Permit No. C. 816

APPLICATION FOR A PERMIT

To Appropriate the Ground Waters of the State of Oregon

1. CHAS NEWTON DAVIS
of Br. 1 BU1334 WOODBURN, country of MARION
state of
If the applicant is a corporation, give date and place of incorporation
1. Give name of nearest stream to which the well, tunnel or other source of water development is
situated CHAMPOFG CREEK (Name of stream)
tributary of William TT 1945
2. The amount of water which the applicant intends to apply to beneficial use is cubic feet per second or ACO gallons per minute.
3. The use to which the water is to be applied is PRICATION
(120 Chors
4. The well or other source is located ft. and ft. from the NW corner of JOSEPH BIRNABIE DLC.
(Section or subdivision) S 55°15'E - 51,736 Ch (If preferable, give distance and bearing to section corner)
being within the
being within the FNW Top. of Sec. 26, Twp. A. R. 266,
W. M., in the county of
5. The PORTABLE PIPE to be miles
in length, terminating in the
R. W. M., the proposed location being shown throughout on the accompanying map.
6. The name of the well or other works is
DESCRIPTION OF WORKS
7. If the flow to be utilized is artesian, the works to be used for the control and conservation of the supply when not in use must be described.
· · · · · · · · · · · · · · · · · · ·
8. The development will consist of (Give number of wells tunnels, etc.)
diameter of
feet of the well will require casing. Depth to water table is estimated (Kind)

feet; depth of water ind feet. (b) At miles from headgate: w feet; width on bottom feet fall per one thousand feet (c) Length of pipe, ft.; size at intake in.; size at place of use e and place of use, ft. 10. If pumps are to be used, give size and type REMA Give horsepower and type of motor or engine to 11. If the location of the well, tunnel, or other deral stream or stream channel, give the distance lifference in elevation between the stream bed and 12. Location of area to be irrigated, or place of Township Nore Williamerite Meridian Bection	idth on top (at water line)
feet; width on bottom feet fall per one thousand feet (c) Length of pipe, ft.; size at intake e and place of use, sec. ft. 10. If pumps are to be used, give size and type FEMA Give horsepower and type of motor or engine to 11. If the location of the well, tunnel, or other deral stream or stream channel, give the distance lifference in elevation between the stream bed and 12. Location of area to be irrigated, or place of	intake, in.; in size at in.; difference in elevation with the nearest point on each of such chall the ground surface at the source of de 34/4
feet; width on bottom feet fall per one thousand feet (c) Length of pipe, ft.; size at intake in.; size at place of use e and place of use, ft. Is grad sec. ft. 10. If pumps are to be used, give size and type PBING Give horsepower and type of motor or engine to 11. If the location of the well, tunnel, or other deral stream or stream channel, give the distance ifference in elevation between the stream bed and 12. Location of area to be irrigated, or place of	intake, in.; in size at in.; difference in elevation e uniform? Estimated be used velopment work is less than one-fourth to the nearest point on each of such chall the ground surface at the source of default.
feet; width on bottom feet fall per one thousand feet (c) Length of pipe, ft.; size at ntake in.; size at place of use and place of use, sec. ft. 10. If pumps are to be used, give size and type (Sive horsepower and type of motor or engine to (I) If the location of the well, tunnel, or other deal stream or stream channel, give the distance ifference in elevation between the stream bed and (C) Length of pipe, ft.; size at ft. Is grad sec. ft. 11. If the location of the used, give size and type (C) Length of use, ft.; size at ft. Is grad sec. ft. 12. Location of area to be irrigated, or place of Township Range Range Rection	intake, in.; in size at in.; difference in elevation e uniform? Estimated be used velopment work is less than one-fourth to the nearest point on each of such chall the ground surface at the source of default.
feet fall per one thousand feet (c) Length of pipe, ft.; size at mtake in.; size at place of use and place of use, ft. Is grad sec. ft. 10. If pumps are to be used, give size and type (Sive horsepower and type of motor or engine to (I) If the location of the well, tunnel, or other deal stream or stream channel, give the distance ifference in elevation between the stream bed and (C) Length of pipe, ft.; size at (C) Length of pipe.	intake, in size at in.; difference in elevation e uniform? Estimated be used velopment work is less than one-fourth to the nearest point on each of such child the ground surface at the source of default.
(c) Length of pipe, ft.; size at make in.; size at place of use and place of use, ft. Is grad sec. ft. 10. If pumps are to be used, give size and type five horsepower and type of motor or engine to the phase for the well, tunnel, or other deal stream or stream channel, give the distance if ference in elevation between the stream bed and for the first file. 12. Location of area to be irrigated, or place of the place	intake, in; in size at in.; difference in elevation e uniform? Estimated be used velopment work is less than one-fourth to the nearest point on each of such child the ground surface at the source of default.
sec. ft. 10. If pumps are to be used, give size and type Clive horsepower and type of motor or engine to 11. If the location of the well, tunnel, or other deal stream or stream channel, give the distance difference in elevation between the stream bed and the stream of the stream	be used velopment work is less than one-fourth to the nearest point on each of such chil the ground surface at the source of de 34/4
10. If pumps are to be used, give size and type PBINK Give horsepower and type of motor or engine to If PHASE ELECTRIC MINE 11. If the location of the well, tunnel, or other deal stream or stream channel, give the distance ifference in elevation between the stream bed and th	velopment work is less than one-fourth note to the nearest point on each of such chil the ground surface at the source of design and the source of
10. If pumps are to be used, give size and type (BING Give horsepower and type of motor or engine to (I) I PHASE II. If the location of the well, tunnel, or other deal stream or stream channel, give the distance ifference in elevation between the stream bed and (I) I Was a stream of area to be irrigated, or place of Township Range Range Range Range Rection	velopment work is less than one-fourth to the nearest point on each of such chil the ground surface at the source of de
Give horsepower and type of motor or engine to OFF PHASE ELECTRIC MILE 11. If the location of the well, tunnel, or other de al stream or stream channel, give the distance ifference in elevation between the stream bed and the stream of the	velopment work is less than one-fourth to the nearest point on each of such chil the ground surface at the source of de
Give horsepower and type of motor or engine to OFF PHASE ELECTRIC MILE 11. If the location of the well, tunnel, or other de al stream or stream channel, give the distance ifference in elevation between the stream bed and the stream of the	velopment work is less than one-fourth to the nearest point on each of such chil the ground surface at the source of de
