PERMIT

This is to certify that I have examined the foregoing application and do hereby grant the same, SUBJECT TO EXISTING RIGHTS and the following limitations and conditions:

The right herein granted is limited to the amount of water which can be applied to b	peneficial use
and shall not exceed .0.52 cubic feet per second measured at the point of diversion f	from the well
or source of appropriation, or its equivalent in case of rotation with other water users, from	1
well (sump)	······
The use to which this water is to be applied isirrigation	
If for irrigation, this appropriation shall be limited to1/80th of one cubic for	ot per second
or its equivalent for each acre irrigated and shall be further limited to a diversion of not to e	exceed3
acre feet per acre for each acre irrigated during the irrigation season of each year;	
and shall be further limited to appropriation of water only to the exten	t that
.it does not impair or substantially interfere with existing surface water	errighta
of others.	

and shall be subject to such reasonable rotation system as may be ordered by the proper state	e officer.
The well shall be cased as necessary in accordance with good practice and if the flow	w is artesian
the works shall include proper capping and control valve to prevent the waste of ground water. The works constructed shall include an air line and pressure gauge or an access port for	
line, adequate to determine water level elevation in the well at all times. The permittee shall install and maintain a weir, meter, or other suitable measuring	•
shall keep a complete record of the amount of ground water withdrawn.	,
