

6. The amount of water which the applicant intends to apply to beneficial use is ..... cubic feet per second or ..... 60 ..... gallons per minute.

7. The use to which the water is to be applied is irrigation.....

8. If the flow to be utilized is artesian, the works to be used for the control and conservation of the supply when not in use must be described.

NA

9. If the location of the well, or other development work is less than one-fourth mile from a natural stream channel, give the distance to the channel and the difference in elevation between the stream bed and the ground surface at the source of development.

NA

10. **DESCRIPTION OF WORKS**

Include length and dimensions of supply ditch or pipeline, size and type of pump and motor, type of irrigation system to adequately describe the proposed distribution system.

Approximately 1050' of underground 3" PVC pipe extends from well to Three Pines Rd. Lateral connections every 50'. For above-ground 2" and 3" aluminum pipe. Ground is watered by # 30 Rainbirds.

Pump is 3 h.p. submersible Flint & Walling; puts out 46 gal. a minute. May invest in larger pump, if needed. Motor is electric.

11. Construction work will begin on or before.....

12. Construction work will be completed on or before 2-1-82.....

13. The water will be completely applied to the proposed use on or before 10-1-82.....

14. If the ground water supply is supplemental to an existing supply, identify the supply and existing water right. X

Application No. G-10153

Permit No. G 9247

U 8574

Remarks: Our property is zoned exclusive Farm. We have invested alot in a 3 h.p. pump and an under-ground pipeline plus above-ground pipe/sprinklers. We wish to protect our investment and the future of our farm by assuring water rights in the event that lands adjacent to us might be subdivided and there-by deplete<sup>or diminish</sup> the underground water supply to our well.

Permit No. G 9247

Application No. G-10153

Permit No. G 9217

### Permit to Appropriate the Public Waters of the State of Oregon

*This is to certify that I have examined the foregoing application and do hereby grant the same, SUBJECT TO EXISTING RIGHTS INCLUDING THE EXISTING MINIMUM FLOW POLICIES ESTABLISHED BY THE WATER POLICY REVIEW BOARD and the following limitations and conditions:*

*The right herein granted is limited to the amount of water which can be applied to beneficial use and shall not exceed 0.13 cubic feet per second measured at the point of diversion from the well or source of appropriation, or its equivalent in case of rotation with other water users, from one well.*

*The use to which this water is to be applied is irrigation.*

*If for irrigation, this appropriation shall be limited to 1/80th of one cubic foot per second or its equivalent for each acre irrigated and shall be further limited to a diversion of not to exceed 2 1/2 acre feet per acre for each acre irrigated during the irrigation season of each year;*

*and shall be subject to such reasonable rotation system as may be ordered by the proper state officer.*

*The well shall be constructed in accordance with the General Standards for the Construction and Maintenance of Water Wells in Oregon.*

*The works constructed shall include an air line and pressure gauge or an access port for measuring line, adequate to determine water level elevation in the well at all times.*

*The permittee shall install and maintain a weir, meter, or other suitable measuring device, and shall keep a complete record of the amount of ground water withdrawn.*

*The priority date of this permit is February 11, 1981*

*Actual construction work shall begin on or before April 15, 1982 and shall thereafter be prosecuted with reasonable diligence and be completed on or before October 1, 1982*

*Complete application of the water to the proposed use shall be made on or before October 1, 1983*

*WITNESS my hand this 15th day of April, 1981*

  
Water Resources Director
