agreement.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

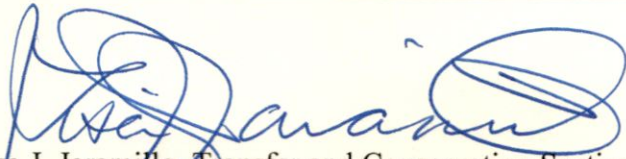

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

The original permit was issued August 11, 2005. Completion of construction and application of the water to the use shall be made on or before October 1, 2023. If beneficial use of permitted water has not been made before this date, the permittee may submit an application for extension of time, which may be approved based upon the merit of the application.

Within one year after complete application of water to the proposed use, the water user shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Rights Examiner (CWRE).

Issued at Salem, Oregon this                     OCT 15 2020                    

Lisa J. Jaramillo, Transfer and Conservation Section Manager, for  
THOMAS M. BYLER, DIRECTOR  
Oregon Water Resources Department
