

**Application for a Reservoir and to
Appropriate the Water Unappropriated
Under the State of Oregon**

I, WALTER D. BARR
 of ROVER & BARR BY A RTA Reservoir

State of OREGON, do hereby make application for a permit to construct the
 following described reservoir and to store the unappropriated waters of the State of Oregon, subject to
 existing rights.

If the applicant is a corporation, give date and place of incorporation

1. The name of the proposed reservoir is unnamed

2. The name of the stream from which the reservoir is to be filled and the appropriation made is

unnamed
 tributary of Tumultin River

3. The amount of water to be stored is 4 acre feet.

4. The use to be made of the impounded water is irrigation

5. The location of the proposed reservoir will be in Sec. 19

Tp. 15, R. 24, W. M., in the county of Washington

(a) State whether situated in channel of running stream and give character of material at outlet
running stream, heavy clay loam to clay subsoil

(b) If not in channel of running stream, state how it is to be filled. If through a feed canal, give
 name and dimensions

6. The dam will be located in Lot 56 North Hill, Sec. 19

Tp. 15, R. 24, W. M. The maximum height will be 9 1/2 feet above stream bed or ground

surface on center line of dam. The length on top will be 200 feet; length on

bottom 100 feet; width on top 8 feet; slope of front

of water side 3:1; slope on back 2:1; height of dam above water line

when full 3 1/4 feet.

A different form of application should be used for the appropriation of stored water to beneficial use. Such forms can be secured
 without charge, together with instructions, by addressing the State Engineer, Salem, Oregon.

7. The character of work, the nature of the work, and method of protection from lands are as follows: NO WAVE ACTION PROTECTION NEEDED

8. The location of structure with dimensions are as follows: at North end on firm material. Entrance 10', Gate 9', Depth 2'

9. The location of outlet from the proposed reservoir, with character of construction and dimensions are as follows: 6" diameter steel pipe incased in reinforced concrete with collars as required. 60' long. Slide valve control

10. The area submerged by the proposed reservoir, when full, will be 1.4 acres with a maximum depth of water of 1 foot; and approximate mean depth of water 4 1/2 feet.

- 11. The estimated cost of the proposed work is \$ 2200
- 12. Construction work will begin on or before September, 1955
- 13. Construction work will be completed on or before November 1, 1955
