

CANAL SYSTEM OR PIPE LINE—

G 6833

9. (a) Give dimensions at each point of canal where materially changed in size, stating miles from headgate. At headgate: width on top (at water line) 6 inches feet; width on bottom feet; depth of water N.A. feet; grade N.A. feet fall per one thousand feet.

(b) At miles from headgate: width on top (at water line) feet; width on bottom feet; depth of water feet; grade feet fall per one thousand feet.

(c) Length of pipe, ft.; size at intake in.; in size at ft. from intake in.; size at place of use in.; difference in elevation between intake and place of use, ft. Is grade uniform? Estimated capacity, sec. ft.

10. If pumps are to be used, give size and type 50 H.P. 215 GPM 680 TDH submersible

Give horsepower and type of motor or engine to be used 50 H.P. Electric

11. If the location of the well, tunnel, or other development work is less than one-fourth mile from a natural stream or stream channel, give the distance to the nearest point on each of such channels and the difference in elevation between the stream bed and the ground surface at the source of development

12. Location of area to be irrigated, or place of use (See attached map.)

Township N. or S	Range E. or W. of Willamette Meridian	Section	Forty-acre Tract	Number Acres To Be Irrigated
Township 1 S	3 East	25, 26, 35 , 36	-----	No irrigation-domestic use only.

MUNICIPAL SUPPLY—

13. To supply the city of Eastmont Water Company
in Clackamas county, having a present population of 380
and an estimated population of 540 in 1985.

ANSWER QUESTIONS 14, 15, 16, 17 AND 18 IN ALL CASES

- 14. Estimated cost of proposed works, \$ 116,000
- 15. Construction work will begin on or before Completed
- 16. Construction work will be completed on or before Completed
- 17. The water will be completely applied to the proposed use on or before currently used
- 18. If the ground water supply is supplemental to an existing water supply, identify any application for permit, permit, certificate or adjudicated right to appropriate water, made or held by the applicant. None

EASTMONT WATER COMPANY

By: David H. Shaw (David H. Shaw)
President (Signature of applicant)

Remarks: Eastmont Water Company is a private corporation, with a presently existing well and water supply system which supplies 80 users. When completely expanded, the water system will supply 100-120 users. Present expansion plans are under way to permit additional storage of 84,000 gallons, a total of 144,000 gallons. The corporation is in the process of changing its status from private corporation for profit to a private corporation non-profit. It is not contemplated that any additional wells are needed at this time. The expansion requirement is necessary to comply with existing state health requirement as to the number of users who will eventually use the system. Engineering specifications and detail may be obtained from Mr. Cox, Consulting Engineer, PO Box 671, Gresham, Oregon, 97030.

PERMIT

This is to certify that I have examined the foregoing application and do hereby grant the same, SUBJECT TO EXISTING RIGHTS and the following limitations and conditions:

The right herein granted is limited to the amount of water which can be applied to beneficial use and shall not exceed 0.48 cubic feet per second measured at the point of diversion from the well or source of appropriation, or its equivalent in case of rotation with other water users, from Eastmont Water Company Well

The use to which this water is to be applied is Group Domestic use

If for irrigation, this appropriation shall be limited to of one cubic foot per second or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed acre feet per acre for each acre irrigated during the irrigation season of each year;

and shall be subject to such reasonable rotation system as may be ordered by the proper state officer.

The well shall be cased as necessary in accordance with good practice and if the flow is artesian the works shall include proper capping and control valve to prevent the waste of ground water.

The works constructed shall include an air line and pressure gauge or an access port for measuring line, adequate to determine water level elevation in the well at all times.

The permittee shall install and maintain a weir, meter, or other suitable measuring device, and shall keep a complete record of the amount of ground water withdrawn.

The priority date of this permit is June 30, 1976

Actual construction work shall begin on or before September 16, 1977 and shall
Extended to October 1987

thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 1977.....
Extended to October 1987

Complete application of the water to the proposed use shall be made on or before October 1, 1978.....
Extended to Oct. 1, 1982 } 10-1-97

WITNESS my hand this 16th day of September, 1976
