Permit No. G- 4681

CERTIFICATE NO. 39749

APPLICATION FOR A PERMIT

To Appropriate the Ground Waters of the State of Oregon

J. 7/21
I, City of Mt Ulmon
of Mil Drawn regon , county of Lasit,
state of, do hereby make application for a permit to appropriate the following described ground waters of the state of Oregon, SUBJECT TO EXISTING RIGHTS:
If the applicant is a corporation, give date and place of incorporation
1. Give name of nearest stream to which the well, tunnel or other source of water development is
(Name of stream) tributary of lene (lay jine)
2. The amount of water which the applicant intends to apply to beneficial use is cubic feet per second or
3. The use to which the water is to be applied is
municipal
4. The well or other source is located 2323ft. School and 540 ft. Cost from the 1/9.
corner of 525 / 25 7 7 3 5 (Section or subdivision)
(Section or subdivision)
(If preferable, give distance and bearing to section corner)
(If there is more than one well, each must be described. Use separate sheet if necessary)
being within the Sulfa 1/16 1/4 of Sec. 28, Twp. 30 5,
W. M., in the county of Jeanne
5. The to be miles
in length, terminating in the
R, W. M., the proposed location being shown throughout on the accompanying map.
6. The name of the well or other works is . Infiltration Itelesy Sys
DESCRIPTION OF WORKS
7. If the flow to be utilized is artesian, the works to be used for the control and conservation of the supply when not in use must be described.
8. The development will consist of having a (Give number of wells, tunnels, etc.)
diameter of inches and an estimated depth of feet. It is estimated that
feet of the well will require casing. Depth to water table is estimated(Feet)

PERMIT

County of Marion,

This is to certify that I have examined the foregoing application and do hereby grant the same,

SUBJECT TO EXISTING RIGHTS and the following limitations and conditions: The right herein granted is limited to the amount of water which can be applied to beneficial use or source of appropriation, or its equivalent in case of rotation with other water users, from A. Well...... (infiltration gallery) The use to which this water is to be applied is ... municipal..... If for irrigation, this appropriation shall be limited to of one cubic foot per second or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed acre feet per acre for each acre irrigated during the irrigation season of each year; the appropriation of water shall be limited only to the extent that it does not impair or substantially interfere with existing surface water rights of others, and shall be subject to such reasonable rotation system as may be ordered by the proper state officer. The well shall be cased as necessary in accordance with good practice and if the flow is artesian the works shall include proper capping and control valve to prevent the waste of ground water. The works constructed shall include an air line and pressure gauge or an access port for measuring line, adequate to determine water level elevation in the well at all times. The permittee shall install and maintain a weir, meter, or other suitable measuring device, and shall keep a complete record of the amount of ground water withdrawn. Actual construction work shall begin on or beforeJune 4, 1971...... and shall thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 19.71 Complete application of the water to the proposed use shall be made on or before October 1, 1972... WITNESS my hand this 4th day of STATE ENGINEER This instrument was first received in the office of the State Engineer at Salem, Oregon CHRIS L.
