

STATE OF OREGON

COUNTY OF CLACKAMAS

PERMIT TO STORE PUBLIC WATERS

THIS PERMIT IS HEREBY ISSUED TO

PHILLIP H. CHADSEY  
37748 S NOWLENS BRIDGE RD  
MOLALLA OR 97038

The specific limits and conditions of the use are listed below.

APPLICATION FILE NUMBER: R-88869

SOURCE OF WATER: POA 1 WELL (CLAC 60456/L71430)), AUTHORIZED UNDER PERMIT G-18734; AND  
RUNOFF AND SEEPAGE, TRIBUTARY TO MARQUAM CREEK

STORAGE FACILITY: CHADSEY RESERVOIR

THE RESERVOIR IS ENTIRELY BELOW GROUND SURFACE; THERE IS NO DAM.

MAXIMUM VOLUME: 16.0 ACRE-FEET

PURPOSE OR USE OF THE STORED WATER: MULTIPLE PURPOSE

SURFACE WATER MAY BE APPROPRIATED FOR STORAGE DURING THE PERIOD: NOVEMBER 1 THROUGH  
MAY 31

GROUNDWATER FROM POA 1 WELL MAY BE APPROPRIATED FOR STORAGE DURING THE PERIOD:  
JANUARY 1 THROUGH DECEMBER 31

DATE OF PRIORITY: SEPTEMBER 8, 2020

AUTHORIZED POINT OF DIVERSION:

POD Name	Twp	Rng	Mer	Sec	Q-Q	Measured Distances
POA 1 WELL	6 S	1 E	WM	10	SW SW	5037 FEET SOUTH AND 1660 FEET EAST FROM NW CORNER, DLC 46
RUNOFF AND SEEPAGE	6 S	1 E	WM	10	SW SW	5167 FEET SOUTH AND 1790 FEET EAST FROM NW CORNER, DLC 46

THE AREA TO BE SUBMERGED BY THE RESERVOIRS:

Twp	Rng	Mer	Sec	Q-Q
6 S	1 E	WM	10	SW SW

## PERMIT SPECIFIC CONDITIONS

1. Failure to comply with any of the provisions of this permit may result in action including, but not limited to, restrictions on the use, civil penalties, or cancellation of the permit.
2. **Water Use Measurement, Recording, and Reporting:**
  - A. Before water use may begin under this permit, the permittee shall install a totalizing flow meter at each point of diversion. The permittee shall maintain the device in good working order.
  - B. The permittee shall allow the watermaster access to the device; provided however, where any device is located within a private structure, the watermaster shall request access upon reasonable notice.
  - C. The Director may require the permittee to keep and maintain a record of the volume of water diverted, and may require the permittee to report water-use on a periodic schedule as established by the Director. In addition, the Director may require the permittee to report general water-use information, the periods of water use and the place and nature of use of water under the permit.
  - D. The Director may provide an opportunity for the permittee to submit alternative measuring and reporting procedures for review and approval.

2. **Agricultural Water Quality Management Area Rules:**

The permittee shall comply with basin-specific Agricultural Water Quality Management Area Rules described in Oregon Administrative Rule Chapter 603-095. The permittee shall protect riparian areas, allowing site capable vegetation to establish and grow along streams, while providing the following functions: shade (on perennial and some intermittent streams), bank stability, and infiltration or filtration of overland runoff.

3. **Fish Screen:**

The permittee shall install, maintain, and operate fish screening consistent with current Oregon Department of Fish and Wildlife (ODFW) standards or submit documentation that ODFW has determined fish screening is not necessary or is exempted. Fish screening is to prevent fish from entering the proposed diversion. The required screen and by-pass devices are to be in place and functional, and approved in writing by ODFW **prior to diversion of any water**. The permittee shall operate and maintain the fish screen consistent with ODFW's operation and maintenance standards. The permittee is hereby directed to schedule a consultation with an ODFW Fish Screen Coordinator.

**4. Water Quality:**

All water use under this permit shall comply with state and federal water quality laws. The permittee shall not violate any state and federal water quality standards, shall not cause pollution of any waters of the state, and shall not place or cause to be placed any wastes in a location where such wastes are likely to escape or be carried into the waters of the state by any means. The use may be restricted if the quality of source stream or downstream waters decrease to the point that those waters no longer meet existing state or federal water quality standards.

**5. Riparian Area Restoration:**

If the riparian area is disturbed in the process of developing a point of diversion, the permittee shall be responsible for restoration and enhancement of such riparian area in accordance with ODFW's Fish and Wildlife Habitat Mitigation Policy OAR 635-415. For purposes of mitigation, the ODFW Fish and Wildlife Habitat Mitigation Goals and Standards, OAR 635-415, shall be followed.

**6. In-Water Work:**

Any in-water work related to construction, development, or maintenance of the proposed use shall be conducted during the preferred work period of June 1 through September 30, unless an alternate time period is approved by Oregon Department of Fish and Wildlife.

**7. Off-Channel Stored Water Releases:**

The permittee shall not release polluted water from this off-channel reservoir into waters of the state except when the release is directed by the State engineer to prevent dam failure.

8. The storage of water allowed herein is subject to the installation and maintenance of an outlet pipe (with a minimum diameter of 8" for any in-channel reservoir). This requirement may be waived if the Department determines other means have been provided to evacuate water when necessary.
9. The permittee shall pass all live flow outside the storage season described above.
10. The Director may require the user to measure inflow and outflow, above and below the reservoir respectively, to ensure that live flow is not impeded outside the storage season. Measurement devices and their implementation must be acceptable to the Director, and the Director may require that data be recorded on a specified periodic basis and reported to the Department annually or more frequently.
11. The permittee shall not construct, operate or maintain any dam or artificial obstruction to fish passage in the channel of the subject stream without providing a fishway to ensure adequate upstream and downstream passage for fish, unless the permittee has requested and been granted a fish passage waiver by the Oregon Fish and Wildlife Commission. The permittee is hereby directed to contact an Oregon Department of Fish and Wildlife Fish Passage Coordinator, before beginning construction of any in-channel obstruction.

12. This permit allows an annual appropriation (not to exceed the specified volume). This permit does not provide for the appropriation of water for out-of-reservoir uses, the maintenance of the water level or maintaining a suitable freshwater condition. If any water is to be used for out-of-reservoir purposes, a secondary water right is required. If any additional live flow is to be appropriated to maintain either the water level or a suitable freshwater condition, an additional water right is required.

#### **STANDARD CONDITIONS**

1. This permit is for the beneficial use of water without waste. The water user is advised that new regulations may require the use of best practical technologies or conservation practices to achieve this end.
2. By law, the land use associated with this water use must be in compliance with statewide land-use goals and any local acknowledged land-use plan.
3. The use of water allowed herein may be made only at times when sufficient water is available to satisfy all prior rights, including prior rights for maintaining instream flows.

#### **DEVELOPMENT AND COMPLETION TIMELINE REQUIREMENTS**

1. Construction of the water system shall begin within five years of the date of permit issuance. The deadline to begin construction may not be extended. This permit is subject to cancellation proceedings if the begin construction deadline is missed.
2. The permitted volume of water shall be stored within five years of the date of permit issuance. If additional time is needed, the permittee may submit an application for extension of time, which may be approved based upon the merit of the application.
3. Within one year after storage of water, the permittee shall submit a claim of beneficial use to the Oregon Water Resources Department.
4. The claim of beneficial use shall be prepared by a Certified Water Right Examiner in conformance with the requirements of OAR 690-014 if an associated secondary permit exists for the use of stored water under this permit, or if the reservoir capacity is equal to or greater than 9.2 acre-feet.
5. If no secondary permit exists and the reservoir capacity is less than 9.2 acre-feet of water, the claim of beneficial use need not be prepared by a Certified Water Right Examiner. The information submitted to the Oregon Water Resources Department shall include:
  - a. the dimensions of the reservoir;
  - b. the maximum capacity of the reservoir in acre-feet; and
  - c. a map identifying the location of the reservoir prepared in compliance with Water Resource Department standards.

Issued **APR 01 2022**

Dwight French  
Water Right Services Division Administrator, for  
Thomas M. Byler, Director  
Oregon Water Resources Department
