Measurement, recording and reporting conditions:

- A. Before water use may begin under this permit, a totalizing flow meter or other suitable measuring device(s) as approved by the watermaster must be installed at each diversion point. The totalizing flow meter must be installed and maintained as identified in OAR 690-507-645. The permittee shall keep a complete record of the amount of water used each month. The permittee shall submit a report which includes the recorded water use measurements to the Department at its request. The permittee may be required to report annually or more frequently as may be required by the Director. Further, the Director may require the permittee to report general water use information, including the place and nature of use of water under the permit.

This right is limited to any deficiency in the available supply of any prior right existing for the same land.

The storage of water allowed herein is subject to the installation and maintenance of an outlet pipe, with a minimum diameter of eight inches, or the provision of other means to evacuate water when determined necessary for public safety, to satisfy prior downstream rights, or pass natural inflow as determined by the Water Resources Director (except Reservoir 6 - see below).

Before water use may begin under this permit, a weir must be installed downstream of the Reservoir 6 and a fully functional conduit/gate assembly having a minimum diameter of eight inches must be installed and maintained.

STANDARD CONDITIONS

Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.

This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.

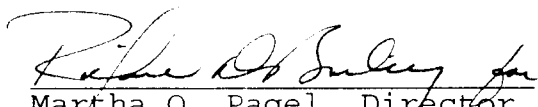

By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.

The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.

The Director finds that the proposed use(s) of water described by this permit, as conditioned, will not impair or be detrimental to the public interest.

Actual construction work shall begin within one year from permit issuance and shall be completed on or before October 1, 1999. The reservoir shall be filled and complete application of the stored water to the use shall be made on or before October 1, 2000.

Issued January 31, 1997

Martha O. Pagel, Director
Water Resources Department
