,	STATE ENGINEER
	Da.

County of Marion,

This is to certify that I have examined the foregoing application and do hereby grant the same, SUBJECT TO EXISTING RIGHTS and the following limitations and conditions:

The use to which this water is to be applied is irrigation

If for irrigation, this appropriation shall be limited to

of one cubic foot per second

or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed

acre feet per acre for each acre irrigated during the irrigation season of each year; provided further
that the right allowed herein shall be further limited to any deficiency in the

available supply of any prior right existing for the same land and shall not exceed

the limitation allowed herein,

and shall be subject to such reasonable rotation system as may be ordered by the proper state officer.

The well shall be cased as necessary in accordance with good practice and if the flow is artesian the works shall include proper capping and control valve to prevent the waste of ground water.

The works constructed shall include an air line and pressure gauge or an access port for measuring line, adequate to determine water level elevation in the well at all times.

The permittee shall install and maintain a weir, meter, or other suitable measuring device, and shall keep a complete record of the amount of ground water withdrawn.

The priority date of this permit is

June 21, 1962

Actual construction work shall begin on or before

July 20, 1963

and shall

thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 19 63

Complete application of the water to the proposed use shall be made on or before October 1, 19 $^{-54}$

WITNESS my hand this

day of

July 1962

STATE ENGINEER

Application, No. G.

Permet No. G. 27. 7.
