This development was reviewed and approved by the Water Resources Commission on March 13, 1992.

The permittee shall install, operate and maintain all fish bypass devices required by Oregon Department of Fish and Wildlife to allow fish unobstructed passage above and below the levee dams at all times of the year each year.

Use under this permit is limited to the reservoir area. This permit does not provide for the appropriation of water for maintaining the water level or maintaining a suitable fresh water condition.

When in the judgement of the Watermaster it becomes necessary to regulate waters of the stream system, storage of water in the reservoir shall be subject to the installation of suitable devices for measuring all incoming natural flows and outflows from the reservoir or passing all incoming natural flows. The types and plans for such devices shall be approved by the Watermaster and shall be installed under the general supervision of said Watermaster.

The storage of water allowed herein is subject to the installation and maintenance of an outlet pipe to evacuate water when determined necessary by the Water Resources Director to satisfy prior downstream rights.

Actual construction work shall begin on or before April 27, 1993, and shall be completed on or before October 1, 1994. The reservoir shall be filled and complete application of the stored water to the use shall be made on or before October 1, 1995.

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

The permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The storage of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.

Issued this date, APRIL 27, 1992.
