CANAL SYSTEM OR PIPE LINE—

9. (a) Give dimensions at each point of canal where materially changed in size or grade.

headgate. At headgate: width on top (at water line) _____ feet; width on bottom _____ feet; depth of water _____ feet; grade _____ feet fall per one thousand feet.

(b) At _____ miles from headgate: width on top (at water line) _____ feet; width on bottom _____ feet; depth of water _____ feet; grade _____ feet fall per one thousand feet.

(c) Length of pipe, 260 ft.; size at intake, 3 in.; in size at 260 ft. from intake, 3 in.; size at place of use, 2 in.; difference in elevation between intake and place of use, 2 ft. Is grade uniform? yes. Estimated capacity, .3 sec. ft.

10. If pumps are to be used, give size and type: 1" centrifugal

Give horsepower and type of motor or engine to be used: 5 H. P. electric

11. If the location of the well, tunnel, or other development, each, is less than one-fourth mile from a natural stream or stream channel, give the distance to the nearest point on each of such streams, the difference in elevation between the stream bed and the ground surface at the source of each stream. well is approximately 400 feet from Oak Creek. Stream bed is approximately 5 feet below the well ground surface.

12. Location of area to be irrigated, or place of use (see below)

Township	Range of West of the Meridian	Section	Part of Section	Acres
11 S	2 W	21	NE $\frac{1}{4}$ of NE $\frac{1}{4}$	1.2
11 S	2 W	21	SE $\frac{1}{4}$ of NE $\frac{1}{4}$	<u>1.4</u>

County of Marion,

ss.

This is to certify that I have examined the foregoing application and do hereby grant the same SUBJECT TO EXISTING RIGHTS and the following limitations and conditions:

The right herein granted is limited to the amount of water which can be applied to beneficial use and shall not exceed 0.03 cubic feet per second measured at the point of diversion from the well or source of appropriation, or its equivalent in case of rotation with other water users, from Center Well

The use to which this water is to be applied is irrigation

If for irrigation, this appropriation shall be limited to 1/80 of one cubic foot per second or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 2 1/2 acre feet per acre for each acre irrigated during the irrigation season of each year.

and shall be subject to such reasonable rotation system as may be ordered by the proper state officer

The well shall be cased as necessary in accordance with good practice and if the flow is artesian, the works shall include proper capping and control valve to prevent the waste of ground water.

The works constructed shall include an air line and pressure gauge or an access port for a piezometer line adequate to determine water level elevation in the well at all times.

The priority date of this permit is September 7, 1956

Actual construction work shall begin on or before October 24, 1957 and shall

thereafter be proceeded with reasonable diligence and be completed on or before October 1, 1958

Complete application of the water to the proposed use shall be made on or before October 1, 1958. The applicant shall install and maintain a weir, meter, or other measuring device and shall keep a complete record of the amount of ground water withdrawn.

WITNESSED my hand this 14th day of October 1956

Julius G. Stanley
