Remarks: Due to a rot problem with the onion	n crop which may or may not be
caused by irrigation from river water, I wish to	apply for a ground water right
permit & use a well to irrigate my acreage for tw	o years to experiment with the
rot problem. My acreage is now covered by an exi	sting right from Little Pudding
River which I do not wish to relinquish nor do I	wish to call my well filing
supplemental until I find out at the end of the t	wo year period what is causing
the rot problem. At that time I will decide whet	her to keep the river right &
use the well for supplemental or whether to cance	
for primary irrigation.
