

APPLICATION FOR A PERMIT

To appropriate the Ground Waters of the State of Oregon

I, Creswell Union High School, District U-12 of Box 67, Creswell, county of Lane, state of Oregon

do hereby make application for a permit to appropriate the following described ground waters of the state of Oregon, SUBJECT TO EXISTING RIGHTS:

If the applicant is a corporation, give date and place of incorporation

This Union High School was formed in 1933.

1. Give name of nearest stream to which the well, tunnel or other source of water development is situated Coast Fork, Willamette River

tributary of

2. The amount of water which the applicant intends to apply to beneficial use is 64 cubic feet per second or 64 gallons per minute.

3. The use to which the water is to be applied is irrigation of school grounds; stand-by well for fire fighting; well was started 7-29-57 for domestic purposes

4. The well or other source is located 363 ft. South and 752 ft. East from the NW corner of Caleb Colvin DLC #53

(If preferable, give distance and bearing to section corner)

(If there is more than one well, each must be described. Use separate sheet if necessary)

being within the 1/4 COR. Sec. 15 & 1/4 NE 1/4 SE 1/4 of Sec. 15, Twp. 19S, R. 3W, W. M., in the county of Lane

5. The to be miles in length, terminating in the of Sec. , Twp. R. , W. M., the proposed location being shown throughout on the accompanying map.

6. The name of the well or other works is Creswell Union High School Well

DESCRIPTION OF WORKS

7. If the flow to be utilized is artesian, the works to be used for the control and conservation of the supply when not in use must be described.

8. The development will consist of one well having a diameter of 6 inches and an estimated depth of unknown feet. It is estimated that unknown feet of the well will require 6" .280" thick standard casing. Depth to water table is estimated 260 to 270 feet.

CANAL SYSTEM OR PIPE LINE—

9. (a) Give dimensions at each point of canal where materially changed in size, stating miles from headgate. At headgate: width on top (at water line) feet; width on bottom feet; depth of water feet; grade feet fall per one thousand feet.

(b) At miles from headgate: width on top (at water line) feet; width on bottom feet; depth of water feet; grade feet fall per one thousand feet.

(c) Length of pipe, ft.; size at intake, in.; in size at ft. from intake in.; size at place of use in.; difference in elevation between intake and place of use, ft. Is grade uniform? Estimated capacity, sec. ft.

10. If pumps are to be used, give size and type Unawn at Present

Give horsepower and type of motor or engine to be used Same

11. If the location of the well, tunnel, or other development work is less than one-fourth mile from a natural stream or stream channel, give the distance to the nearest point on each of such channels and the difference in elevation between the stream bed and the ground surface at the source of development

12. Location of area to be irrigated, or place of use

Township N. or S.	Range E. or W. of Willamette Meridian	Section	Forty-acre Tract	Number Acres To Be Irrigated
19 S	3 W	14	SW 1/4 NW 1/4	2 1/2
			NW 1/4 SW 1/4	2 1/2
		15	SE 1/4 NE 1/4	3 0
			NE 1/4 SE 1/4	4 1/2
				11 1/2 acres

(If more space required, attach separate sheet)

Character of soil

Kind of crops raised

MUNICIPAL SUPPLY—

13. To supply the city of

in **county, having a present population of**

and an estimated population of **in 19**.....

ANSWER QUESTIONS 14, 15, 16, 17 AND 18 IN ALL CASES

14. Estimated cost of proposed works, \$ 1,550 including pump

15. Construction work will begin on or before began 7-29-57 **because of intent for domestic as well as other proposed uses for which permit is herein applied.**

16. Construction work will be completed on or before August 31, 1957.....

17. The water will be completely applied to the proposed use on or before August 31, 1957.....

18. If the ground water supply is supplemental to an existing water supply, identify any application for permit, permit, certificate or adjudicated right to appropriate water, made or held by the applicant. Only existing water supply is our connection to the main of the City of

Creswell water supply,

Leo W. Myers
Supt., Creswell Senior High School, District U-12

Remarks: The board of directors feel that a well constructed here on the school site will be beneficial to the patrons of the district as well as to the city of Creswell. The commercial water rate given us by the city is fair and just but our water bills during the months we irrigate athletic fields and grounds are high compared to the total funds available in the annual school budget. Too, the city is growing and the city will have to expand its source of water supplies shortly, also. Another well, owned by one of the city's principal users of water, will decrease the urgency of the city's increasing its water supply.

Since part of the intended use of the well is group domestic under 15,000 gallons per day the well was commenced July 29, 1957; however, we are very desirous of obtaining the State Engineer Permit which will allow us to use the well for irrigation and stand-by purposes. The well, as commenced yesterday, July 29, 1957 is actually being drilled on a test hole basis with the hope of developing a well if findings are favorable.

Your efforts to expedite immediate issuance of a permit will be greatly appreciated.

STATE OF OREGON, }
County of Marion, } ss.

This is to certify that I have examined the foregoing application, together with the accompanying maps and data, and return the same for

In order to retain its priority, this application must be returned to the State Engineer, with corrections on or before, 19.....

WITNESS my hand this day of, 19

STATE ENGINEER

By ASSISTANT

County of Marion,

This is to certify that I have examined the foregoing application and do hereby grant the same, SUBJECT TO EXISTING RIGHTS and the following limitations and conditions:

The right herein granted is limited to the amount of water which can be applied to beneficial use and shall not exceed 0.15 cubic feet per second measured at the point of diversion from the well or source of appropriation, or its equivalent in case of rotation with other water users, from Creswell Union High School Well.

The use to which this water is to be applied is irrigation

If for irrigation, this appropriation shall be limited to 1/80 of one cubic foot per second or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 2 1/2 acre feet per acre for each acre irrigated during the irrigation season of each year;

and shall be subject to such reasonable rotation system as may be ordered by the proper state officer.

The well shall be cased as necessary in accordance with good practice and if the flow is artesian the works shall include proper capping and control valve to prevent the waste of ground water.

The works constructed shall include an air line and pressure gauge or an access port for measuring line, adequate to determine water level elevation in the well at all times.

The permittee shall install and maintain a weir, meter, or other suitable measuring device, and shall keep a complete record of the amount of ground water withdrawn.

The priority date of this permit is August 2, 1957

Actual construction work shall begin on or before August 20, 1958 and shall thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 1958

Complete application of the water to the proposed use shall be made on or before October 1, 1959

WITNESS my hand this 20th day of August, 1957
