APPLICATION FOR A PERMIT

To Appropriate the Ground Waters of the State of Oregon

I, B. Guidodie by Eli W. Davis (Name of applicant)						
of 1236 N. Riverside Avenue, Medford, county of Jackson						
state of, do hereby make application for a permit to appropriate the following described ground waters of the state of Oregon, SUBJECT TO EXISTING RIGHTS:						
If the applicant is a corporation, give date and place of incorporation						
1. Give name of nearest stream to which the well, tunnel or other source of water development is						
situated South Fork Little Butte Creek, tributary of Little Butte Creek, (Name of stream)						
tributary of Rogue River						
2. The amount of water which the applicant intends to apply to beneficial use is 0.13 cubic feet per second or gallons per minute.						
3. The use to which the water is to be applied is 1rrigation						
4. The well or other source is located 1310 ft. S. and 250 ft. W. from the Et.						
corner of Section 10 (Section or subdivision)						
(If preferable, give distance and bearing to section corner)						
(If there is more than one we'' each must be described. Use separate sheet if necessary)						
being within the NET SET of Sec. 10 Twp. 37 S. R. 2 E.						
W. M., in the county of Jackson						
5. The pipeline to be 2200 feet *****						
in length, terminating in the SE NE NE Of Sec. 10, Twp. 37 S. (Smallest legal subdivision)						
(Smallest legal subdivision) R. 2 E W. M., the proposed location being shown throughout on the accompanying map.						
6. The name of the well or other works is Guidodie Sump						
DESCRIPTION OF WORKS						
7. If the flow to be utilized is artesian, the works to be used for the control and conservation of the supply when not in use must be described.						
<u></u>						
						
8. The development will consist of (1) Sump having a (Give number of wells, tunnels, etc.)						
diameter of 4' x 40' x 20' x and an estimated depth of 8 feet. It is estimated that						
feet of the well will require						

feet; depth of water feet; grade feet fall and feet. (b) At miles from headgate: width on top (at water line) feet; width on bottom feet; depth of water feet fall per one thousand feet. (c) Length of pipe, 2200 ft.; size at intake, 2 in.; in size at nake in.; size at place of use 2 in.; difference in elevation and place of use, 200 ft. Is grade uniform? no Estimated of sec. ft. 10. If pumps are to be used, give size and type gravity system from 3000 gal corage tanks. Give horsepower and type of motor or engine to be used 11. If the location of the well, tunnel, or other development work is less than one-fourth mil al stream or stream channel, give the distance to the nearest point on each of such chan difference in elevation between the stream bed and the ground surface at the source of development in the source of the source of the source of the source of the source
miles from headgate: width on top (at water line) feet; width on bottom feet; depth of water feet fall per one thousand feet.
