

STATE OF OREGON
COUNTY OF DOUGLAS
PERMIT TO STORE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO
FRANKLIN AND/OR EDNA HAUSOTTER LIVING TRUST
PO BOX 428
RIDDLE OR 97469

The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: R-88802

SOURCE OF WATER: UNNAMED STREAM, TRIBUTARY TO COW CREEK

STORAGE FACILITY: RESERVOIR B

THE MAXIMUM HEIGHT OF THE DAM SHALL NOT EXCEED 6.0 FEET

MAXIMUM VOLUME: 6.0 ACRE-FEET

PURPOSE OR USE OF THE STORED WATER: MULTIPURPOSE

WATER MAY BE APPROPRIATED FOR STORAGE DURING THE PERIOD: DECEMBER 1
THROUGH JUNE 30

DATE OF PRIORITY: FEBRUARY 5, 2020

DAM LOCATION:

Twp	Rng	Mer	Sec	Q-Q	Measured Distances
30 S	6 W	WM	13	NE SE	975 FEET SOUTH AND 1405 FEET EAST FROM C1/4 CORNER, SECTION 13

THE AREA TO BE SUBMERGED BY THE RESERVOIR:

Twp	Rng	Mer	Sec	Q-Q
30 S	6 W	WM	13	NE SE
30 S	6 W	WM	13	NW SE

1. Water Use Measurement, Recording, and Reporting Conditions:

- A. The Director may require the permittee to install a totalizing flow meter at each point of diversion. If the Director notifies the permittee to install a measuring device, the permittee shall install such device within the period stated in the notice. Once installed, the permittee shall maintain the device in good working order, and shall allow the watermaster access to the device.

- B. The Director may require the permittee to keep and maintain a record of the volume of water diverted, and may require the permittee to report water-use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water-use information, the periods of water use and the place and nature of use of water under the permit.
- C. The Director may provide an opportunity for the permittee to submit alternative measuring and reporting procedures for review and approval.
2. The storage of water allowed herein is subject to the installation and maintenance of an outlet pipe (with a minimum diameter of 8" for any in-channel reservoir). This requirement may be waived if the Department determines other means have been provided to evacuate water when necessary.
 3. The permittee shall pass all live flow outside the storage season described above.
 4. The Director may require the user to measure inflow and outflow, above and below the reservoir respectively, to ensure that live flow is not impeded outside the storage season. Measurement devices and their implementation must be acceptable to the Director, and the Director may require that data be recorded on a specified periodic basis and reported to the Department annually or more frequently.
 5. To protect beneficial uses, the Oregon Department of Fish and Wildlife (ODFW) recommends any in-water work related to development of the proposed use be conducted during July 1 through September 15 unless an alternate time period is approved by ODFW.
 6. The permittee shall not construct, operate or maintain any dam or artificial obstruction to fish passage in the channel of the subject stream without providing a fishway to ensure adequate upstream and downstream passage for fish, unless the permittee has requested and been granted a fish passage waiver by the Oregon Fish and Wildlife Commission. The permittee is hereby directed to contact an ODFW Fish Passage Coordinator, before beginning construction of any in-channel obstruction.
 7. The permittee may be required in the future to install, maintain, and operate fish screening and bypass devices to prevent fish from entering the proposed diversion and to provide adequate upstream and downstream passage for fish.
 8. If the riparian area is disturbed in the process of developing a point of diversion, the permittee shall be responsible for restoration and enhancement of such riparian area in accordance with ODFW's Fish and Wildlife Habitat Mitigation Policy OAR 635-415. For purposes of mitigation, the ODFW Fish and Wildlife Habitat Mitigation Goals and Standards, OAR 635-415, shall be followed.
 9. The use may be restricted if the quality of the source stream or downstream waters decrease to the point that those waters no longer meet existing state or federal water quality standards due to reduced flows.
 10. The permittee may not cause pollution of any waters of the state, or place or cause to be placed any wastes in a location where such wastes are likely to escape or be carried into the waters of the state by any means, per ORS 468B.025(1). If the Department of Environmental Quality (DEQ)

determines that pollution of waters of the state is occurring, the permittee is not in compliance with ORS 468B.025(1) and DEQ shall notify the Department of the violation.

11. The permittee shall not release polluted off-channel stored water into waters of the state unless under emergency situations. The permittee shall treat released water to comply with OSR 340-041 and ensure that water-quality standards are not violated by releases from storage.
12. The permittee shall comply with basin-specific Agricultural Water Quality Management Area Rules in OAR 603-095. Livestock management and cropping must protect riparian areas on the property, allowing site capable vegetation along streams to establish and grow to provide the following functions; shade (on perennial and some intermittent streams), bank stability, and infiltration or filtration of overland runoff. Active management of livestock and/or a livestock exclusion fence is needed to protect riparian areas and provide the required functions.
13. This permit allows an annual appropriation (not to exceed the specified volume). This permit does not provide for the appropriation of water for out-of-reservoir uses, the maintenance of the water level or maintaining a suitable freshwater condition. If any water is to be used for out-of-reservoir purposes, a secondary water right is required. If any additional live flow is to be appropriated to maintain either the water level or a suitable freshwater condition, an additional water right is required.

STANDARD CONDITIONS

1. Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.
2. This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.
3. By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.
4. The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.
5. Construction of the water system shall begin within five years of the date of permit issuance. The deadline to begin construction may not be extended. This permit is subject to cancellation proceedings if the begin construction deadline is missed.
6. The permitted volume of water shall be stored within five years of the date of permit issuance. If additional time is needed, the permittee may submit an application for extension of time, which may be approved based upon the merit of the application.
7. Within one year after storage of water, the permittee shall submit a claim of beneficial use to the Oregon Water Resources Department.

8. The claim of beneficial use shall be prepared by a Certified Water Right Examiner in conformance with the requirements of OAR 690-014 if an associated secondary permit exists for the use of stored water under this permit, or if the reservoir capacity is equal to or greater than 9.2 acre-feet.
9. If no secondary permit exists and the reservoir capacity is less than 9.2 acre-feet of water, the claim of beneficial use need not be prepared by a Certified Water Right Examiner. The information submitted to the Oregon Water Resources Department shall include:
 - a. the dimensions of the reservoir;
 - b. the maximum capacity of the reservoir in acre-feet; and
 - c. a map identifying the location of the reservoir prepared in compliance with Water Resource Department standards.

Issued AUG 11 2020

Dwight French
Water Right Services Division Administrator, for
Thomas M. Byler, Director
Oregon Water Resources Department
