

Well No 1

Permit No. G-2284

APPLICATION FOR A PERMIT

To Appropriate the Ground Waters of the State of Oregon

I, Bert W. Hawkins - Clover Creek Cattle Co
of Ironside, county of Malheur,
state of Oregon, do hereby make application for a permit to appropriate the
following described ground waters of the state of Oregon, SUBJECT TO EXISTING RIGHTS:

If the applicant is a corporation, give date and place of incorporation

1. Give name of nearest stream to which the well, tunnel or other source of water development is
situated South Fork Clover Creek
(Name of stream)

tributary of Bully Creek

2. The amount of water which the applicant intends to apply to beneficial use is cubic
feet per second or 450 gallons per minute.

3. The use to which the water is to be applied is Irrigation

4. The well or other source is located ft. and ft. from the
corner of S 79° 40' E a distance of 2257 feet
(N. or S.) (E. or W.)
(Section or subdivision)
from the NW corner SW NW Sec 36
(If preferable, give distance and bearing to section corner)
T 16 S R 39 E

(If there is more than one well, each must be described. Use separate sheet if necessary)
being within the SE NW of Sec. 36, Twp. 16 S, R. 39 E
W. M., in the county of Malheur

5. The Ditch to be 3/4 miles
(Canal or pipe line)
in length, terminating in the NW SW of Sec. 31, Twp. 16 S,
(Smallest legal subdivision)
R. 40 E, W. M., the proposed location being shown throughout on the accompanying map.

6. The name of the well or other works is Hawkins No 1

DESCRIPTION OF WORKS

7. If the flow to be utilized is artesian, the works to be used for the control and conservation of the
supply when not in use must be described.

8. The development will consist of 1 well having a
(Give number of wells, tunnels, etc.)
diameter of 12 inches and an estimated depth of 200 feet. It is estimated that 100
feet of the well will require steel casing. Depth to water table is estimated 12
(Kind) (Feet)

CANAL SYSTEM OR PIPE LINE—

9. (a) Give dimensions at each point of canal where materially changed in size, stating miles from headgate. At headgate: width on top (at water line) feet; width on bottom feet; depth of water feet; grade feet fall per one thousand feet.

(b) At miles from headgate: width on top (at water line) feet; width on bottom feet; depth of water feet; grade feet fall per one thousand feet.

(c) Length of pipe, ft.; size at intake, in.; in size at ft. from intake in.; size at place of use in.; difference in elevation between intake and place of use, ft. Is grade uniform? Estimated capacity, sec. ft.

10. If pumps are to be used, give size and type Berkley 6" Salt
5" Discharge

Give horsepower and type of motor or engine to be used 25 HP Electric

11. If the location of the well, tunnel, or other development work is less than one-fourth mile from a natural stream or stream channel, give the distance to the nearest point on each of such channels and the difference in elevation between the stream bed and the ground surface at the source of development

Well located 56 South of
South Fork of Clover Creek with a
difference in elevation of 8'.

12. Location of area to be irrigated, or place of use

Township N or S	Range E or W of Willamette Meridian	Section	Forty-acre Tract	Number Acres To Be Irrigated	
16 S	39 E	35	SE NE	Prime 6	Supplemental
		36	SW NW	16	
		✓	SE NW		4
		✓	NW NE		5
		✓	SW NE	8	5.5
		✓	SE NE		35.5
		✓	NE SE	3	
16 S	40 E	31	SW NW	12	
			NW SW	5	
				5	

(If more space required, attach separate sheet)

Character of soil Silt. loam

Kind of crops raised Hay Grain

MUNICIPAL SUPPLY—

13. To supply the city of
 in county, having a present population of
 and an estimated population of in 19.....

ANSWER QUESTIONS 14, 15, 16, 17 AND 18 IN ALL CASES

14. Estimated cost of proposed works, \$..... 5000.⁰⁰
 15. Construction work will begin on or before Has begun
 16. Construction work will be completed on or before June 1963
 17. The water will be completely applied to the proposed use on or before June 1963

18. If the ground water supply is supplemental to an existing water supply, identify any application for permit, permit, certificate or adjudicated right to appropriate water, made or held by the applicant. Partly supplemental to right under

Malheur River Adjudication

Chris L. Wheeler
 (Signature of applicant)

Remarks: During the non irrigating season water is pumped into a small reservoir located south of the well as shown in order to build up sufficient head to irrigate with. Also when haying or harvesting water is stored in reservoir. No surface runoff in reservoir.

STATE OF OREGON, } ss.
 County of Marion, }

This is to certify that I have examined the foregoing application, together with the accompanying maps and data, and return the same for completion

In order to retain its priority, this application must be returned to the State Engineer, with corrections on or before January 21 1963.

WITNESS my hand this 21st day of November, 1962.

PERMIT

This is to certify that I have examined the foregoing application and do hereby grant the same, SUBJECT TO EXISTING RIGHTS and the following limitations and conditions:

The right herein granted is limited to the amount of water which can be applied to beneficial use and shall not exceed 1.0 cubic feet per second measured at the point of diversion from the well or source of appropriation, or its equivalent in case of rotation with other water users, from well No. 1

The use to which this water is to be applied is irrigation and supplemental irrigation

If for irrigation, this appropriation shall be limited to 1/80 of one cubic foot per second or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3 acre feet per acre for each acre irrigated during the irrigation season of each year; provided further that the right allowed herein shall be limited to any deficiency in the available supply of any prior right existing for the same land and shall not exceed the limitation allowed herein.

and shall be subject to such reasonable rotation system as may be ordered by the proper state officer.

The well shall be cased as necessary in accordance with good practice and if the flow is artesian the works shall include proper capping and control valve to prevent the waste of ground water.

The works constructed shall include an air line and pressure gauge or an access port for measuring line, adequate to determine water level elevation in the well at all times.

The permittee shall install and maintain a weir, meter, or other suitable measuring device, and shall keep a complete record of the amount of ground water withdrawn.

The priority date of this permit is September 11, 1962

Actual construction work shall begin on or before February 15, 1964 and shall thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 1964

Complete application of the water to the proposed use shall be made on or before October 1, 1965

WITNESS my hand this 15 day of February, 1963

Chris L. Wheeler
