

per min. 250 gpm Hr. 1.9-78

6. The amount of water which the applicant intends to apply to beneficial use is ..... cubic feet  
Well #1 is in continuous service and produce 350 GPM  
per second or ..... 400 ..... gallons per minute. Well # 2 is a standby well and produces  
50 GPM

7. The use to which the water is to be applied is ..... Quasi municipal.....

8. If the flow to be utilized is artesian, the works to be used for the control and conservation of the supply  
when not in use must be described.

9. If the location of the well, or other development work is less than one-fourth mile from a natural  
stream channel, give the distance to the channel and the difference in elevation between the stream bed and the  
ground surface at the source of development.

10.

#### DESCRIPTION OF WORKS

Include length and dimensions of supply ditch or pipeline, size and type of pump and motor, type of irrigation  
system to adequately describe the proposed distribution system.

Well #1 20 H.P. Pump, Well #2 7½ H.P. Pump

2" Water Lines To Users

11. Construction work will begin on or before ..... completed

12. Construction work will be completed on or before ..... completed

13. The water will be completely applied to the proposed use on or before ..... completed

14. If the ground water supply is supplemental to an existing supply, identify the supply and existing  
water right.

## Permit to Appropriate the Public Waters of the State of Oregon

This is to certify that I have examined the foregoing application and do hereby grant the same, SUBJECT TO EXISTING RIGHTS INCLUDING THE EXISTING MINIMUM FLOW POLICIES ESTABLISHED BY THE WATER POLICY REVIEW BOARD and the following limitations and conditions:

The right herein granted is limited to the amount of water which can be applied to beneficial use and shall not exceed ..... 0.56 cubic feet per second measured at the point of diversion from the well or source of appropriation, or its equivalent in case of rotation with other water users, from two wells....

The use to which this water is to be applied is ..... Quasi-municipal from well # 1, with well # 2 used as standby.

If for irrigation, this appropriation shall be limited to ..... of one cubic foot per second or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed ..... acre feet per acre for each acre irrigated during the irrigation season of each year;

and shall be subject to such reasonable rotation system as may be ordered by the proper state officer.

The well shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon.

The works constructed shall include an air line and pressure gauge or an access port for measuring line, adequate to determine water level elevation in the well at all times.

The permittee shall install and maintain a weir, meter, or other suitable measuring device, and shall keep a complete record of the amount of ground water withdrawn.

The priority date of this permit is ..... August 5, 1977

Actual construction work shall begin on or before ..... February 8, 1979 and shall thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 1979.

Complete application of the water to the proposed use shall be made on or before October 1, 1980.

WITNESS my hand this ..... 8th ..... day of ..... February ..... , 1978

*James E. Jackson*  
Water Resources Director
