

**Application for Construction of Reservoir and to
Store the Unappropriated Waters of the State of Oregon**

Jack De Jong
(Name of Applicant)

Route 1, Sheridan
(Mailing Address)

Oregon

do hereby make application for a permit to construct the following described reservoir and to store the unappropriated waters of the State of Oregon, subject to existing rights

If the applicant is a corporation, give date and place of incorporation

1. The name of the proposed reservoir is **The DeJong Reservoir**

2. The name of the stream from which the reservoir is to be filled and the appropriation made is **unnamed creek**

tributary of **Salt Creek**, a tributary of the **Vanhill River**

3. The amount of water to be stored is **30** acre feet.

4. The use to be made of the impounded water is **irrigation**
(Irrigation, power, domestic supply, etc.)

5. The location of the proposed reservoir will be in **Sec 7 and 18**

Tn. 6 South, R. 5 West, W. M., in the county of **Polk**

(a) State whether situated in channel of running stream and give character of material at outlet
in channel of small creek with hard clay bottom at outlet

(b) If not in channel of running stream, state how it is to be filled. If through a feed canal, give name and dimensions

6. The dam will be located in **Sec. 7 of T. 6 S. R. 5 W. Sec. 7**

Tn. 6 South, R. 5 West, W. M. The maximum height will be **30** feet above stream bed or ground surface on center line of dam. The length on top will be **550** feet; length on

bottom **20** feet; width on top **12** feet; slope of front or water side **3:1**; slope on back **2:1**; height of dam above water line

when full **3** feet.

* A different form of application should be used for the appropriation of stored water to beneficial use. Such forms can be secured without charge, together with instructions, by addressing the State Engineer, Salem, Oregon.

7. A plan showing location of work, the character of work to be done, and method of protection from

Wades are as follows: Balled fill earth dam with rock riprap protection

8. The location of instability with dimensions are as follows: A spillway around north end
(State whether over or around the dam)

of dam is to be excavated with 12:1 bottom and 2:1 slope on sides

9. The location of outlet from the proposed reservoir, with character of construction and dimensions,

are as follows: 12" drain pipe or double-strength concrete culvert pipe to be laid
bottom of present channel excavated to fit bottom of pipe and over same
(normal flow of the stream at any time.)

10. The area submerged by the proposed reservoir, when full, will be _____ acres,

with a maximum depth of water of 25 feet; and approximate mean depth of water
7.5 feet.

11. The estimated cost of the proposed work is \$2,500 to \$3,800

12. Construction work will begin on or before July 1, 1953

13. Construction work will be completed on or before September 1, 1953
