The area submerged by the reservoir, when full, will be 3.0 acres and the maximum depth of water will be 8.0 feet.

When in the judgment of the watermaster it becomes necessary to regulate waters of the stream system, storage of water in the reservoir shall be subject to installation of suitable devices for measuring all incoming natural flows and outflows from the reservoir. The types and plans for such devices shall be approved by the watermaster and shall be installed under the general supervision of said watermaster.

The area to be submerged by the reservoir is located within:

W 1/2 SW/ 1/4
SECTION 28

E 1/2 SE 1/4
SECTION 29
TOWNSHIP 5 SOUTH, RANGE 4 WEST, W.M.

The construction, operation and maintenance of the reservoir will be subject to the following conditions:

1. The structure shall be constructed under the supervision of a registered engineer licensed in Oregon.
2. The structure shall be constructed, operated and maintained in accordance with the approved plans and specifications and with the design intent.

3. No water shall be stored until this department receives written certification from the engineer that construction has been completed in accordance with the approved plans and specifications, and written authorization for storage is received from this department.

4. The outlet gate shall be cycled at least once each year in order to assure smooth operation.

5. The embankment and spillway shall be kept clear of trees, brush and other debris.

6. The embankment shall be kept free of burrowing animals.

7. An area-capacity curve, prepared by an engineer, must be submitted to this department construction is completed..

8. As a minimum, all flashboards are to be removed no later than October 1 each year and not installed until after April 1 each year.

The storage of water allowed herein is subject to the installation and maintenance of an outlet pipe, or the provisions of other means to evacuate water when determined necessary by the Water Resources Director to satisfy prior downstream rights.

Actual construction work shall begin on or before OCTOBER 1, 1991, and shall be completed on or before October 1, 1992. The reservoir shall be filled, and complete application of the stored water to the use shall be made on or before October 1, 1993.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

The permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The storage of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including rights for maintaining instream flows.

Issued this date, OCTOBER 1, 1990.
