DESCRIPTION OF WORKS

7. If the flow to be utilized is artesian, the works to be used for the control and conservation of the supply when not in use must be described.

Well is artesian 10 gals per min. Well is capped & controlled, steel 12" casing 110' & sealed

8. The development will consist of 1 well (Give number of wells, tunnels, etc.) having a diameter of 12 inches and an estimated depth of 430 feet. It is estimated that 110' feet of the well will require Steel (Kind) casing. Depth to water table is estimated 175 (Feet) Pumping level

13. To supply the city of .....  
in ..... county, having a present population of .....  
and an estimated population of ..... in 19.....

ANSWER QUESTIONS 14, 15, 16, 17 AND 18 IN ALL CASES

14. Estimated cost of proposed works, \$..... 5000-

15. Construction work will begin on or before March 1, 1965

16. Construction work will be completed on or before June 1, 1965

17. The water will be completely applied to the proposed use on or before June 15, 1965

18. If the ground water supply is supplemental to an existing water supply, identify any application for permit, permit, certificate or adjudicated right to appropriate water, made or held by the applicant.

*Dal Tucker*  
(Signature of applicant)

Remarks: .....

Tests - 80 gals per min @ 175'  
@ 50 lbs pressure

Artesian is about 10 gals per min  
when not pumping

STATE OF OREGON, }  
County of Marion, } ss.

This is to certify that I have examined the foregoing application, together with the accompanying maps and data, and return the same for ..... correction

In order to retain its priority, this application must be returned to the State Engineer, with corrections on or before Oct. 18, 1965.

WITNESS my hand this 18th day of August, 1965.

ASSISTANT

This is to certify that I have examined the foregoing application and do hereby grant the same, SUBJECT TO EXISTING RIGHTS and the following limitations and conditions:

The right herein granted is limited to the amount of water which can be applied to beneficial use and shall not exceed .....0.18..... cubic feet per second measured at the point of diversion from the well or source of appropriation, or its equivalent in case of rotation with other water users, from ..... a well.....

The use to which this water is to be applied is ..... irrigation.....

If for irrigation, this appropriation shall be limited to ..... 1/80th..... of one cubic foot per second or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed ..... 3..... acre feet per acre for each acre irrigated during the irrigation season of each year; .....

and shall be subject to such reasonable rotation system as may be ordered by the proper state officer.

The well shall be cased as necessary in accordance with good practice and if the flow is artesian the works shall include proper capping and control valve to prevent the waste of ground water.

The works constructed shall include an air line and pressure gauge or an access port for measuring line, adequate to determine water level elevation in the well at all times.

The permittee shall install and maintain a weir, meter, or other suitable measuring device, and shall keep a complete record of the amount of ground water withdrawn.

The priority date of this permit is ..... August 3, 1965.....

Actual construction work shall begin on or before ..... February 21, 1967..... and shall thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 19..... 67.....

Complete application of the water to the proposed use shall be made on or before October 1, 19..... 68.....

WITNESS my hand this ..... 21..... day of ..... February....., 19..... 66.....
