

STATE OF OREGON

COUNTY OF CLACKAMAS

PERMIT TO APPROPRIATE THE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

SHORTLAND GOLF CLUB
AKA SHORTY'S GOLF COURSE, LLC.
C/O MIKE FRITZ
16842 ALDER CIRCLE
LAKE OSWEGO, OR 97034

This superseding permit is issued to describe an extension of time for complete application of water approved July 30, 2013, and a Split a Permit approved by Special Order Volume 129, Page 862, entered on MAR 4 - 2024. This permit, together with Permit G-18862 supersedes Permit G-16291.

The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: G-16499

SOURCE OF WATER: WELL 1 (CLAC 9317) AND WELL 2 (CLAC 9316) IN WILLAMETTE RIVER BASIN

PURPOSE OR USE: IRRIGATION USE ON 30.9 ACRES

MAXIMUM VOLUME: 77.25 ACRE FEET PER YEAR, FURTHER LIMITED TO AN INSTANTANEOUS RATE OF 0.4 CUBIC FOOT PER SECOND

PERIOD OF USE: MARCH 1 THROUGH OCTOBER 31

DATE OF PRIORITY: JULY 20, 2005

WELL LOCATIONS:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
3 S	1 E	WM	16	SW NW	WELL 1 (CLAC 9317) - 2050 FEET SOUTH AND 1560 FEET WEST FROM THE N 1/4 CORNER OF SECTION 16
3 S	1 E	WM	16	NE SW	WELL 2 (CLAC 9316) - 3780 FEET SOUTH AND 360 FEET WEST FROM THE N 1/4 CORNER OF SECTION 16

The amount of water used for irrigation under this right, together with the amount secured under any other right existing for the same lands, is limited to 2.5 acre-feet for each acre irrigated during the irrigation season of each year.

THE PLACE OF USE IS LOCATED AS FOLLOWS:

IRRIGATION					
Twp	Rng	Mer	Sec	Q-Q	Acres
3 S	1 E	WM	16	NE NW	30.9

Split a Permit T-14244 Conditions:

The assignment and issuance of replacement permits would not result in injury to other water right holders.

The assignment and issuance of replacement permits would not result in enlargement of the permit.

The assignment and issuance of replacement permits does not alter any other terms of Permit G-16291.

Original Permit Conditions:

Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, the permittee shall install a totalizing flow meter or other suitable measuring device as approved by the Director at each point of appropriation. The permittee shall maintain the meter or measuring device in good working order, shall keep a complete record of the amount of water used each month, and shall submit a report which includes the recorded water use measurements to the Department annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water-use information, including the place and nature of use of water under the permit.
- B. The permittee shall allow the watermaster access to the meter or measuring device; provided however, where the meter or measuring device is located within a private structure, the watermaster shall request access upon reasonable notice.

Use of water from the wells, as allowed herein, shall be controlled or shut off if the wells display:

- (a) An average water level decline of three or more feet per year for five consecutive years; or
- (b) A total water level decline of fifteen or more feet; or
- (c) A hydraulic interference decline of fifteen or more feet in any neighboring well providing water for senior exempt uses or wells covered by prior rights.

For the purpose of determining declines, the reference levels that shall be used are 93.03 feet below land surface for Well 1 and 99.65 feet below land surface for Well 2.

The permittee/appropriator shall be responsible for complying with each of the following requirements for measuring water levels in the wells:

- (a) A water level measurement shall be made each year during the period March 1 through March 31.
- (b) All water level measurements shall be made by a qualified individual. Qualified individuals are certified water rights examiners, registered geologists, registered professional engineers, licensed land surveyors, licensed water well constructor, licensed pump installer, or the permittee/appropriator.
- (c) Any qualified individual measuring a well shall use standard methods of procedure and equipment designed for the purpose of well measurement. The equipment used shall be well suited to the conditions of construction at the well. A list of standard methods of procedure and suitable equipment shall be available from the Department.
- (d) The permittee/appropriator shall submit a record of the measurement to the Department on a form available from the Department. The record of measurement shall include both measurements and calculations, shall include a certification as to their accuracy signed by the individual making the measurements, and shall be submitted to the Department within 90 days from the date of measurement. The Department shall determine when any of the declines cited in section (1) are evidenced by the well measurement required in section (3).

STANDARD CONDITIONS

If the number, location, source, or construction of any well deviates from that proposed in the permit application or required by permit conditions, this permit may not be valid, unless the Department authorizes the change in writing.

If substantial interference with a senior water right occurs due to withdrawal of water from any well listed on this permit, then use of water from the well(s) shall be discontinued or reduced and/or the schedule of withdrawal shall be regulated until or unless the Department approves or implements an alternative administrative action to mitigate the interference. The Department encourages junior and senior appropriators to jointly develop plans to mitigate interferences.

The wells shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon. The works shall be equipped with a usable access port, and may also include an air line and pressure gauge adequate to determine water level elevation in the well at all times.

Where two or more water users agree among themselves as to the manner of rotation in the use of water and such agreement is placed in writing and filed by such water users with the watermaster, and such rotation system does not infringe upon such prior rights of any water user not a party to such rotation plan, the watermaster shall distribute the water according to such agreement.

Prior to receiving a certificate of water right, the permit holder shall submit the results of a pump test meeting the department's standards, to the Water Resources Department. The Director may require water level or pump test results every ten years thereafter.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

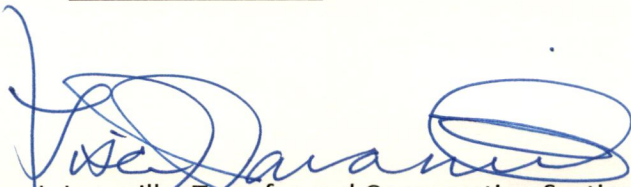

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water shall be limited when it interferes with any prior surface or ground water rights.

Completion of construction and complete application of the water to the use was to be made on or October 1, 2012. By Extension of Time Final Order dated July 30, 2013, the completion of construction and complete application of the water to the use was extended to October 1, 2032. If the water is not completely applied before this date, and the permittee wishes to continue development under the permit, the permittee must submit an application for extension of time, which may be approved based upon the merit of the application.

Within one year after complete application of water to the proposed use, the permittee shall submit a claim of beneficial use, which includes a map and report, prepared by a Certified Water Rights Examiner (CWRE).

Issued MAR 4 - 2024

Lisa J. Jaramillo, Transfer and Conservation Section Manager, for
DOUGLAS E. WOODCOCK, ACTING DIRECTOR
Oregon Water Resources Department
