Permit No. G. G 4005

APPLICATION FOR A PERMIT

To Appropriate the Ground Waters of the State of Oregon

1 Joseph N. HERSHBERGER
1, Joseph N. HERSHBERGER (Name of applicant) of P.O. Box 786 CANBY, Ore , county of Clackamas,
state of
If the applicant is a corporation, give date and place of incorporation
1. Give name of nearest stream to which the well, tunnel or other source of water development is
situated Molay la R. & Pudding R. (Name of stream) tributary of Williamethe
2. The amount of water which the applicant intends to apply to beneficial use is cubic feet per second or gallons per minute.
3. The use to which the water is to be applied is Irrigation
4. The well or other source is located 2110 ft. N and 250 ft. W from the SE corner of 5W4 SE/4 SEC 7 (Section or subdivision)
(If preferable, give distance and bearing to section corner)
(If there is more than one well, each must be described. Use separate sheet if necessary) being within the NWY Stry of Sec. 7, Twp. 45, R. 4,
W. M., in the county of Chekamas Co
5. The to be miles
in length, terminating in the
R, W. M., the proposed location being shown throughout on the accompanying map.
6. The name of the well or other works is
DESCRIPTION OF WORKS
7. If the flow to be utilized is artesian, the works to be used for the control and conservation of the supply when not in use must be described.

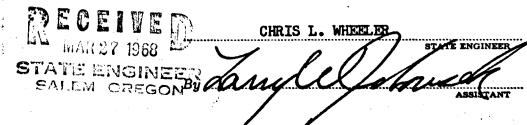

X8. The development will consist of One Ariled wells, tunnels, etc.)
diameter of inches and an estimated depth of feet. It is estimated that
feet of the well will require Steel casing. Depth to water table is estimated (Feet)

CANAL	SYSTEM	OR	PIPE	T.INF

9. (a) Give dimensions at each point of canal where materially changed in size, stating miles freedgate. At headgate: width on top (at water line) feet; width on bottom feet; depth of water feet; depth of water feet fall per one chousand feet. (b) At miles from headgate: width on top (at water line) feet fall per one focus on feet; depth of water feet fall per one thousand feet. (c) Length of pipe, feet fall per one thousand feet. (c) Length of pipe, feet; size at place of use in; difference in elevation between take and place of use Loopping foc, the fall form of the fall feet one fall for the fall feet one fall fee	•	EM OR PIPE LINE			G 4005
feet; depth of water feet; grade feet fall per of nouscand feet. (b) At miles from headgate: width on top (at water line) feet; width on bottom feet; width on bottom feet; depth of water feet fall per one thousand feet. (c) Length of pipe, 1700 ft.; size at intake I in.; in size at 1100 om intake I in.; size at place of use I in.; difference in elevation between take and place of use, II is grade uniform? Estimated capacity at the analysis of the pumps are to be used, give size and type Bycen Jacksen Turbine, I in.; the foresteen feet to be used. Give horsepower and type of motor or engine to be used I for electric, high. II. If the location of the well, tunnel, or other development work is less than one-fourth mile from the area or stream channel, give the distance to the nearest point on each of such channels a edifference in elevation between the stream bed and the ground surface at the source of development edifference in elevation between the stream bed and the ground surface at the source of development edifference in elevation between the stream bed and the ground surface at the source of development edifference in elevation between the stream bed and the ground surface at the source of development edifference in elevation between the stream bed and the ground surface at the source of development edifference in elevation between the stream bed and the ground surface at the source of development edifference in elevation between the stream bed and the ground surface at the source of development edifference in elevation between the stream bed and the ground surface at the source of development edifference in elevation between the stream bed and the ground surface at the source of development edifference in elevation between the stream bed and the ground surface at the source of development edifference in elevation between the edifference in elevation to the stream bed and the ground surface at the source of the edifference in elevation to the edifference in elevation to the edifference in elevation to t	9. (a) G	ive dimensions at ed	ich point of can	al where materially changed	in size, stating miles fro
(b) At miles from headgate; width on top (at water line) feet; width on bottom feet; depth of water feet feet fall per one thousand feet. (c) Length of pipe, 1700 ft.; size at intake 5" in.; in size at 1100 om intake 4" in.; size at place of use 3" in.; difference in elevation between take and place of use, 50 ft. Is grade uniform? X10. If pumps are to be used, give size and type Bycen Jackson Turbing 6" Clive horsepower and type of motor or engine to be used 5 hp. electric, high. 11. If the location of the well, tunnel, or other development work is less than one-fourth mile free natural stream or stream channel, give the distance to the nearest point on each of such channels a edifference in elevation between the stream bed and the ground surface at the source of development approximate the surface of the surface at the source of development approximate the surface of use 12. Location of area to be irrigated, or place of use 12. Location of area to be irrigated, or place of use 13. Sully SELY 9. Sully 9. Su	eadgate. At he	eadgate: width on to	p (at water line	?)	feet; width on botto
(b) At miles from headgate: width on top (at water line) feet; width on bottom feet; depth of water feet all per one thousand feet. (c) Length of pipe, 1200 ft.; size at intake 5" in.; in size at 1100 mintake 4f in.; size at place of use 3" in.; difference in elevation between take and place of use. 250 ft. Is grade uniform? Estimated capacity 250 ft. Is grade uniform? Lift pumps are to be used, give size and type Bycen Jacksen turbine, 6 Cive horsepower and type of motor or engine to be used. 11. If the location of the well, tunnel, or other development work is less than one-fourth mile from a training at free mor stream channel, give the distance to the nearest point on each of such channels a edifference in elevation between the stream bed and the ground surface at the source of development work is less than one-fourth mile from the elevation between the stream bed and the ground surface at the source of development work is less than one-fourth mile from the elevation between the stream bed and the ground surface at the source of development work is less than one-fourth mile from the elevation between the stream bed and the ground surface at the source of development work is less than one-fourth mile from the elevation between the stream bed and the ground surface at the source of development work is less than one-fourth mile from the elevation between the stream bed and the ground surface at the source of development work is less than one-fourth mile from the elevation between the stream bed and the ground surface at the source of development work is less than one-fourth mile from the elevation between the stream of the elevation between t		feet; depth of w	ater	feet; grade	feet fall per o
feet; width on bottom feet; depth of water feet and feet. (c) Length of pipe, 1700 ft.; size at intake I'' in.; in size at 1100 om intake I'' in.; size at place of use I'' in.; difference in elevation between the and place of use, 50 ft. Is grade uniform? Estimated capacity and the and place of use, 50 ft. Is grade uniform? Estimated capacity and the strength of the size and type Is grade uniform? X10. If pumps are to be used, give size and type Square Tacksen Turbine, 6 Give horsepower and type of motor or engine to be used 15 hp. cleatic, high finatural stream or stream channel, give the distance to the nearest point on each of such channels a edifference in elevation between the stream bed and the ground surface at the source of developmen approximately I mile to nearest stream. 12. Location of area to be irrigated, or place of use Township Revenue Taley I mile to nearest stream. Number server to be irrigated, or place of use Township Revenue Taley I mile To nearest Stream. Number server to be irrigated to the place of use I should be irrigated to the stream the stream to the place of use I should be irrigated.
