

Permit No. G- G 3530

APPLICATION FOR A PERMIT

To appropriate the Ground Waters of the State of Oregon

I, Stone Machinery Co. by Howard Stone, President
of Box 1102, Hermiston, county of Umatilla
state of Oregon, do hereby make application for a permit to appropriate the
following described ground waters of the state of Oregon, SUBJECT TO EXISTING RIGHTS:

If the applicant is a corporation, give date and place of incorporation
February 1956, Washington (authorized to do business in Oregon)

1. Give name of nearest stream to which the well, tunnel or other source of water development is
situated Butter Creek
(Name of stream)

tributary of Umatilla River
#1. -10-5- 4.5
#2. -10-cubic 6.0
2. The amount of water which the applicant intends to apply to beneficial use is #1. -4,712- 2,019.6
#2. -4,488- 2,692.8
feet per second or gallons per minute.

3. The use to which the water is to be applied is
irrigation

4. The well or other source is located ft. and ft. from the
corner of
(N. or S.) (E. or W.)
(Section or subdivision)

#1 S. 41°-11'-30" W. - 5239.5 ft. to S.W. Corner Sec. 18
(If preferable, give distance and bearing to section corner)

#2 S. 80°-04' W. - 303' to S. one quarter Corner Sec. 6
(If there is more than one well, each must be described. Use separate sheet if necessary)

being within the of Sec. , Twp. 3 N., R. 28 E.,
W. M., in the county of Umatilla

5. The to be miles
(Canal or pipe line)
in length, terminating in the of Sec. , Twp. ,
(Smallest legal subdivision)
R. , W. M., the proposed location being shown throughout on the accompanying map.

6. The name of the well or other works is Stone Well #1 and Stone Well #2

DESCRIPTION OF WORKS

7. If the flow to be utilized is artesian, the works to be used for the control and conservation of the
supply when not in use must be described.

No.

8. The development will consist of 2 wells, each having a
(Give number of wells, tunnels, etc.)
diameter of 16 inches and an estimated depth of 600-800 feet. It is estimated that N.A.
feet of the well will require standard casing. Depth to water table is estimated 200
(Kind) (Feet)
Construction not started yet.

MUNICIPAL SUPPLY—

13. To supply the city of .....  
in ..... county, having a present population of .....  
and an estimated population of ..... in 19.....

ANSWER QUESTIONS 14, 15, 16, 17 AND 18 IN ALL CASES

- 14. Estimated cost of proposed works, \$ 18,000/well
- 15. Construction work will begin on or before May 1, 1968
- 16. Construction work will be completed on or before May 1, 1969
- 17. The water will be completely applied to the proposed use on or before May 1, 1970
- 18. If the ground water supply is supplemental to an existing water supply, identify any application for permit, permit, certificate or adjudicated right to appropriate water, made or held by the applicant. See attached sheet.

STONE MACHINERY COMPANY

By: Howard Stone  
(Signature of applicant)

Remarks: See attached sheet.

STATE OF OREGON, }  
County of Marion, } ss.

This is to certify that I have examined the foregoing application, together with the accompanying maps and data, and return the same for ..... Completion.....

In order to retain its priority, this application must be returned to the State Engineer, with corrections on or before August 15th, 1967.

WITNESS my hand this 15th day of June, 1967.

CHRIS L. WHEELER STATE ENGINEER  
By: [Signature] ASSISTANT

Remarks: This application covers two wells, neither of which have been constructed. Consequently, no accurate estimate or prediction can be made regarding the productive capacity of either well.

The application covers 840 acres and is for a total of 10.5 cubic feet per second or 4,712.4 gallons per minute from both wells. The acreage lines and yields for each well have been arbitrarily fixed at the request of the Oregon State Engineer and will be adjusted to the actual yields of the two wells.

Any increase in yield-use from one well will require an equal decrease from the other. The actual maximum flows for each of the wells will be established prior to the Certificates being issued, but the maximum potential yield for each well is 10.5 cubic feet per second or 4,712.4 gallons per minute which is also the maximum for both wells.

The land to be irrigated from each well will also be finally determined prior to the Certificates being issued and adjustment may be made in the arbitrary acreage-well plan submitted herewith subject to the maximum acreage limitation of 840 acres.

PERMIT

This is to certify that I have examined the foregoing application and do hereby grant the same, SUBJECT TO EXISTING RIGHTS and the following limitations and conditions:

The right herein granted is limited to the amount of water which can be applied to beneficial use and shall not exceed 10.5 cubic feet per second measured at the point of diversion from the well or source of appropriation, or its equivalent in case of rotation with other water users, from two wells being 4.5 cfs from well #1 and 6.0 cfs from well #2.

The use to which this water is to be applied is irrigation and supplemental irrigation.

If for irrigation, this appropriation shall be limited to 1/80th of one cubic foot per second or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3 acre feet per acre for each acre irrigated during the irrigation season of each year; provided further that the right allowed herein shall be limited to any deficiency in the available supply of any prior right existing for the same land and shall not exceed the limitation allowed herein and the right allowed herein shall not authorize appropriation from the aquifer supplying those wells described in the State Engineer's Ground Water Report No. 11 as "Deep Wells in Basalt", unless appropriations are permitted in the final order of the State Engineer declaring that aquifer a critical ground water area and shall be subject to such reasonable rotation system as may be ordered by the proper state officer.

The well shall be cased as necessary in accordance with good practice and if the flow is artesian the works shall include proper capping and control valve to prevent the waste of ground water.

The works constructed shall include an air line and pressure gauge or an access port for measuring line, adequate to determine water level elevation in the well at all times.

The permittee shall install and maintain a weir, meter, or other suitable measuring device, and shall keep a complete record of the amount of ground water withdrawn.

The priority date of this permit is May 24, 1967.

Actual construction work shall begin on or before October 11, 1968 and shall thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 1969.

Complete application of the water to the proposed use shall be made on or before October 1, 1970.

WITNESS my hand this 11th day of October, 1967.
