To Appropriate the Ground Waters of the State of Oregon

I, Dahle & Sons
(Name of applicant)
of West Fall
(Postoffice Address), county of Walker

state of Oregon, do hereby make application for a permit to appropriate the following described ground waters of the state of Oregon, SUBJECT TO EXISTING RIGHTS:

If the applicant is a corporation, give date and place of incorporation

1. Give name of nearest stream to which the well, tunnel or other source of water development is situated Dry Creek and Clover Creek
(Name of stream)

tributary of Bully Creek

* 2. The amount of water which the applicant intends to apply to beneficial use is _____ cubic feet per second or 1500 gallons per minute. #1 500GPM
#2 500GPM
#3 500GPM } ~~not to exceed 1500GPM total~~

3. The use to which the water is to be applied is irrigation (Supplemental)

4. The well or other source is located _____ ft. _____ and _____ ft. _____ from the _____ corner of Well #1 S 21° 08' E - 1492 feet from NW Cor Sec 23 T18S R41E
(Section or subdivision)

Well #2 S 2° 13' E 2470 feet from NW Cor Sec 22 T18S R41E
(If preferable, give distance and bearing to section corner)

Well #3 S 65° 50' E 541 feet from NW Cor Sec 22 T18S R41E
(If there is more than one well, each must be described. Use separate sheet if necessary)

being within the #1 SW NW of Sec. 23, Twp. T18S, R. R41E
#2 SW SW
#3 NW NW of Sec. 22, Twp. T18S, R. R41E
W. M., in the county of Walker

5. The Portable Sprinkler to be see Note miles
(Canal or pipe line) in length, terminating in the _____ of Sec. _____, Twp. _____,
(Smallest legal subdivision) R. _____, W. M., the proposed location being shown throughout on the accompanying map.

6. The name of the well or other works is Dahle Wells #1, #2, & #3

DESCRIPTION OF WORKS

7. If the flow to be utilized is artesian, the works to be used for the control and conservation of the supply when not in use must be described.

8. The development will consist of 3 wells having a
(Give number of wells, tunnels, etc.) diameter of 1 1/2 inches and an estimated depth of 2100 feet. It is estimated that 1100
2 1/2 feet of the well will require Steel casing. Depth to water table is estimated 300
(Kind) 3100

9. (a) Give dimensions at each point of canal where materially changed in size, stating miles from headgate. At headgate: width on top (at water line) feet; width on bottom feet; depth of water feet; grade feet fall per one thousand feet.

(b) At miles from headgate: width on top (at water line) feet; width on bottom feet; depth of water feet; grade feet fall per one thousand feet.

(c) Length of pipe, ft.; size at intake, in.; in size at ft. from intake in.; size at place of use in.; difference in elevation between intake and place of use, ft. Is grade uniform? Estimated capacity, sec. ft.

10. If pumps are to be used, give size and type
 1 Berkeley Turbine 8 Dis
 2 Berkeley Turbine 10 Dis
 3 Berkeley Turbine 8 Dis

Give horsepower and type of motor or engine to be used
 1 120
 2 120
 3 150 H P Elect

11. If the location of the well, tunnel, or other development work is less than one-fourth mile from a natural stream or stream channel, give the distance to the nearest point on each of such channels and the difference in elevation between the stream bed and the ground surface at the source of development

12. Location of area to be irrigated, or place of use

Township N. or S.	Range E. or W. of Willamette Meridian	Section	Forty-acre Tract	Number Acres To Be Irrigated
18 S	41 E	26	SW NE E	40
			SE NE E	25.5
			NE SE E	4
			NW SE E	3.5 21.5
				<u>91</u> 73

(If more space required, attach separate sheet)

Character of soil 5.11 loam
 Kind of crops raised Hay pasture

MUNICIPAL SUPPLY—

13. To supply the city of
in county, having a present population of
and an estimated population of in 19.....

ANSWER QUESTIONS 14, 15, 16, 17 AND 18 IN ALL CASES

- 14. Estimated cost of proposed works, \$..... 70,000.00
- 15. Construction work will begin on or before Started
- 16. Construction work will be completed on or before June 1970
- 17. The water will be completely applied to the proposed use on or before June 1970

18. If the ground water supply is supplemental to an existing water supply, identify any application for permit, permit, certificate or adjudicated right to appropriate water, made or held by the applicant. All supplemental to existing right through Reeves Ditch Per 2055 John Zimmerman Molheur River Adj. Priority 1876 G.L. Dabbs Sons by G.L. Dabbs
(Signature of applicant)

Remarks: Water from wells #2 + #3 will be pumped in to creek channel and diverted through Reeves ditch at Div Dam located NW NW Sec 27. Water from well #1 will be pumped into Dry Creek and directed into Reeves ditch as shown.

* Division from wells to be related with Application 4486.

STATE OF OREGON, }
County of Marion, } ss.

This is to certify that I have examined the foregoing application, together with the accompanying maps and data, and return the same for Correction and Completion completion

In order to retain its priority, this application must be returned to the State Engineer, with corrections on or before February 2nd, 1969
June 25th 69

LARRY W. JEBOUSEK
ASSISTANT

County of Marion,

ss.

This is to certify that I have examined the foregoing application and do hereby grant the same, SUBJECT TO EXISTING RIGHTS and the following limitations and conditions:

The right herein granted is limited to the amount of water which can be applied to beneficial use and shall not exceed 0.91 cubic feet per second measured at the point of diversion from the well or source of appropriation, or its equivalent in case of rotation with other water users, from three wells being 0.30 cfs from well No. 1, 0.30 cfs from well No. 2 and 0.31 cfs from well No. 3

The use to which this water is to be applied is supplemental irrigation

If for irrigation, this appropriation shall be limited to 1/80th of one cubic foot per second or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 3

acre feet per acre for each acre irrigated during the irrigation season of each year; provided further that the right allowed herein shall be limited to any deficiency in the available supply of any prior right existing for the same land and shall not exceed the limitation allowed herein provided further that in the event operation of these wells result in reduction of the natural flow of Bully Creek and Dry Creek... and provided further that the amount of water rediverted from the channel of Bully Creek and Dry Creek shall not exceed the amount by which the flow of Bully and Dry Creeks at the points of rediversion is increased above the natural flow by the operation of said wells

and shall be subject to such reasonable rotation system as may be ordered by the proper state officer.

The well shall be cased as necessary in accordance with good practice and if the flow is artesian the works shall include proper capping and control valve to prevent the waste of ground water.

The works constructed shall include an air line and pressure gauge or an access port for measuring line, adequate to determine water level elevation in the well at all times.

The permittee shall install and maintain a weir, meter, or other suitable measuring device, and shall keep a complete record of the amount of ground water withdrawn.

The priority date of this permit is November 18, 1968

Actual construction work shall begin on or before July 11, 1970 and shall thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 1970

Complete application of the water to the proposed use shall be made on or before October 1, 1971

WITNESS my hand this 11th day of July, 1969

Chris L. Wheeler
