Permit No. G-

CERTIFICATE NO. 48182

APPLICATION FOR A PERMIT

To Appropriate the Ground Waters of the State of Oregon

| I, Alan Kraemer (Name of applicant) |
|--|
| (Name of applicant) |
| of Route Box 10 Mt. Angel, county of Marion, |
| state of |
| If the applicant is a corporation, give date and place of incorporation |
| 1. Give name of nearest stream to which the well, tunnel or other source of water development is |
| situated Zollner Creek (Name of stream) |
| tributary of Pudding River |
| 2. The amount of water which the applicant intends to apply to beneficial use is cubic feet per second or gallons per minute. |
| 3. The use to which the water is to be applied is Irrigation and Jugolamante |
| Irrigation |
| 4. The well or other source is located 320 ft. U and 300 ft. E from the SW corner of See 2 765 RIW WM |
| corner of See 2 765 RIW WM (Section or subdivision) (E. or W.) (E. or W.) (E. or W.) |
| (If preferable, give distance and bearing to section corner) |
| (in presentable, give distance and bearing to section corner) |
| (If there is more than one well, each must be described. Use separate sheet if necessary) |
| being within the 5 W/4 5 W/4 of Sec, Twp 6 5 , R/ W, |
| W. M., in the county of |
| 5. The to be miles |
| in length, terminating in the |
| R, W. M., the proposed location being shown throughout on the accompanying map. |
| 6. The name of the well or other works is |
| DESCRIPTION OF WORKS |
| 7. If the flow to be utilized is artesian, the works to be used for the control and conservation of the upply when not in use must be described. |
| |
| |
| 8. The development will consist of |
| iameter of |
| eet of the well will require |
| may start construction of well in first mech of August 1975 |

| feet; depth of water feet; grade feet fall per one and feet. (b) At miles from headgate: width on top (at water line) feet; width on bottom feet; depth of water feet; feet; width on bottom feet; feet; depth of water feet; feet; feet fall per one thousand feet. (c) Length of pipe, ft.; size at intake in.; in size at ft. intake in.; size at place of use in.; difference in elevation between e and place of use, ft. Is grade uniform? Estimated capacity, sec. ft. 10. If pumps are to be used, give size and type DAP. Give horsepower and type of motor or engine to be used 11. If the location of the well, tunnel, or other development work is less than one-fourth mile from ural stream or stream channel, give the distance to the nearest point on each of such channels and ifference in elevation between the stream bed and the ground surface at the source of development if the stream of the stream bed and the ground surface at the source of development in the stream bed and the ground surface at the source of development in the stream bed and the ground surface at the source of development in the stream bed and the ground surface at the source of development in the stream bed and the ground surface at the source of development in the stream bed and the ground surface at the source of development in the stream bed and the ground surface at the source of development in the stream bed and the ground surface at the source of development in the stream bed and the ground surface at the source of development in the stream bed and the ground surface at the source of development in the stream bed and the ground surface at the source of development in the stream bed and the ground surface at the source of development in the stream bed and the ground surface at the source of development in the stream bed and the ground surface at the source of development in the stream bed and the ground surface at the source of development in the stream bed and the ground surface at the source of development in the stream bed and the ground surfac | | | | ne) | |
|--|--------------------|---|-----------------|---|---------------------------|
| (b) At miles from headgate: width on top (at outer line) | | feet; depth of wa | ter | feet; grade | feet fall per one |
| feet; width on bottom | sand feet. | | | | |
| feet fall per one thousand feet. (c) Length of pipe, ft., size at intake in.; in size at ft. ft. intake in.; size at place of use in.; difference in elevation between e and place of use, ft. Is grade uniform? Estimated capacity, sec. ft. 10. If pumps are to be used, give size and type 20 kg. Give horsepower and type of motor or engine to be used 11. If the location of the well, tunnel, or other development work is less than one-fourth mile from ural stream or stream channel, give the distance to the nearest point on each of such channels and ifference in elevation between the stream bed and the ground surface at the source of development ifference in elevation of area to be irrigated, or place of use 12. Location of area to be irrigated, or place of use 13. If the location of area to be irrigated, or place of use 14. Location of area to be irrigated, or place of use 15. Sulf Mally 100 Sulfy 100 | (b) At | mile | s from heads | gate: width on top (at water l | ine) |
| (c) Length of pipe, | | feet; width on bo | ottom | feet; depth of was | ter feet; |
| intake in.; size at place of use in.; difference in elevation between e and place of use, ft. Is grade uniform? Estimated capacity, sec. ft. 10. If pumps are to be used, give size and type 20 kg. Give horsepower and type of motor or engine to be used 11. If the location of the well, tunnel, or other development work is less than one-fourth mile from ural stream or stream channel, give the distance to the nearest point on each of such channels and difference in elevation between the stream bed and the ground surface at the source of development if the stream bed and the ground surface at the source of development if the source of development if the stream bed and the ground surface at the source of development if the source of development is surface at the source of development if the source of development is surface at the source of development if the source of development is surface at the source of development is surface at the source of development is surface. 12. Location of area to be irrigated, or place of use for the surface of t | e | feet fall pe | r one thousa | nd feet. | |
| e and place of use, | (c) Lengtl | n of pipe, | ft.; si: | ze at intake in.; i | in size at ft. |
| Sec. ft. 10. If pumps are to be used, give size and type 2D hgp. Give horsepower and type of motor or engine to be used | intake | in.; size | at place of i | ısein.; differ | ence in elevation between |

| | TOOLER TO THE PARTY OF THE PART |

This is to certify that I have examined the foregoing application and do hereby grant the same, SUBJECT TO EXISTING RIGHTS and the following limitations and conditions:

| The right herein granted is limited to the amount of water | which can be applied to beneficial use |
|---|--|
| and shall not exceed0.5 cubic feet per second measured | |
| or source of appropriation, or its equivalent in case of rotation with | 1 4 4 |
| The use to which this water is to be applied is irrigation | on and supplemental irrigation |
| If for irrigation, this appropriation shall be limited to1/8 or its equivalent for each acre irrigated and shall be further limited acre feet per acre for each acre irrigated during the irrigation seaso that the right allowed herein shall be limited to any dupply of any prior right existing for the same land an | n of each year; provided further leficiency in the available |
| limitation allowed homein | |
| | |
| | |
| | |
| The well shall be cased as necessary in accordance with good the works shall include proper capping and control valve to prevent. The works constructed shall include an air line and pressure gline, adequate to determine water level elevation in the well at all. The permittee shall install and maintain a weir, meter, or ot shall keep a complete record of the amount of ground water with | practice and if the flow is artesian the waste of ground water. Jauge or an access port for measuring times. |
| shall keep a complete record of the amount of ground water withdr | rawn. |
| The priority date of this permit isMay 27, 1976 | |
| Actual construction work shall begin on or before August | t 5, 1977 and shall |
| thereafter be prosecuted with reasonable diligence and be complete | |
| Complete application of the water to the proposed use shall be | made on or before October 1, 1978. |
| WITNESS my hand this5th day of Augus | , 19.76 |
