Permit No. G-..**4496**............

CERTIFICATE NO. *44099*

APPLICATION FOR A PERMIT

To Appropriate the Ground Waters of the State of Oregon

I, ...Clara U. Pape..
(Name of applicant)

of ....4770 S. Santiam Highway, Lebanon..................., county of ......Linn............,
(Postoffice Address)

state of ....Oregon..................., do hereby make application for a permit to appropriate the following described ground waters of the state of Oregon, SUBJECT TO EXISTING RIGHTS:

If the applicant is a corporation, give date and place of incorporation

....

1. Give name of nearest stream to which the well, tunnel or other source of water development is

situated ....South Santiam River..
(Name of stream)

.... tributary of ..Willamette River..............

2. The amount of water which the applicant intends to apply to beneficial use is .... cubic feet per second or ....200...... gallons per minute.

3. The use to which the water is to be applied is ....Irrigation........................

....

4. The well or other source is located ...N. 22° 30' W. 12.6 chains...... ft. .... and .... ft. .... from the SE
(N. or S.)   (E. or W.)

corner of ......S 24, T. 12 S., R. 2 W...
(Section or subdivision)

....
(If preferable, give distance and bearing to section corner)

....
(If there is more than one well, each must be described. Use separate sheet if necessary)

being within the ....SE¼ of SE¼........................ of Sec. ....24...., Twp. ...12 S..., R. ...2 W...,

W. M., in the county of ......Linn..

5. The ....main pipe line........................ to be ....1100 feet............ ~~miles~~
(Canal or pipe line)

in length, terminating in the ......SW¼ of SW¼.......... of Sec. ..19........, Twp. ...12 S....,
(Smallest legal subdivision)

R. ...1 W...., W. M., the proposed location being shown throughout on the accompanying map.

6. The name of the well or other works is . ...Clara U. Pape No. 1....................

DESCRIPTION OF WORKS

7. If the flow to be utilized is artesian, the works to be used for the control and conservation of the supply when not in use must be described.

....

....

....

8. The development will consist of ......one pump well.................... having a
(Give number of wells, tunnels, etc.)

diameter of ....36........ inches and an estimated depth of ....46.6...... feet. It is estimated that 46.6......

feet of the well will require ....concrete............ casing. Depth to water table is estimated ...18.....
(Kind)   (Feet)

....

9. (a) Give dimensions at each point of canal where materially changed in size, stating miles from headgate. At headgate: width on top (at water line) .... feet; width on bottom .... feet; depth of water ....feet; grade .... feet fall per one thousand feet.

(b) At .... miles from headgate: width on top (at water line) .... feet; width on bottom .... feet; depth of water .... feet; grade .... feet fall per one thousand feet.

(c) Length of pipe, ...1100........... ft.; size at intake ....4........... in.; in size at ....1100........ ft. from intake ....4........... in.; size at place of use ....3........... in.; difference in elevation between intake and place of use, ...30........... ft. Is grade uniform? ....Yes........... Estimated capacity, ...0.5...... sec. ft.

10. If pumps are to be used, give size and type Deep well turbine ....

Give horsepower and type of motor or engine to be used ...... 10 H. P. electric ....

11. If the location of the well, tunnel, or other development work is less than one-fourth mile from a natural stream or stream channel, give the distance to the nearest point on each of such channels and the difference in elevation between the stream bed and the ground surface at the source of development

....

....

Section 24, T. 12 S., R 2 W.
12. Location of area to be irrigated, or place of use ..Sections 19 and 30, T. 12, R. 1 W.......

Township N. or S.	Range E. or W. of Willamette Meridian	Section	Forty-acre Tract	Number Acres To Be Irrigated
12 S	1 W	19	SW¼ of SW¼	20.0
12 S	1 W	30	NW¼ of NW¼	0.9
12 S	2 W	24	SE¼ of SE¼	8.7
			Total	29.6

(If more space required, attach separate sheet)

Character of soil ......Heavy clay loam..

Kind of crops raised ......Forage...

MUNICIPAL SUPPLY—   G 4496

    13. To supply the city of ....

in .... county, having a present population of ....

and an estimated population of .... in 19........

<center>ANSWER QUESTIONS 14, 15, 16, 17 AND 18 IN ALL CASES</center>

    14. Estimated cost of proposed works, $ 2400.00................

    15. Construction work will begin on or before ...Aug. 3, 1967...

    16. Construction work will be completed on or before .....Aug. 7, 1967.....................................

    17. The water will be completely applied to the proposed use on or before ...Oct. 1, 1972............

    18. If the ground water supply is supplemental to an existing water supply, identify any application for permit, permit, certificate or adjudicated right to appropriate water, made or held by the

applicant. ....

STATE OF OREGON, } ss.
County of Marion,

PERMIT

This is to certify that I have examined the foregoing application and do hereby grant the same, SUBJECT TO EXISTING RIGHTS and the following limitations and conditions:

The right herein granted is limited to the amount of water which can be applied to beneficial use and shall not exceed ......0.37..... cubic feet per second measured at the point of diversion from the well or source of appropriation, or its equivalent in case of rotation with other water users, from ..a well.......

The use to which this water is to be applied is ...irrigation....................

If for irrigation, this appropriation shall be limited to ....1/80th.... of one cubic foot per second or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed ..2½..... acre feet per acre for each acre irrigated during the irrigation season of each year; ....

and shall be subject to such reasonable rotation system as may be ordered by the proper state officer.

The well shall be cased as necessary in accordance with good practice and if the flow is artesian the works shall include proper capping and control valve to prevent the waste of ground water.

The works constructed shall include an air line and pressure gauge or an access port for measuring line, adequate to determine water level elevation in the well at all times.

The permittee shall install and maintain a weir, meter, or other suitable measuring device, and shall keep a complete record of the amount of ground water withdrawn.

The priority date of this permit is ....January 27, 1969..........

Actual construction work shall begin on or before ....August 25, 1970.......... and shall thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 19.70......

Extended to Oct. 1 1973

Complete application of the water to the proposed use shall be made on or before October 1, 1971....

Extended to Oct. 1 1972

Extended to Oct. 1 1973

WITNESS my hand this ...25th... day of ....August...................., 19.69...

_____
STATE ENGINEER
