

Amount of water which the applicant intends to apply to beneficial use is 53.5 cubic feet per second or 24,000 gallons per minute.

7. The use to which the water is to be applied is Municipal

8. If the flow to be utilized is artesian, the works to be used for the control and conservation of the supply when not in use must be described.

Suitable means will be utilized to control the supply if artesian flow is encountered

9. If the location of the well, or other development work is less than one-fourth mile from a natural stream channel, give the distance to the channel and the difference in elevation between the stream bed and the ground surface at the source of development.

Well No. 1 (Gr. El. 50.0 MSL) is 500 ft. South of the Columbia River (Surf. El. 5.0 MSL)

10. DESCRIPTION OF WORKS

Include length and dimensions of supply ditch or pipeline, size and type of pump and motor, type of irrigation system to adequately describe the proposed distribution system.

The proposed wells will pump into Rockwood Water Districts existing municipal distribution system which consists of a pipe network ranging in size from 4-inch diameter to 20-inch diameter. Approximately 12,000 residences, businesses, and public buildings are served representing a population of 40,000. Projections indicate that up to 75,000 people will reside within the district boundaries by the year 2000. The district currently has 12.2 million gallons of reservoir storage capacity used for peaking and emergency periods.

11. Construction work will begin on or before 12/80

12. Construction work will be completed on or before

13. The water will be completely applied to the proposed use on or before

14. If the ground water supply is supplemental to an existing supply, identify the supply and existing water right.

Permit to Appropriate the Public Waters of the State of Oregon
SALEM, OREGON

This is to certify that I have examined the foregoing application and do hereby grant the same, SUBJECT TO EXISTING RIGHTS INCLUDING THE EXISTING MINIMUM FLOW POLICIES ESTABLISHED BY THE WATER POLICY REVIEW BOARD and the following limitations and conditions:

The right herein granted is limited to the amount of water which can be applied to beneficial use and shall not exceed 53.5 cubic feet per second measured at the point of diversion from the well or source of appropriation, or its equivalent in case of rotation with other water users, from.... six wells.....

WATER RESOURCES DEPT
SALEM, OREGON

The use to which this water is to be applied is..... municipal.....

If for irrigation, this appropriation shall be limited to of one cubic foot per second or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed acre feet per acre for each acre irrigated during the irrigation season of each year;

and shall be subject to such reasonable rotation system as may be ordered by the proper state officer.

The well shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon.

The works constructed shall include an air line and pressure gauge or an access port for measuring line, adequate to determine water level elevation in the well at all times.

The permittee shall install and maintain a weir, meter, or other suitable measuring device, and shall keep a complete record of the amount of ground water withdrawn.

The priority date of this permit is December 21, 1977.....

Actual construction work shall begin on or before February 7, 1981..... and shall

thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 1981.....

Extended to Oct. 1, 1986 Extended to October 1, 1991, 10-1-92, 10-1-97

Complete application of the water to the proposed use shall be made on or before October 1, 1982.....

Extended to Oct. 1, 1986 Extended to October 1, 1991, 10-1-92, 10-1-97

WITNESS my hand this 7th day of February....., 1980.....
