The water user is required to install and maintain an in-line flow meter, weir, or other suitable device approved by the watermaster for measuring and recording the quantity of water diverted.

The water user is required to install and maintain on reservoir 2 an outlet pipe with a minimum diameter of 8 inches and an approved controlling device or shall provide other means to bypass direct flows or to evacuate the stored water.

Actual construction work shall begin on or before August 17, 1993, and shall be completed on or before October 1, 1994. The reservoir shall be filled and complete application of the stored water to the use shall be made on or before October 1, 1995.

ext. C96

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

The permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The storage of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including rights for maintaining instream flows.

Issued this date, AUGUST 17, 1992.
